

Contents

1. Principles of NMR	1
1.1 The Basic Principle of Magnetic Resonance	2
1.1.1 Magnetic Moment and Nuclear Spin	2
1.1.2 Resonance Condition	3
1.1.3 Bloch Equations	6
1.1.4 Spin-Lattice Relaxation	10
1.1.5 Decay of the Transverse Magnetization and Spin-Spin Relaxation	11
1.2 The NMR Spectrum	14
1.2.1 Chemical Shift	15
1.2.2 Dipole-Dipole Coupling	15
1.2.3 Indirect Spin-Spin Coupling	16
1.2.4 Nucleus-Electron Interaction	19
1.2.5 Nuclear Quadrupole Interaction	20
1.3 Relaxation Mechanisms	21
1.3.1 Transverse Relaxation and Line Width	22
1.3.2 Time-Dependence of Interactions	23
1.3.3 Dipolar Relaxation	23
1.3.4 Relaxation by Chemical Shift Anisotropy	24
1.3.5 Relaxation by Indirect Spin-Spin Coupling	24
1.3.6 Quadrupolar Relaxation	25
1.3.7 Paramagnetic Relaxation	26
1.4 Experimental Methods	26
1.4.1 Continuous-Wave Detection of NMR	27
1.4.2 Pulsed NMR	28
1.4.3 The NMR Spectrometer	33
2. NMR Spectroscopy in Biochemistry	37
2.1 NMR as Analytical Method	38
2.1.1 Identification of Known and Unknown Substances	39
2.1.2 The Internal and External Reference	41
2.1.3 Multiplet Structure	43
2.1.4 Structure Dependence of the <i>J</i> -Coupling	46
2.1.5 Identification of Coupling Partners	46
2.1.6 Determination of Concentrations by NMR	48
2.1.7 Suppression of Strong Solvent Signals	50

2.2	Time-Dependent Processes in NMR	51
2.2.1	Correlation Time and Spectral Density	53
2.2.2	Chemical Exchange	54
2.2.3	pH-Dependence of the Chemical Shift	57
2.2.4	Formation of Complexes with Diamagnetic Ligands ..	59
2.2.5	Saturation Transfer	60
2.2.6	Nuclear Overhauser Effect	61
2.2.7	Labelling with Stable Isotopes	65
2.3	Two-Dimensional NMR Spectroscopy	67
2.3.1	The Two-Dimensional NMR Experiment	68
2.3.2	Interpretation of Homonuclear <i>J</i> -Coupling Patterns ..	71
2.3.3	Measurement of the Nuclear Overhauser Effect and Chemical Exchange	73
2.3.4	Correlation of Heteronuclear Resonances	73
3.	NMR Spectroscopy of Biological Macromolecules	75
3.1	NMR Spectroscopy of Proteins	75
3.1.1	Composition and Structure of Proteins	76
3.1.2	Dynamical Processes in Proteins	80
3.1.3	Determination of Interatomic Distances	92
3.1.4	Assignment of Resonance Lines	104
3.1.5	Pattern Recognition in Two-Dimensional NMR Spectra	111
3.1.6	Structure Determination from NMR Data	113
3.1.7	Solid State NMR of Proteins	118
3.2	NMR Spectroscopy of Nucleic Acids, Polysaccharides and Lipids	121
3.2.1	Composition and Structure of Nucleic Acids	121
3.2.2	NMR Investigations of Nucleic Acids and Nucleic Acid Protein Complexes	124
3.2.3	Composition and Structure of Polysaccharides	127
3.2.4	Structure Determination of Polysaccharides	129
3.2.5	Investigations of Biological Membranes	130
4.	NMR Tomography	135
4.1	Basic Principles of Imaging	135
4.1.1	Two-Dimensional Projection-Reconstruction	136
4.1.2	Two-Dimensional Fourier Imaging	137
4.1.3	Parameters of the NMR Tomogram	139
4.1.4	Methods for Reducing the Recording Time	142
4.1.5	Three-Dimensional Imaging	147
4.2	Some Applications of the Basic Experiments in NMR Tomography	149
4.2.1	Imaging of the Head	149
4.2.2	Imaging in Other Parts of the Body	153

4.3	Special Applications of NMR Tomography	159
4.3.1	Chemical Shift in Imaging	159
4.3.2	Flow Effects in NMR Tomography	161
4.3.3	Contrast Agents in NMR Tomography	166
4.3.4	NMR Microscopy	167
4.4	Biomedical Effects and Dangers of NMR	170
4.4.1	Biomedical Effects of the Static Magnetic Field	170
4.4.2	Biomedical Effects of Gradient Fields	171
4.4.3	Biomedical Effects of the Radio Frequency Field ...	171
5.	Spatial Selective Spectroscopy and In Vivo NMR	173
5.1	Methods for Spatial Selection	174
5.1.1	Spatial Resolution with Isolated Cells and Organelles	175
5.1.2	Spatial Selection with Space Dependent Radio Frequency Fields	176
5.1.3	Spatial Selection with a Space Dependent Statistic Magnetic Field B_0	179
5.2	Typical Applications and Problems of NMR Spectroscopy in Living Systems	181
5.2.1	Preservation of the Natural Functions	182
5.2.2	In Vivo ^1H -NMR Spectroscopy	183
5.2.3	In Vivo ^{31}P -NMR Spectroscopy	186
5.2.4	In Vivo ^{13}C -NMR Spectroscopy	194
5.2.5	In Vivo ^{15}N -NMR Spectroscopy	201
5.2.6	In Vivo ^{19}F -NMR Spectroscopy	201
5.2.7	In Vivo Spectroscopy with Other Nuclei	202
