

Contents

Preface — V

Joseph Auslander and Anima Nagar

On almost periodicity and minimality for semiflows — 1

Guy Cohen and Jean-Pierre Conze

Empirical process sampled along the sums of a stationary process — 13

Emilio Corso

The distribution of dilating sets: a journey from Euclidean to hyperbolic geometry — 57

Benjamin D. Miller and Anush Tserunyan

A ratio ergodic theorem via tiling and uniformly syndetic markers — 99

Ivan Podvigini

On the pointwise rate of convergence in the Birkhoff ergodic theorem: recent results — 117

Yu-Wei Fan

An invitation to categorical dynamical systems — 127
