

CONTENTS

SECTION 1: SOLIDIFICATION AND MELTING

Recent Developments in the Modelling of Solidification Processes <i>V.R. Voller</i>	3
Numerical Modelling of Freezing Processes in Foodstuffs <i>G. Comini, O. Saro</i>	21
Numerical Solution of a Stefan Problem Arising in the Thermoelectrical Modelling of Aluminium Electrolytic Cells <i>A. Bermúdez, M.C. Muñoz, P. Quintela</i>	39
An Alternative Approach for the Modelling and Simulation of Binary-Alloy Solidification using a Fixed-Grid Control-Volume Technique <i>M. Fabbri</i>	59
Melting of Anisotropic Crystals by the Boundary-Domain Integral Method <i>B. Sarler, A. Alujevic</i>	77
An Efficient Finite Element Procedure for the Solution of Enthalpy Model for Phase Change Heat Conduction Problems <i>Z.-X. Gong, Y.-F. Zhang, A.S. Mujumdar</i>	93
Cyclic Phase Change Heat Conduction in Thin Composite Slabs <i>Z.-X. Gong, Y.-F. Zhang, A.S. Mujumdar</i>	105
Simulation of Natural Convection Melting of a Pure Metal from Below <i>M. Lacroix</i>	121
A Fast Implementation of the Isotherm Migration Method <i>A.S. Wood</i>	133
An Inverse Finite Element Method for Directly Formulated Free and Moving Boundary Problems <i>A.N. Alexandrou</i>	149
Finite Difference Enthalpy Methods for Dendritic Growth <i>K.-H. Tacke, A. Harnisch</i>	165

Numerical Model of Heat Transfer Processes in Solidifying and Cooling Steel Ingot (on the basis of BEM) <i>B. Mochnacki, E. Majchrzak, A. Kapusta</i>	177
SECTION 2: METAL CASTING AND WELDING	
Spread in Hot Rolling: an Optimal Control Approach <i>P. Montmitonnet, A. Bern, J.L. Chenot</i>	193
Newtonian Fluid Computations in Lagrangian Variables with a Remeshing Technique. Application to the Filling Stage of the Diecasting Process <i>F. Muttin, T. Coupez, M. Bellet, J.L. Chenot</i>	207
Utilization of the Boundary Element Method for Numerical Analysis of Thermal Processes in the Casting-Mould System <i>E. Majchrzak</i>	223
Free Surfaces Computation in a Steady-State Finite Element Model for Tube Rolling <i>M. Vacance, E. Massoni, J.L. Chenot</i>	239
Prediction of the Free Surface in a Continuous Casting Mould and its Influence on the Flow Pattern and the Temperature Distribution <i>A. Preuer</i>	253
SECTION 3: ELECTRICAL/ELECTROMAGNETIC PROBLEMS	
Optimal Shape Synthesis of Electric Devices using the Boundary Element Method <i>M. Rudnicki, A. Savini, P. Di Barba, K. Pawluk</i>	269
Modelization of the Non-Linear Moving Parts of an Electromechanical Relay <i>F. Delincé, P. Dular, A. Genon, W. Legros, A. Nicolet, M. Umé</i>	281
SECTION 4: SCIENTIFIC APPLICATIONS	
Moving Boundary Problems and Solution Strategies in Semiconductor Process Simulation <i>E. Rank</i>	295
On a Kind of Dynamic Fracture Problem with Moving Boundaries <i>X.D. Wang</i>	309
