Introduction	VII
<i>Weston A.H.</i> (Manchester): The Pharmacology of Smooth Muscle Potassium Channels ...	1
<i>Pavenstädt H., Lindemann S., Greger R.</i> (Freiburg): Effect of Cromakalim (BRL 34915) and Glibenclamide on the Membrane Voltage and K-Channels of Primary Cultures of Rabbit Aorta Vascular Smooth Muscle Cells	19
<i>Noack Th., Deitmer P., Lammel E.</i> (Marburg): Membrane Currents in Single Smooth Muscle Cells of the Guinea Pig Portal Vein and Possible Effect of Prostacyclin	24
<i>Boeynaems J.M., Ramboer I.</i> (Brussels): Potassium Channels and Endothelial Prostacyclin Production	31
<i>Förstermann U.</i> (Abbott Park): Prostaglandins of Endothelial and Non-endothelial Origin ..	37
<i>MacDermont J.</i> (London): Prostacyclin, Cyclic AMP, and Relaxation of Vascular Smooth Muscle	49
<i>Noll T., Piper H.M., Spahr R., Strobach H., Schrör K.</i> (Düsseldorf): Energetic State and Prostacyclin Metabolism of Hypoxic Endothelial Cells	57
<i>FitzGerald G.A., Murray R., Fitzgerald D.J., Catella F., Funk C.</i> (Nashville): Eicosanoids and Blood Pressure	65
<i>Siegel G., Wenzel K., Schnalke F., Mironneau J., Schultz G., Schröder G., Schillinger E., Grauhan O., Hetzer R.</i> (Berlin): Prostacyclin Analogues as K ⁺ Channel Openers	72
<i>Schröder G., Graichen G.</i> (Berlin): Comparison of the Vasorelaxing Effect of Iloprost (PGI ₂ Analogue) and Cromakalim (K-Channel Activator) in Isolated Vascular Preparations of the Rabbit	97
<i>Koltai M., Esanu A., Braquet P.</i> (Le Plessis Robinson): Relaxation of Vascular Smooth Muscle by Cicletanine	106
<i>Hoffmann G., Göbel B.O., Weisser B., Pietsch R., Vetter H., Düsing R.</i> (Bonn): Angiotensin I-Converting Enzyme Inhibition, Calcium Channel Blockade, and Vascular Prostacyclin Generation	137
<i>Frölich J.C.</i> (Hannover): Prostacyclin and Hypertension	142
