

Contents

Part I: Keynote Lectures

Shockwave Beyond	3
<i>Kazuyoshi Takayama</i>	
Reflection and Diffraction of Shock Waves and Shock-Wave Configurations	13
<i>I.V. Krassovskaya, M.K. Berezkina</i>	
Shock Induced Chemical Decomposition in Condensed Energetic Materials: Molecular Mechanisms	21
<i>Yogendra M. Gupta</i>	
How Does Deflagration Get Detonated in Gases? - Recent Research Progress on DDT -	23
<i>A. Koichi Hayashi</i>	
Super-Orbital Re-entry in Australia: Laboratory Measurement, Simulation and Flight Observation	29
<i>David Buttsworth, Peter Jacobs, Daniel Potter, Neil Mudford, Mary D'Souza, Troy Eichmann, Peter Jenniskens, Tim McIntyre, Michael Jokic, Carolyn Jacobs, Ben Upcroft, Razmi Khan, Hadas Porat, Andrew Neely, Stefan Löhle</i>	
Pioneering in Hypersonic Transportation: Long Term Perspectives and Technological Challenges	39
<i>J. Steelant</i>	
Drag Reduction for Transonic Wings Combining Reduced Wing Sweep with Shock Control	45
<i>Ning Qin</i>	

Numerical Experiments on Shock-Turbulence Interaction	55
<i>Sanjiva K. Lele</i>	

Getting Fundamental Molecular Properties from Shock Tubes	59
<i>E. Arunan</i>	

Part II: Blast Waves

Numerical Analysis of Weak-Shock Attenuation Resulting from Molecular Vibrational Relaxation	69
<i>K. Hatanaka, T. Saito</i>	

Numerical Investigations on Muzzle Flow under Approaching Real Shooting Conditions	75
<i>X. Jiang, H. Li, Z. Guo, Y. Wang, Z. Chen</i>	

The Influence of Water Saturation in Soil on Blast Effect	81
<i>Itzhak Kuchuk-Katalan, Zvika Asaf, Eylam Ran, Dimitry Naroditsky, Felix Aizik</i>	

Blast Waves from Cylindrical Charges	87
<i>Clare Knock, Nigel Davies</i>	

Blast Wave Attenuation by Dry Aqueous Foams	93
<i>E. Del Prete, L. Domergue, J.-F. Haas, A. Chinnayya, A. Hadjadj</i>	

High Energy Concentration by Symmetric Shock Focusing	99
<i>N. Apazidis, M. Kjellander, N. Tillmark</i>	

A Novel Experimental System for Blast Structure Interaction Research	105
<i>O. Ram, B. Ostraich, O. Sadot</i>	

Numerical Investigation of Shock-Wave Load Attenuation by Barriers	111
<i>S. Berger, O. Sadot, G. Ben-Dor</i>	

Part III: Chemically Reacting Flows

Influence of Electronic Excitation on Transport Properties of Partially Ionized Atomic Gases	119
<i>V.A. Istomin, E.V. Kustova</i>	

Shock Tube Investigation of Molecular Oxygen Dissociation at Temperatures of 4000 to 10800 K	125
<i>L.B. Ibraguimova, O.P. Shatalov, Yu.V. Tunik, I.E. Zabelinskii</i>	

A Numeric Study of the Effects of Turbulent Flow	131
<i>C. Needham, C. Watry</i>	

Reactions in $H_2+He+CH_4$ in Strong Shock Waves: A Review	139
<i>C. Park</i>	
Thermochemistry Modelling in an Open Space DSMC Code	145
<i>T.J. Scanlon, C. White, M. Schuebler, R.E. Brown, J.M. Reese</i>	
Hugoniot of a Reactive Metal Powder Mixture	153
<i>C.H. Braithwaite, D.J. Chapman, P.D. Church, P.J. Gould, D.M. Williamson</i>	
Prediction of Heatshield Material Performance in an Arcjet	159
<i>S. McDowell</i>	
Numerical Simulation of Thermal-Chemical Non-equilibrium and Radiating Hypersonic Flow	165
<i>Yibin Wang, Ning Qin, Xueqiang Liu</i>	
Computations of Radiation of High-Temperature Gases in Shock Layers	173
<i>Marie-Claude Druguet, Pascal Boubert</i>	
On the Validity of the Constant Volume Assumption in Shock Tube Experiments	179
<i>J. Melguizo-Gavilanes, L. Bauwens</i>	
Experimental Investigation of Interaction of Shock Heated Test Gases with $7.25\ \mu m$ Carbon Fibres in a Shock Tube	185
<i>V. Jayaram, Keshava Subba Rao, R. Ramesh Babu, K.P.J. Reddy</i>	
A Shock-Tube with High-Repetition-Rate Time-of-Flight Mass Spectrometry for the Study of Complex Reaction Systems	191
<i>M. Aghsaee, A. Abdali, S.H. Duerrstein, C. Schulz</i>	
Part IV: Dense Gases and Rarefied Flows	
A DSMC-MD Investigation of Wall Effects in a Shock Tube Operating at High Knudsen Numbers	199
<i>D.S. Watvisave, U.V. Bhandarkar, B.P. Puranik</i>	
Generation of Shock Wave by Temperature Change at Wall	205
<i>A. Sakurai, M. Tsukamoto</i>	
Numerical Simulations of Nonequilibrium and Diffusive Effects in Spherical Shock Waves	209
<i>V.V. Riabov</i>	

