

Table of Contents

<i>Part I: Function and Structure of Vascular Tissue</i>	1
Structure and Function of Resistance Vessels in Hypertension <i>M.J. Mulvany</i>	3
Vascular Smooth Muscle Cell in Hypertension: Dissecting Out Cause and Effect <i>J.D. Swales</i>	13
Cellular Mechanisms of Spontaneous Hypertension and Stroke: Role of Vascular Smooth Muscle Cells <i>Y. Yamori, Y. Nara, T. Nabika, M. Tagami, and R. Horie</i>	25
Hypertrophic Growth of Vascular Smooth Muscle <i>G.K. Owens</i>	41
Biomechanical and Electrical Responses of Normal and Hypertensive Veins to Short-Term Pressure Increases <i>E. Monos, K. Kauser, S.J. Contney, A.W. Cowley Jr., and W.J. Stekiel</i>	51
<i>Part II: Calcium and Circulatory Control</i>	59
Dysfunction of Ca^{2+} -pump of Vascular Muscle Membranes: An Important Etiological Factor in Hypertension <i>C.Y. Kwan</i>	61

Changes in Ca^{2+} and Ca^{2+} Sensitivity During Contraction-Relaxation of Arterial Muscle <i>G. Bruschi, M.E. Bruschi, G. Regolisti, and A. Borghetti</i>	69
Superficial Sarcoplasmic Reticulum Regulates Activated and Steady-State Cytosolic Ca^{2+} Concentrations in Vascular Smooth Muscle <i>J. Barakeh, M.B. Cannell, R. Khalil, O. Thastrup, and C. van Breemen</i>	79
Subsarcolemmal Increase in Intracellular Ca^{2+} in Vascular Muscle Cells from Spontaneously Hypertensive Rats <i>K. Hermsmeyer and P. Erne</i>	91
Pathogenesis of Essential Hypertension: The Sodium Pump Inhibitor (Natriuretic Hormone) – Sodium/Calcium Exchange – Hypertension Hypothesis <i>M.P. Blaustein</i>	97
Calcium Metabolism and Its Relationship to Blood Pressure in Humans <i>A. Hvarfner</i>	111
Parathyroids, Hypertension, and Vascular Reactivity <i>A. Gairard, R. Schleiffer, F. Pernot, B. van Overloop, and C. Bergmann</i>	123
Protection Against Hypertensive Cardiovascular Damage by Dihydropyridine Calcium Antagonists <i>J.P. Stasch, S. Kazda, G. Luckhaus, A. Knorr, B. Garthoff, and C. Hirth-Dietrich</i>	135
Nifedipine and Vascular Smooth Muscle Cells in Atherogenesis: In Vivo and In Vitro Studies <i>P. Pauletto, S. Sartore, G. Scannapieco, A.C. Borriore, A.M.C. Zanellato, M. Tonello, and A.C. Pessina</i>	149
Sodium/Calcium Exchange in Cultured Human Mesangial Cells <i>P. Menè, F. Pugliese, and G.A. Cinotti</i>	157

Part III: Membrane Abnormalities: Blood Cell Models	167
Relation of Cell Permeability to Salt Sensitivity in Hypertension <i>S. M. Friedman</i>	169
RFLP Study of the SHR Genome in Relation to Cell Membrane Abnormalities <i>Y. V. Kotelevtsev and Y. V. Postnov</i>	175
Regulation on the Na^+/H^+ Exchanger in Essential Hypertension: Functional and Genetic Abnormalities <i>M. Canessa</i>	181
Regulation of the Na^+/H^+ Exchanger by Protein Kinase C and Its Implications in Hypertension: The Platelet Model <i>A. A. Livne, S. Markus, M. Afargan, and O. Aharonovitz</i>	193
Phosphoinositide Metabolism in Hypertension <i>P. Marche and D. L. Zhu</i>	201
Lymphocyte Membrane Abnormalities in Hypertension <i>P. B. Furspan and D. F. Bohr</i>	209
Structural and Functional Alterations of Platelet Membrane in Essential Hypertension <i>K.-H. Le Quan Sang, C. Astarie, M. Mazeaud, and M.-A. Devynck</i>	219
Platelet Abnormalities in Human Hypertension <i>A. Lechi, C. Lechi, C. Lauciello, P. Guzzo, E. Arosio, P. Minuz, and M. Zatti</i>	227
Aldosterone Receptors and Effector Mechanisms in Mononuclear Leukocytes in Different Forms of Hypertension <i>D. Armanini, M. Wehling, D. Bosson, U. Kuhnle, P. C. Weber, E. Milan, C. Pratesi, M. C. Zennaro, L. Martella, M. Scali, V. Zampollo, and F. Mantero</i>	237
Role of Adrenergic Receptors in Essential Hypertension <i>E. Friischka and T. Philipp</i>	245

VIII Table of Contents

Na ⁺ , K ⁺ , CL ⁻ Cotransport System in Primary Hypertension: Studies in Red Cells and in the Choroid Plexus of Spontaneously Hypertensive Rats <i>C. Rosati, M.-M. Ruchoux, K. Gruber, and R. Garay . . .</i>	257
Subject Index	263
