Graph Algorithms and Complexity

Grammati E. Pantziou, University of Patras, Greece, Paul G. Spirakis, University of Patras, Greece, and Courant Institute, USA, Christos D. Zaroliagis, University of Patras, Greece <i>Optimal parallel algorithms for sparse graphs</i>	1
Jürgen Plehn, Bernd Voigt, Universität Bonn, Germany <i>Finding minimally weighted subgraphs</i>	18
Hans L. Bodlaender, Utrecht University, The Netherlands <i>On the complexity of some coloring games</i>	30
Ulrich Hückenbeck, Universität Würzburg, Germany Detlev Ruland, Siemens AG, München, Germany <i>A generalized best-first search method in graphs</i>	41
Tze-Heng Ma, Jeremy P. Spinrad, Vanderbilt University, USA <i>Avoiding matrix multiplication</i>	61
Peter Damaschke, Friedrich-Schiller-Universität Jena, Germany <i>Induced subgraph isomorphism for cographs is NP-complete</i>	72
Hermann Stamm, Universität Bonn, Germany <i>On feedback problems in planar digraphs</i>	79
Franz Aurenhammer, Freie Universität Berlin, Germany Johann Hagauer, Graz University of Technology, Austria <i>Recognizing binary Hamming graphs in $O(n^2 \log n)$ time</i>	90

VLSI Layout

Kuo-Feng Liao, Majid Sarrafzadeh, Northwestern University, USA <i>Vertex-disjoint trees and boundary single-layer routing</i>	99
Edmund Ihler, Universität Freiburg, Germany <i>Bounds on the quality of approximate solutions to the group Steiner problem</i>	109
Claudio Arbib, Università di Roma "Tor Vergata", Italy <i>Two polynomial problems in PLA folding</i>	119
Michael Formann, Frank Wagner, Freie Universität Berlin, Germany <i>The VLSI layout problem in various embedding models</i>	130

Fillia Makedon, Spyros Tragoudas, University of Texas at Dallas, USA <i>Approximating the minimum net expansion: Near optimal solutions to circuit partitioning problems</i>	140
---	-----

Multiprocessor Systems and Concurrency

Seshu Madhavapeddy, I. Hal Sudborough, University of Texas at Dallas, USA <i>Deterministic message routing in faulty hypercubes</i>	154
Hyeon-Ah Choi, George Washington University, USA Abdol-Hossein Esfahanian, Michigan State University, USA <i>On complexity of a message-routing strategy for multicomputer systems</i>	170
Peter Zienicke, Humboldt Universität, Berlin, Germany <i>Embeddings of treelike graphs into 2-dimensional meshes</i>	182
A. Das, K. Thulasiraman, Concordia University, Montreal, Canada <i>Diagnosis of t/s-diagnosable systems</i>	193
Ofer Biran, Shlomo Moran, Shmuel Zaks, Technion, Haifa, Israel <i>Deciding 1-solvability of distributed task is NP-hard</i>	206
Michel Habib, Michel Morvan, Jean-Xavier Rampon, CNRS and Université de Montpellier, France <i>Remarks on some concurrency measures</i>	221

Computational Geometry

Frank Hoffmann, Akademie der Wissenschaften, Berlin, Germany Michael Kaufmann, Universität des Saarlandes, Germany <i>On the rectilinear art gallery problem - algorithmic aspects</i>	239
Paul Fischer, Universität Dortmund, Germany Hans Ulrich Simon, Universität des Saarlandes, Germany <i>Separation problems and circular arc systems</i>	251
Klaus Reuter, Technische Hochschule Darmstadt, Germany Ivan Rival, University of Ottawa, Canada <i>Genus of orders and lattices</i>	260

Graphs, Languages and Databases

Iain A. Stewart, University of Newcastle upon Tyne, Great Britain <i>Comparing the expressibility of two languages formed using NP-complete graph operators</i>	276
--	-----

Dietmar Seipel, Universität Tübingen, Germany	
<i>Decomposition of linear recursive logic programs</i>	291

Graph Grammars

Didier Caucal, Roland Monfort, IRISA and IRMAR, Rennes-Cedex, France	
<i>On the transition graphs of automata and grammars</i>	311
Michael Löwe, Hartmut Ehrig, Technische Universität Berlin, Germany	
<i>Algebraic approach to graph transformation based on single pushout derivations</i>	338
