

Contents

List of contributors — VII

Debabrata Panda, Akhilesh Kumar Sahu, Krunal M. Gangawane

Chapter 1

A state of the art and prospective of hybrid aerogel — 1

Sourav Poddar, Divya Baskaran, Uma Sankar Behera

Chapter 2

Hybrid inorganic aerogels for CO₂ adsorption — 33

Goga Ram, Nirmalya Bachhar

Chapter 3

Overview of organic–inorganic hybrid aerogels — 67

Xue Yang Goh, Jaesuk Hwang

Chapter 4

Advances in hybrid aerogels for energy and environment applications — 99

Supriyo Chakraborty, A. V. Rao, A. A. Pisal

Chapter 5

Application of hybrid aerogel as lightweight superior thermal insulation — 113

Shashir S. Kenganal, Abanti Sahoo

Chapter 6

Aerogel composite phase change material for thermal energy storages: a future perspective — 133

Debabrata Panda, Akhilesh Kumar Sahu, Krunal M. Gangawane

Chapter 7

Carbon and graphene hybrid aerogels on electrocatalysts for sustainable energy applications: recent developments and progress — 159

Himanshu Tiwari, Ram Sharan Singh

Chapter 8

Photocatalytic performance of hybrid aerogels for wastewater treatment — 187

Anand Raghav Chaubey, Krishna Raghav Chaturvedi, Abhishek Kumar

Chapter 9

Aerogel applications in the oil and gas industry: opportunities, challenges, and the way ahead — 201

Manisha Sain, Chinmayee Das, Shamik Chowdhury

Chapter 10

Hybrid aerogels for CO₂ adsorption — 215

Debabrata Panda, Akhilesh Kumar Sahu, Krunal M. Gangawane

Chapter 11

Bio-based hybrid aerogels for wearable electronics in healthcare applications — 227

Prachiprava Pradhan, Ajit P. Rathod, A. Waheed Deshmukh

Chapter 12

Hybrid polymeric aerogels for energy and environmental applications — 249

Abhishek Kumar, Debabrata Panda, Krunal M. Gangawane

Chapter 13

Computational modeling on the design of the morphology of aerogels — 269

Index — 291