Numerical Study of Hypersonic Rarefied Flows about Leading Edges of Small Bluntness	215
<i>Ye.A. Bondar, A.A. Shershnev, A.N. Kudryavtsev, D.V. Khotyanovsky, S. Yonemura, M.S. Ivanov</i>	
High-Energy Molecular Beam Source Using a Non-diaphragm Type Small Shock Tube	221
<i>Y. Yoshimoto, R. Aoyagi, N. Miyoshi, I. Kinefuchi, S. Takagi, Y. Matsumoto</i>	
Propagating Wave in Binary Gas Mixture from Boundary of Variable Temperature and Velocity	229
<i>K. Yoshimura, S. Kuwabara</i>	
Flow Phenomena in Microscale Shock Tubes	235
<i>M. Brouillette, G. Giordano, G. Mirshekari, C. Hébert, J.-D. Parisse, P. Perrier</i>	
Part V: Detonation and Combustion	
Front Structure of Detonation and the Stability of Detonation	243
<i>H.-S. Dou, Z.M. Hu, B.C. Khoo, C. Wang</i>	
Expansion of the Detonation Products of a TATB Based High Explosive: Experimental Characterization by Photon Doppler Velocimetry and High-Speed Digital Shadowgraphy	251
<i>A. Sollier, V. Bouyer, L-P. Terzulli, M. Doucet, L. Decaris, P. Hébert</i>	
Gas Detonation Simulation in the Channel by Instant Heating of One Its Flat End for the Case of Real Chemical Reaction	259
<i>S. Kulikov, O. Ternovia</i>	
Interaction of Laser Pulse with Liquid Droplet	265
<i>K. Volkov, V. Emelyanov</i>	
Flame-Acoustic Interaction	273
<i>V.V. Golub, D.I. Baklanov, S.V. Golovastov, K.V. Ivanov, M.F. Ivanov, A.D. Kiverin, V.V. Volodin</i>	
Effects of Vortical and Entropic Forcing on Detonation Dynamics	281
<i>L. Massa, M. Chauhan, F.K. Lu</i>	
Initial Temperature Effect on Detonation Initiation of JP-8-Oxygen Mixtures	287
<i>C. Wen, K. Chung, W. Lai</i>	
Similarity Solutions for Reactive Shock Hydrodynamics	293
<i>Rajan Arora</i>	

Numerical Simulation on Detonation Formation by Shock/Flame Interaction	301
<i>C. Wang, Z.Z. Gu, R.L. Dong, L.T. Zhang, H.X. Jia, H.H. Shi</i>	
Experimental Investigation of Rupture Rate on Self-ignition of Pressurized Hydrogen Release	307
<i>S.V. Golovastov, V.V. Golub, D.I. Baklanov, V.M. Bocharnikov</i>	
Numerical Study of Gas Detonation at the Molecular Kinetic Level	313
<i>Ye.A. Bondar, K. Maruta, M.S. Ivanov</i>	
Numerical Simulation of Afterburning during Explosions	319
<i>Ekaterina Fedina, Christer Fureby</i>	
Shock-Flame Interaction and Deflagration-to-Detonation Transition in Hydrogen/Oxygen Mixtures	325
<i>A.D. Kiverin, M.F. Ivanov, M.A. Liberman</i>	
Deflagration-to-Detonation Transition in Highly Reactive Combustible Mixtures	331
<i>M.A. Liberman, M.F. Ivanov, A.D. Kiverin, M.S. Kuznetsov, A.A. Chukalovsky, T.V. Rakhimova</i>	
Hydrogen-Oxygen Flame Acceleration in Channels of Different Widths with No-Slip Walls and the Deflagration-to-Detonation Transition	337
<i>M.F. Ivanov, A.D. Kiverin, M.A. Liberman</i>	
Characterization of Soot Particles Produced from the Combustion of Hydrocarbon Fuels in a Shock-Tube	343
<i>Brian Hogan, Alexei Khalizov, Eric Petersen, Renyi Zhang</i>	
Evolution of Autocorrelation in Detonation Interaction with Homogeneous, Isotropic Turbulence	349
<i>F.K. Lu, M. Chauhan, L. Massa</i>	
Combined Effects of Vortex Flow and the Shchelkin Spiral Dimensions on Characteristics of Deflagration-to-Detonation Transition	355
<i>K. Asato, T. Miyasaka, Y. Watanabe, K. Tanabashi</i>	
Fast Flame Propagation and Ignition Process of DDT in the Boundary Layer of H₂/O₂ Mixture	361
<i>E. Dzieminska, M. Fukuda, A.K. Hayashi, N. Tsuboi, E. Yamada</i>	
Effect of Wave Flow Structure on Combustion at High Speeds	367
<i>M.A. Goldfeld, I.A. Bedarev, N.N. Fedorova</i>	

