

CONTENTS

List of Tables	ix
 Part I: Introducing the Subject	
1. Introduction	3
1.1. Voter behavior and economics	3
1.2. An outline of the book	6
2. Existing Studies in the Field	9
2.1. Introduction	9
2.2. Economic analyses of voter behavior	9
2.3. Median voter models	21
2.4. Conclusions	24
 Part II: Empirical Models Applied to the Netherlands	
3. An Empirical Analysis of Voter Turnout in the Netherlands	29
3.1. Introduction	29
3.2. Survey of the literature	29
3.3. Data and selection of variables	33
3.4. Multivariate analysis	37
3.5. Some special topics	47
3.5.1 A comparison of the voting behavior of partners	47
3.5.2 National versus local elections	50
3.6. Concluding remarks	51
Appendix 3A	53
Appendix 3B	58
4. An Empirical Analysis of Party Choice in the Netherlands	62
4.1. Introduction	62
4.2. The model	63
4.3. Characteristics of Dutch parties and expected effects of variables	65
4.3.1 Dutch party characteristics	65
4.3.2 Expected effects of the variables distinguished	67

vi Contents

4.4. Data and first results	77
4.4.1 The data	78
4.4.2 The sequential decision voter	79
4.4.3 Former party choice	85
4.5. The sequential versus the simultaneous decision voter	87
4.5.1 The simultaneous decision voter	87
4.5.2 The sequential versus the simultaneous decision model: a test	91
4.6. Some implications	94
4.6.1 The 'left-right' scale	94
4.6.2 Marginal effects	95
4.7. Concluding discussion	97
Appendix 4A	101
Appendix 4B	102
Appendix 4C	106

Part III: A Behavioral Model of Party Choice and the Demand for Public Goods

5. A Behavioral Model of Party Choice	113
5.1. Introduction	113
5.2. The model	115
5.2.1 Individual versus group interests	115
5.2.2 Party choice	117
5.2.3 The reduced form equations	123
5.3. A comparison with existing models	126
5.3.1 Economic models: popularity functions	126
5.3.2 Other economic models	131
5.3.3 Spatial models of voting behavior	133
5.4. Concluding remarks	135
Appendix 5A	137
6. Empirical Applications: the Demand for Public Goods	141
6.1. Introduction	141
6.2. An empirical application to the Netherlands	143
6.2.1 The equations to be estimated	143

6.2.2 The empirical results	146
6.3. An empirical application to Great Britain	151
6.3.1 The equations to be estimated	151
6.3.2 The results for workers	153
6.3.3 Other groups	161
6.3.4 Original parameters	164
6.4. Concluding remarks	165
Appendix 6A	167
7. Expressed Preferences for Public Goods	169
7.1. Introduction	169
7.2. The survey method	170
7.3. Two surveys applied	173
7.3.1 The SCP-survey	174
7.3.2 The Amsterdam-survey	179
7.4. Conclusions	182
Part IV: The Calculus of Voting	
8. Voter Turnout and Social Pressure	187
8.1. Introduction	187
8.2. Optimal group behavior	190
8.3. Individual turnout I: producers of social pressure	197
8.4. Individual turnout II: consumers of social pressure	205
8.5. Concluding discussion	212
Appendix 8A	215
Appendix 8B	215
Appendix 8C	215
Appendix 8D	217
9. Some Implications of the Turnout Model	218
9.1. Introduction	218
9.2. Equilibrium analysis	218
9.3. Winner-takes-all elections	223
9.4. Empirics	225
9.4.1 Party or election specific variables	226

viii Contents

9.4.2 Socio-economic variables	226
9.5. Conclusion	229
Appendix 9A	231
Appendix 9B	232
Appendix 9C	232
 Epilogue	
10. Summary and Evaluation	237
10.1. Introduction	237
10.2. Summary	237
10.2.1 General summary of the book	237
10.2.2 Summary of Part II	238
10.2.3 Summary of Part III	239
10.2.4 Summary of Part IV	241
10.3. Evaluation	242
10.3.1 The importance of the group-framework	242
10.3.2 Voter turnout and party choice	243
10.3.3 The economic perspective	244
