

# Contents

<b>Part I: Theoretical Background</b>	<b>1</b>
<b>Chapter 1 Historical Background of Quantitative Pathology</b>	<b>3</b>
References	5
<b>Chapter 2 The Case for Quantitative Pathology in Cancer Diagnosis and Treatment</b>	<b>7</b>
2.1 Introduction	7
2.2 The Multicentre Ovarian Tumour Study	7
2.3 Lack of Diagnostic Agreement: A General Phenomenon	12
2.4 Lack of Reproducibility: Special Types of Lesions	13
2.5 Concluding Remarks	15
References	15
<b>Chapter 3 Diagnosis: Error Sources</b>	<b>19</b>
3.1 The Problem	19
3.2 The Diagnostic Process	19
3.3 Morphological Facts	20
3.4 Stages in the Analytical Diagnostic Process	22
3.5 Neuroscience and Comparative Cognition	23
3.6 Error Sources in Diagnosis	23
3.7 Psychological Consequences	26
3.8 Conclusions	26
References	26
<b>Chapter 4 Structural Morphology and the Need for Selection in Quantitative Pathology</b>	<b>28</b>
4.1 Introduction	28
4.2 Selection: The Cornerstone of Diagnostic Pathology	28
4.3 The Structural Model	30
References	32

<b>Chapter 5</b>	<b>Malignancy of Tumours, Host Factors, and Quantitative Pathology</b>	<b>33</b>
5.1	Prognostic Factors	33
5.2	Malignancy Criteria and Prognosis	33
5.3	Measurement of Malignancy: Quantitative Pathological Correlates	34
5.4	Forces Interacting with Malignancy	35
5.5	Influence of Cancer Therapy	38
	References	39
<b>Part II:</b>	<b>Techniques and Equipment</b>	<b>43</b>
<b>Chapter 6</b>	<b>Techniques in Quantitative Pathology</b>	<b>45</b>
6.1	Introduction	45
6.2	Morphometry and Planimetry	45
6.3	Measurements in Tissue Sections: Dimension Reduction	46
6.4	Stereology	47
6.5	Definitions and Scope of Morphometry, Planimetry, Stereology, and Cytometry	52
6.6	Image and Flow Cytometry	53
6.7	Laser Scanning Microscopy	54
6.8	Artificial Intelligence	55
6.9	Biometry	55
	References	55
<b>Chapter 7</b>	<b>Equipment for Quantitative Cell and Tissue Analysis</b>	<b>57</b>
7.1	General Information	57
7.2	Description of Equipment	58
7.3	Point-Counting Equipment for Stereology	58
7.4	Graphics Versus Digital Image Processing	60
7.5	Digitizing Interactive (Graphic Tablet) Systems for Morphometry	60
7.6	Interactive or Automated Image Analysis?	62
7.7	Points to be Considered in the Purchase of a System	62
7.8	Video Overlay or Drawing Tube?	64
7.9	Conclusions	65
7.10	Image and Flow Cytometers	65
7.11	Mechanical Scanning Cytometers	65
7.12	TV and Other Electron Image Sensor Scanners	66
7.13	Small Computer Digital Image Analysis	67
7.14	Purchasing a Small Computer System	70

7.15	Flow Cytophotometers . . . . .	71
7.16	Comparison of Image and Flow Cytometers . . . . .	73
	References . . . . .	75
<b>Chapter 8</b>	<b>An Introduction to Image Processing . . . . .</b>	<b>77</b>
8.1	Introduction . . . . .	77
8.2	Overview . . . . .	77
8.3	Pixels and Images . . . . .	79
8.4	Operations . . . . .	82
8.5	Image Measurement . . . . .	92
8.6	Examples of Image Processing . . . . .	96
8.7	Concluding Remarks . . . . .	102
	References . . . . .	102
<b>Chapter 9</b>	<b>Computational Support for Image Analysis in Histopathology . . . . .</b>	<b>105</b>
9.1	Introduction . . . . .	105
9.2	Computer Architecture, Information, and Data Flow . . . . .	106
9.3	Information Extraction and Dependence Structure of the Data . . . . .	107
9.4	Different Processor Configurations: Multiprocessor Systems . . . . .	108
9.5	The Tucson Multiprocessor Project . . . . .	109
9.6	Closing Remarks . . . . .	111
	References . . . . .	112
<b>Chapter 10</b>	<b>Laser Scanning Microscopy . . . . .</b>	<b>113</b>
10.1	Advantages of Laser Scanning Microscopes . . . . .	113
10.2	The Ultrafast Laser Scanning Microscope . . . . .	114
10.3	Confocal Laser Scanning Microscopy . . . . .	120
	References . . . . .	131
<b>Chapter 11</b>	<b>Three-Dimensional Reconstruction Techniques . . . . .</b>	<b>134</b>
11.1	Introduction . . . . .	134
11.2	What Has Been Done . . . . .	134
11.3	Practical Aspects . . . . .	136
11.4	Hidden Line Removal . . . . .	139
11.5	3D Solid Reconstruction . . . . .	140
11.6	Voxel-Based Systems . . . . .	146
11.7	Equipment . . . . .	147
11.8	Conclusion . . . . .	148
	References . . . . .	148