The Effect Analysis of Flow Jam on Two-Meter Direct-Connection Firebox Model	373
<i>Xiang-dong Li, Wei Jiao, Xiong-bing Mao, Han-chen Bai</i>	
Flame Propagation Out from Wide Chamber into Narrow Channel of Subcritical Diameter and Transition to Detonation	379
<i>K.V. Ivanov, D.I. Baklanov, V.V. Golub, M.F. Ivanov, A.D. Kiverin, M.S. Krivokorotov</i>	
Numerical Study of Detonation Wave Propagation in Narrow Channels	385
<i>Ashwin Chinnayya, Abdellah Hadjadj</i>	
Detonation Initiation by Moving Borders	391
<i>V.A. Levin, I.S. Manuylovich, V.V. Markov</i>	
Detonation in Supersonic Flows in Channels with Obstacles	397
<i>V.A. Levin, I.S. Manuylovich, V.V. Markov</i>	
Application of Gas Detonation for a Needleless Device Development	403
<i>M. Krivokorotov, D. Baklanov, V. Golub, K. Ivanov</i>	
Stability of Planar ZND Detonation Waves for Three-Step Chain-Branching Kinetics	409
<i>M. Lopez-Aoyagi, J. Melguizo-Gavilanes, L. Bauwens</i>	
A Theoretical Approach to One-Dimensional Detonation Instability	415
<i>Chun Wang, Zonglin Jiang, Zhaoyuan Han</i>	
Experimental and Numerical Investigation of CH* and OH* Chemiluminescence in Acetylene Combustion behind Reflected Shock Waves	421
<i>M. Bozkurt, M. Fikri, C. Schulz</i>	
Development of an Ethanol/Air Reduced Mechanism and Its Application to Two-Phase Detonation	427
<i>T. Shimada, M. Koshi, Y. Tatsumi, A.K. Hayashi, E. Yamada, N. Tsuboi</i>	
Simulations of Non-ideal Detonation Wave Propagation and Its Experimental Validation	433
<i>Xu Zhang, Duowang Tan, Yan Gu</i>	
Part VI: Diagnostics	
Cross-Wavelet Techniques for Estimating Uncertainty in Propagating Shocks and Detonations	443
<i>F.K. Lu, A.A. Ortiz</i>	

Multi-species Laser Measurements of n-Butanol Pyrolysis behind Reflected Shock Waves 451
Robert D. Cook, Ritobrata Sur, Ivo Stranic, David F. Davidson, Ronald K. Hanson

Extended Shock-Tunnel Operation for Aeroballistics Free-Flight Testing 457
F. Seiler, M. Bastide, J. Srulijes, J.-L. Striby, P. Wey

Quantitative Visualization of Open-Air Explosions by Using Background-Oriented Schlieren with Natural Background 465
Toshiharu Mizukaki, Hirotaka Tsukada, Kunihiro Wakabayashi, Tomoharu Matsumura, Yoshio Nakayama

Experimental Investigation of Aerodynamic Interference Heat Transfer Around a Protuberance on a Flat Plate Subjected to Hypersonic Flow 471
C.S. Kumar, K.P.J. Reddy

Surface Flow Visualization of a Side-Mounted NACA 0012 Airfoil in a Transonic Ludwig Tube 477
F.K. Lu, E.M. Braun, T.S. Balcazar

Measurement of Vibrational/Rotational Temperatures of Nitrogen behind Strong Shock Wave Generated at Hypervelocities Using CARS Method 483
V. Hima Bindu, Kotaro Sakurai, Shota Niinomi, Masashi Oguro, Masanori Ota, Kazuo Maeno

