Review Lectures

Principles and Recent Advances in DNA Fingerprinting
A.J. Jeffreys, N.J. Royle, I. Patel, J.A.L. Armour, A. MacLeod,
A. Collick, I.C. Gray, R. Neumann, M. Gibbs, M. Crosier, M. Hill,
E. Signer, and D. Monckton 3

DNA Fingerprinting as a Tool of Paternity Testing in Germany
C. Rittner, U. Schacker, and P.M. Schneider 20

Genetic Typing of Biological Evidence
Using the Polymerase Chain Reaction
G.F. Sensabaugh 33

A Critical Review of the Forensic Application of DNA Technology
B. Brinkmann, P. Wiegand, and S. Rand 41

DNA Methylation: A Defense Mechanism
Against the Expression of Foreign DNA?
W. Doerfler 50

Juristische Aspekte der forensischen DNA-Analyse
G. Kohlmann 59

PCR-Technology

Research Regarding the Polymerase Chain Reaction
for Forensic Utility — HLA-DQ α Locus and AMP-FLPs
B. Budowle, C.T. Comey, J.M. Jung, and A.M. Giusti 71

DNA Typing Using PCR Amplified Fragments
in the HLA Class I Region
J. Holtz, K. Schönborn-Sobolewski, and S. Urmetz 79

PCR-Typing of the Human HLA-DQ α Locus:
Population Genetics and Application in Forensic Casework
P.M. Schneider, A. Veit, and C. Rittner 85

DNA Amplification (PCR) of Several Hypervariable Loci in Disputed Paternity Cases

E. Trabetti, D. De Leo, P. Gasparini, P.F. Pignatti, and M. Marigo 92

Amplification of a Highly Polymorphic VNTR Segment, Localized on the Ha-Ras Gene by PCR

H. Haas, M. Prinz, M. Staak, and G. Berghaus 96

Methodology, Data Bases

Reliability of Restriction Enzyme Digestions of Genomic DNA for the Generation of DNA Fingerprints

U. Schacker, T. Kaufmann, P.M. Schneider, and C. Rittner 103

Concept for a More Precise Definition of the Polymorphism YNH24

C. Puers, S. Rand, and B. Brinkmann 109

Evaluation of Variable Number of Tandem Repeat (VNTR) Alleles in Mother-Child Combinations

G. Holmlund, and B. Lindblom 116

A Proposed Combination of Single Locus Probes for Multiple Rehybridization

P. Wiegand, S. Rand, and B. Brinkmann 121

DNA-Profiles with HVR-Probes — Allele Frequencies of HinfI-RFLPs Using pHINS310, pMUC7 and pMR24/1 in a Population Sample from Hannover and Lower Saxony

T. Rothämel, W. Keil, and H.D. Tröger 128

Analysis of Allele Frequencies of Two Polymorphic Loci in a North-East Italian Population

P. Fattorini, A.P. Callegaro, F. Florian, D. Fabbro, T. Frisan,
B.M. Altamura, and G. Graziosi 134

Digoxigenin-DNA Probes for Detecting Human VNTR Polymorphism

N. Dimo-Simonin, C. Brandt-Casadevall, and H.-R. Gujer 141

Practical Use: Paternity

The Application of Four Single Locus Probes in Cases of Disputed Paternity

J.A. Thompson, P.J. Lincoln, C.P. Phillips, D. Syndercombe Court,
and P.H. Watts 147

The Practical Significance of Human Genetic RFLP-Systems in Paternity Testing

D. Krause, R. Szibor, W. Kuchheuser, and R. Brückner 153

Individual Diagnostics by DNA Fingerprinting

M. Rose, L. Roewer, O. Prokop, and G. Geserick 157

Paternity Analysis in a Deficient Family by DNA Profiling (Single-Locus and Multi-Locus Probes)

E. Iten and R. Pflugshaupt 160

Paternity Tests in 10—12 Weeks Old Fetuses by Mean of Single-Locus-DNA-Polymorphisms

L. Henke, G. Hummelsheim, and J. Henke 165

DNA Fingerprinting for the Protection of Endangered Species

J. Máthé, R. Wolfes, and A. Seitz 170

Practical Use: Stain Analysis

Treatment of Bloodstains for Simultaneous Application of Serological and DNA Typing Methods

M. Prinz, T. Ohshima, M. Staak, and G. Berghaus 175

DNA Extraction and RFLP Analysis of Bloodstains on a Variety of Textiles — Investigation of Various Extraction Procedures

R. Scheithauer, and H.-J. Weisser 181

Stability of DNA in Brain Cortex After Long Post Mortem Periods

B. Ludes, P. Mangin, and A.J. Chaumont 187

The Identification of a Charred Body by Oligonucleotide Fingerprinting with the (GTG)₅ Probe

H. Pöche, G. Wrobel, V. Schneider, and J.T. Epplen 192

Biostatistics

Biostatistical Evaluation of Evidence from Single Locus Hypervariable DNA Probes: Tests of Independence of Loci

J.W. Morris and C.H. Brenner 199

MLP and SLP Band Patterns and Probabilities of Identity

K. Hummel and N. Fukshansky 203

Efficiency of Multilocus Probes in Mother-Child-Putative Father Cases N. Fukshansky and K. Hummel	208
The Proposal of Evett et al. for Paternity Calculations in Normal Trio Cases Using MLP Profiles and the Freiburg Model of a Multiple Diallelism: A Comparison K. Hummel and N. Fukshansky	212
A Contribution to the Computer-Aided Analysis of DNA Fingerprint Patterns A. Kelch, H.-P. Kinzl, K. Trommler, and U. Ziegler	221
