Introduction

HOTHORN, L. (Heidelberg)	
Modern statistical methods in toxicology – an overview	1

Biostatistical analysis of mutagenicity assays

SCHUMACHER, M. and SCHMOOR, C. (Freiburg)	
Statistical analysis of the Ames assay	5
LEIMER, I., PEIL, H. and ELLENBERGER, J. (Ingelheim)	
Statistical analysis of the micronucleus test with the Fisher–Pitman permutation test	20
RETTIG, S., LEHN, J. and MILTENBURGER, G. (Darmstadt)	
A statistical analysis of HGPRT–test data by means of computer simulations	25
PIEGORSCH, W.W. and ZEIGER, E. (Research Triangle Park)	
Measuring intra–assay agreement for the Ames salmonella assay	35
VOLLMAR, J. and EDLER, L. (Mannheim and Res. Triangle Park)	
Tabular overview of statistical methods proposed for the analysis of Ames Salmonella assay data	42

Biostatistical analysis of long–term carcinogenicity studies

KAUFMANN, J. (Berlin)	
Analyses of longterm carcinogenicity studies	49
EHRENBERG, L. and SCALIA–TOMBA, G. (Stockholm)	
Mathematical models for the initiating and promotive action of carcinogens	65
GRANATH, F. (Stockholm)	
Statistical problems in estimating a threshold in a dose–response model	79

Biostatistical analysis of embryo-toxicity studies

PIEGORSCH, W.W. and HASEMAN, J.K. (Res. Triangle Park) Per-litter analyses for studies in developmental toxicity	86
MEISTER, R., CHAHOUD, I., JÜRGENS, M., IVERSEN, F. and BOCHERT, G. (Berlin) Biometrical analysis of strain differences and litter effects, a case study	96
ROSENKRANZ, G. and UHL, R. (Frankfurt) Statistical evaluation of offspring parameters in embryotoxicity studies	104

General principles in biostatistical analysis of toxicological studies

HOTHORN, L. (Heidelberg) General statistical principles in testing of toxicological studies	111
MAUL, A. (Nancy) Determination of endpoints in acute and chronic toxicity tests by using generalized linear models	132
UNKELBACH, H.D. (Geisenheim) The need of software validation in routine toxicology	139
REPETO, P. (Verona) An application of mixed model ANOVA for the assessment of motor activity in rat behavioural toxicity studies	150