<b>Chapter 12 Reliability of Quantitative Pathological Assessments, Standards, and Quality Control</b>	151
12.1 Introduction	151
12.2 Error Terminology	151
12.3 Potential Influences: General Remarks	153
12.4 Morphometry by Digitizing Tablet:	
Measurement of Nuclei	155
12.5 Stereology	167
12.6 DNA Cytometry	173
12.7 Quantitative Nuclear Chromatin Features	177
References	178
<b>Chapter 13 Videophotometry: Sources of Error</b>	182
13.1 Introduction	182
13.2 System Resolution and Modulation Transfer Function	182
13.3 High-Dry Objectives in Microphotometry	184
13.4 Mounting of the Video Camera	185
13.5 Aperture Stop	185
13.6 Schwarzschild-Villiger Effect	186
13.7 Automatic Gain Control in the Video-Camera	187
13.8 Other Measuring Errors: Background Correction	187
References	188
<b>Chapter 14 Classification and Prognosis for New Cases:</b>	
<b>    Some Aspects of Univariate and Multivariate Analysis</b>	189
14.1 Introduction	189
14.2 Classification or Diagnostic Problems	189
14.3 Prognostic Problems	202
14.4 Classification Problems Versus Prognostic Problems	205
14.5 Statistical Software Packages on PCs	206
References	207
<b>Part III: Applications</b>	211
<b>Chapter 15 Image Cytometric Nuclear DNA Analysis</b>	
<b>    in Clinical Tumour Material</b>	213
15.1 Introduction	213
15.2 Preparation of Specimens	214
15.3 DNA Staining	215
15.4 Instrumentation	216
15.5 Interpretation of DNA Results	217
15.6 Mammary Carcinoma	218

15.7	Prostatic Carcinoma . . . . .	220
15.8	Endometrial Carcinoma . . . . .	222
15.9	Ovarian Carcinoma . . . . .	224
15.10	Thyroid Carcinoma . . . . .	226
15.11	Rectal Carcinoma . . . . .	229
15.12	Conclusions . . . . .	230
	References . . . . .	231
<b>Chapter 16</b>	<b>Nuclear Image Cytometry: Quantitation of Chromatin Pattern, Steroid Receptor Content, and Ki-67 . . . . .</b>	<b>233</b>
16.1	Quantitation of Chromatin Pattern . . . . .	233
16.2	Oestrogen Receptor Content and Ki-67 with Monoclonal Antibodies . . . . .	239
	References . . . . .	241
<b>Chapter 17</b>	<b>Flow Cytometric Analysis in Quantitative Pathology . . . . .</b>	<b>244</b>
17.1	Introduction . . . . .	244
17.2	Flow Cytometry (FCM) . . . . .	244
17.3	Principles of FCM . . . . .	245
17.4	Sample Preparation and Staining . . . . .	246
17.5	Analysis of Cellular DNA Content of Fresh Tumour Specimens . . . . .	246
17.6	Paraffin-Embedded Tumour Tissue . . . . .	247
17.7	Definitions and Nomenclature . . . . .	249
17.8	Limitations of FCM Analysis of Cellular DNA Content . . . . .	250
17.9	Aneuploidy in Human Tumours . . . . .	253
17.10	Conclusions . . . . .	263
	References . . . . .	263
<b>Chapter 18</b>	<b>Morphometric and Combined Morphometric-DNA Cytometric Applications . . . . .</b>	<b>269</b>
18.1	General Introduction . . . . .	269
18.2	The Heart and Blood Vessels . . . . .	269
	References . . . . .	271
18.3	The Respiratory System . . . . .	273
	References . . . . .	278
18.4	Head and Neck . . . . .	280
	References . . . . .	287
18.5	The Gastrointestinal Tract . . . . .	288
	References . . . . .	300
18.6	The Urinary Tract and Male Reproductive System . . . . .	304
	References . . . . .	323

18.7	The Female Reproductive Tract	327
	References	352
18.8	Breast Cancer	356
	References	363
18.9	The Bone Marrow and Lymphoid Organs	365
	References	401
18.10	The Endocrine System	410
	References	416
18.11	The Skin	418
	References	422
18.12	The Skeletal System and Soft Tissues	423
	References	433
18.13	The Nervous System	434
	References	445
18.14	The Eye	448
	References	449
<b>Part IV:</b>	<b>Artificial Intelligence</b>	<b>451</b>
	<b>General Introduction</b>	
	<b>to Artificial Intelligence Systems Applications</b>	<b>453</b>
<b>Chapter 19</b>	<b>Expert Systems in the Histological and Cytological Diagnosis of Cancer</b>	<b>455</b>
19.1	General Introduction	455
19.2	Expert Systems	455
	References	469
<b>Chapter 20</b>	<b>Reasoning in Uncertainties: Five Strategies</b>	<b>470</b>
20.1	Introduction	470
20.2	Analysis	471
20.3	Conclusions	475
	Appendix: Definitions and Combinatorics	477