Photoemission Measurements of Soot Temperature at Pyrolysis of Ethylene in the Shock Tube 489
Y. Baranyshyn, O. Penyazkov, S. Fisenko, K. Kasparov, L. Belaziorava

Modern Optical Methods for Determining the Shock Hugoniot of Transparent Solids 497
F.R. Svingala, M.J. Hargather, G.S. Settles

Radiometric Temperature Analysis of the Hayabusa Spacecraft Re-entry 503
T.N. Eichmann, R. Khan, T.J. McIntyre, C. Jacobs, H. Porat, D. Buttsworth, B. Upcroft

Toluene Laser-Induced Fluorescence (LIF) Imaging of Supersonic Flow within a Diverging Duct 509
K. Mohri, A. Wohler, B. Weigand, C. Schulz

Part VII: Facilities

A Second-Generation Aerosol Shock Tube and Its Use in Studying Ignition Delay Times of Large Biodiesel Surrogates	517
<i>M.F. Campbell, D.F. Davidson, R.K. Hanson</i>	
Numerical Study of the Shock Tunnel Flow with a Throat Plug	523
<i>J.K. Lee, C. Park, O.J. Kwon</i>	
Propagation Characteristics of the Shock Wave in Small Diameter Tubes at Atmospheric Initial Driven Pressure	529
<i>S. Udagawa, M. Ota, K. Maeno</i>	
A New Fast Acting Valve for Diaphragmless Shock Tubes	535
<i>K.A. Heufer, H. Olivier, S. Drumm, H. Murrenhoff</i>	
Modeling of a Detonation Driven, Linear Electric Generator Facility ...	541
<i>E.M. Braun, E. Baydar, F.K. Lu</i>	
Flow Characterization of the T3 Hypersonic Shock Tunnel	547
<i>D. Romanelli Pinto, T.V.C. Marcos, V.A.B. Galvão, A.C. Oliveira, J.B. Chanes Jr., M.A.S. Minucci, P.G.P. Toro</i>	
Demonstration of Some Concepts for Developing Long-Test Duration Shock Tunnels	555
<i>Z. Jiang, W. Zhao, H.R. Yu</i>	
Manually Operated Piston Driven Mini Shock Tube	561
<i>K.P.J. Reddy</i>	

Part VIII: Flow Visualisation

Visualizing the Supersonic Flow around a Microvortex Generator	569
<i>F.K. Lu, A.P. Pierce, P.J. Gonzalez, Y. Shih</i>	
Time-Resolved Mach-Zehnder Interferometry of Shock Waves	577
<i>H. Kleine, H. Olivier, K. Tsuji, K. Etoh, K. Takehara, T.G. Etoh</i>	
Study of Normal Shock Behavior Near Second Throat	585
<i>Abhishek K. Pateria, T.M. Muruganandam</i>	
Fine Structures of Supersonic Laminar Flow over a Backward Facing Step at $Ma=3.0, 3.8$	591
<i>Chen Zhi, Yi Shihe, Tian Lifeng, He Lin, Zhu Yangzhu</i>	
A Temperature-Cancellation Method for Motion-Capturing PSP System and Its Application to a Hypersonic Wind Tunnel	599
<i>T. Okabe, T. Miyazaki, H. Sakaue</i>	

Development of Polymer-Ceramic Pressure-Sensitive Paint and Its Application to Supersonic Flow Field	607
<i>T. Hayashi, H. Ishikawa, H. Sakaue</i>	
Potential of Localized Flow Heating for Wave Drag Reduction	615
<i>E. Schülein, E. Bornhöft</i>	
Density Field Reconstructing in the Supersonic Wind Tunnel Using OCT Technology	623
<i>Guo Longde, Yang Jianjun, Wu Yungang, Xie Weiming</i>	
Experimental Exploration of an Underexpanded Supersonic Jet	629
<i>B. André, T. Castelain, C. Bailly</i>	
Application of NPLS Technique to Hypersonic Shock-Wave and Boundary Layer Interactions	635
<i>Ming Li, Shi-he Yi, Zhi-wei Zhu, Lin He</i>	
Quantitative Measurement and Reconstruction of 3D Density Field by CGBOS (Colored Grid Background Oriented Schlieren) Technique	641
<i>M. Ota, H. Kato, R. Sakamoto, K. Maeno</i>	
Application of Two Sections Focusing Schlieren Technique on the Supersonic Combustion Wind Tunnel	647
<i>Ai-min Xie, Jie Huang, Si-yuan Huang, Han-chen Bai, Qiang Song, Zhen-feng Wang, Lei Zheng</i>	
Quantitative Visualization of High Speed Flow through Optical Tomography	653
<i>Biswajit Medhi, G.M. Hegde, K.P.J. Reddy, D. Roy, R.M. Vasu</i>	
Flow Visualization of Discontinuities and Instabilities in Supersonic Flow	659
<i>Yuxin Zhao, Shihe Yi, Jianhan Liang</i>	
Part IX: Hypersonic Flow	
Separation Length Scaling in Hypervelocity Double Cone Air Flows	669
<i>A.B. Swantek, J.M. Austin</i>	
Experimental Investigation of Mechanical Distortions to Hypersonic Boundary Layers	675
<i>W. Flaherty, J.M. Austin</i>	
On the Stability of Pitching Motion of Reentry Vehicle with the Tilted Toroidal Ballute	681
<i>Hiroataka Otsu, Yoshiki Takama</i>	

