Gut as a Source of Organ Failure

<i>U. Haglund</i> Hypoxic Damage of the Gut in Shock	3
Discussion	17
<i>E.A. Deitch</i> Experimental Evidence of Bacterial Translocation in Trauma	23
Discussion	48
<i>G. Schlag, H. Redl, H.P. Dinges, J. Davies, and K. Radmore</i> Bacterial Translocation in a Baboon Model of Hypovolemic-Traumatic Shock	53
Discussion	84
<i>C.L. Wells, S.L. Erlandsen, D.L. Dunn, and R.L. Simmons</i> Bacterial Translocation Across a Histologically Intact Intestinal Mucosa	91
Discussion	114
<i>B.F. Rush Jr. and J.N. McCullough</i> Clinical Evidence of Bacterial Translocation from the Gut	118
Discussion	130
<i>R.J.A. Goris, I.P.T. van Bebber, and Th. Hendriks</i> Role of Bacterial Translocation and Selective Gut Decontamination in the Development of Multiple Organ Failure	133
Discussion	145

Metabolic Aspects of the Liver in Sepsis

<i>J.H. Siegel</i> The Liver as Modulator of the Host-Defense Response: Host-Defense Failure Disease as a Manifestation of Hepatic Decompensation	149
Discussion	203
<i>P.O. Hasselgren, D. von Allmen, and J.E. Fischer</i> Concepts of Liver Protein Metabolism in Sepsis	207

Discussion	231
<i>J.J. Spitzer, Z. Spolarics, A.P. Bautista, K. Mészáros, A. Schuler, and C.H. Lang</i> Increased Glucose Uptake and Superoxide Anion Production After Priming of Activation of Hepatic Phagocytes: A Potential Source of Liver Damage	235
Discussion	250
<i>J.A. Spitzer</i> Modulation of Hepatic Function in Endotoxemia by Intercellular Communication	255
Discussion	271
Endothelium as a Target in Sepsis	
<i>S.L. Kunkel, T. Standiford, and R.M. Strieter</i> Cytokine-Dependent Interleukin-8 Expression and its Role in Cell Communication	279
Discussion	294
<i>H. Redl, G. Schlag, H.P. Dinges, S. Bahrami, W.A. Buurman, U. Schade, and M. Ceska</i> Trauma and Sepsis Induced Activation of Granulocytes, Monocytes/Macrophages and Endothelial Cells in Primates	297
Discussion	314
<i>A.B. Malik</i> Molecular Mechanisms of Neutrophil-Mediated Pulmonary Microvascular Injury: Role of Adhesion Proteins	323
Discussion	348
<i>T.S. Edgington</i> Pathogenetic Linkages Between Gram Negative Septic Shock and the Cellular Initiation and Regulation of Coagulation	351
Discussion	368
<i>H.A. Linares</i> Sepsis, Disseminated Intravascular Coagulation and Multiorgan Failure: Catastrophic Events in Severe Burns	370
Discussion	397
<i>I. Fleming, B.L. Furman, G.A. Gray, M.O. Guc, G. Julou-Schaeffer, M. Bigaud, J.-C. Stoclet, and J.R. Parratt</i> Mechanisms of Vascular Impairment During Endotoxaemia with Special Reference to the Role of the L-arginine Pathway	399
Discussion	421

<i>D.L. Traber, D.N. Herndon, K. Fujioka, and L.D. Traber</i>	
Permeability Changes During Experimental Endotoxemia and Sepsis	425
Discussion	441
Final Discussion	447
Index	452