Numerical Studies of Hypersonic Binary Gas-Mixture Flows Near a Sphere	687
<i>V.V. Riabov</i>	
An Investigation of Base Flow of a Circular Cylinder at Hypersonic Speeds	693
<i>Gisu Park, Sudhir L. Gai, Andrew J. Neely</i>	
On the Numerical Solution Method of the 2D Oswatitsch Equations for Hypersonic Flow	701
<i>V. Lorenz, Ch. Mundt</i>	
Modeling the Complete Operation of a Free-Piston Shock Tunnel for a Low Enthalpy Condition	707
<i>Matthew McGilvray, Andrew G. Dann, Peter A. Jacobs</i>	
Shock Tube Experiments on Heat Transfer at Generic Re-entry Bodies	713
<i>J. Srulijes, R. Hruschka, F. Seiler, B. Sauerwein, M. Bastide-Luquet, K.J. Dahlem</i>	
On the Validation of a Hypersonic Flow Solver Using Measurements of Shock Detachment Distance	721
<i>Rowan J. Gollan, Peter A. Jacobs</i>	
Surrogate-Based Multi-objective Aerothermodynamic Design Optimization of Hypersonic Spiked Bodies	727
<i>M.Y.M. Ahmed, Ning Qin</i>	
Effect of Gas Injection on Transition in Hypervelocity Boundary Layers	735
<i>J.S. Jewell, I.A. Leyva, N.J. Parziale, J.E. Shepherd</i>	
Counterflow Injection Studies for Hypersonic Flow Fields	741
<i>Chandra Shekhar Pant, Atreyo Choudry, Vinayak Kulkarni</i>	
Shock Tunnel Noise Measurement with Resonantly Enhanced Focused Schlieren Deflectometry	747
<i>N.J. Parziale, J.S. Jewell, J.E. Shepherd, H.G. Hornung</i>	
Numerical Simulation and Experimental Validation of Shock Oscillations in Hypersonic Vehicle's Flowpath	753
<i>Guo Shanguang, Liu Jun, Huang Wei, Jin Liang, Luo Shibin</i>	
Application of Pressure- and Temperature-Sensitive Paint in a Hypersonic Double Ramp Flow	759
<i>L. Yang, E. Erdem, K. Kontis</i>	

Part X: Ignition

Laser-Based Ignition of the Preheated Supersonic Hydrogen-Air Flow 769
V.A. Pavlov, O.P. Shatalov, Yu.V. Tunik

Measurement of H₂O₂ Broadening Parameters near 7.8 μm with a Shock Tube 777
Christopher J. Aul, Mark W. Crofton, John D. Mertens, Eric L. Petersen

Shock-Wave Induced Ignition of Normal Undecane (n-C₁₁H₂₄) and Comparison to Other High-Molecular-Weight n-Alkanes 783
Brandon Rotavera, Eric L. Petersen

Surface Chemical Reaction of Laser Ablated Aluminum Sample for Detonation Initiation 789
Chang-hwan Kim, Jack J. Yoh

Part XI: Impact and Compaction

Propagation of Luminous Front at High-Speed Impact into Sand Layers 797
Hiroaki Yamamoto, Kazuyoshi Takayama, Shoukichi Hayasaka

Multiscale Modeling and Simulation of Shock-Wave Impact Failure in Hard and Soft Matter 803
Martin O. Steinhauser, Georg C. Ganzenmüller, Stefan Hiermaier

High-Velocity Impact Characteristic of CFRP Composite at Low Temperature 809
A. Shimamoto, R. Kubota, K. Takayama

Tunguska Impact: How Far Can We Move Up in Our Prediction of the Past? 815
C. Sandaldjian, S.V. Utyuzhnikov

Author Index 821
