

Contents

Part I General Concepts

Coarse Graining Revisited — The Case of Macroscopic Chaos By K. Tomita (With 8 Figures)	2
Gibbs Variational Principle and Fredholm Theory for One-Dimensional Maps By Y. Takahashi	14
Truncated Development of Chaotic Attractors in a Map when the Jacobian is not Small. By T. Short and J.A. Yorke (With 7 Figures)	23

Part II Fractals in Dynamical and Stochastic Systems

On the Dynamics of Iterated Maps VIII: The Map $z \rightarrow \lambda(z+1/z)$, from Linear to Planar Chaos, and the Measurement of Chaos By B.B. Mandelbrot (With 5 Figures)	32
Self-Similar Natural Boundaries of Non-Integrable Dynamical Systems in the Complex t Plane. By H. Yoshida (With 5 Figures)	42
Topological Phase Transitions. By M. Widom and S.J. Shenker (With 1 Figure)	46
Dynamical System Related to an Almost Periodic Schrödinger Equation By M. Kohmoto	52
Mean Field Hausdorff Dimensions of Diffusion-Limited and Related Aggregates By K. Kawasaki and M. Tokuyama (With 1 Figure)	56

Part III Onset of Chaos

Stability of the Scenarios Towards Chaos. By P. Coulet (With 6 Figures)	62
Functional Renormalization-Group Equations Approach to the Transition to Chaos. By B. Hu (With 2 Figures)	72
Collapse of Tori in Dissipative Mappings. By K. Kaneko (With 5 Figures)	83
Periodic Forcing Near Intermittency Threshold — Resonance and Collapse of Tori By H. Daido (With 5 Figures)	89
Perturbation Theory Analysis of Bifurcations in a Three-Dimensional Differential System. By T. Shimizu (With 2 Figures)	95

IX

<hr/>	
Part IV One-Dimensional Mappings	
<hr/>	
Noise-Induced Order — Complexity Theoretical Digression By I. Tsuda and K. Matsumoto (With 5 Figures)	102
Symbolic Dynamics Approach to Intermittent Chaos — Towards the Comprehension of Large Scale Self-Similarity and Asymptotic Non-Stationarity By Y. Aizawa and T. Kohyama (With 4 Figures)	109
Diffusion and Generation of Non-Gaussianity in Chaotic Discrete Dynamics By H. Fujisaka (With 2 Figures)	117
Analytic Study of Power Spectra of Intermittent Chaos By B.C. So, H. Okamoto, and H. Mori (With 9 Figures)	123
<hr/>	
Part V Bifurcations and Normal Forms	
<hr/>	
Versal Deformation of Singularities and Its Applications to Strange Attractors. By S. Ushiki	130
Some Codimension-Two Bifurcations For Maps Leading to Chaos By G. Iooss (With 2 Figures)	136
Bifurcations in Doubly Diffusive Convection By E. Knobloch (With 12 Figures)	143
Strange Attractors in a System Described by Nonlinear Differential-Difference Equation. By Y. Ueda and H. Ohta (With 3 Figures)	161
Coupled Chaos. By T. Yamada and H. Fujisaka (With 3 Figures)	167
Bifurcations in 2D Area-Preserving Mappings By K.-C. Lee, S.Y. Kim, and D.-I. Choi	170
<hr/>	
Part VI Soliton Systems	
<hr/>	
Chaotic Behavior Induced by Spatially Inhomogeneous Structures such as Solitons. By M. Imada (With 6 Figures)	176
Chaotic Behaviour of Quasi Solitons in a Nonlinear Dispersive System By H. Nagashima (With 3 Figures)	181
<hr/>	
Part VII Fluid Dynamics	
<hr/>	
Inviscid Singularity and Relative Diffusion in Intermittent Turbulence By H. Mori and K. Takayoshi	188
Computational Synergetics and Innovation in Wave and Vortex Dynamics By N.J. Zabusky (With 4 Figures)	198
A Scalar Model of MHD Turbulence By A. Pouquet, C. Gloaguen, J. Leorat, and R. Grappin	206
The Analytic Structure of Turbulent Flows. By U. Frisch	211

Low Prandtl Number Fluids, a Paradigm for Dynamical System Studies By A. Libchaber (With 4 Figures)	221
Chaotic Attractors in Rayleigh-Benard Systems By M. Sano and Y. Sawada (With 7 Figures)	226
Onset of Chaos in Some Hydrodynamic Model Systems of Equations By H. Yahata (With 4 Figures)	232

Part VIII Chemical and Optical Systems

Instabilities and Chaos in a Chemical Reaction By H.L. Swinney, R.H. Simoyi, and J.C. Roux (With 2 Figures)	244
Optical Turbulence. By. K. Ikeda and O. Akimoto (With 5 Figures)	249

Part IX Anomalous Fluctuations

Scaling Theory of Relative Diffusion in Chaos and Turbulence By M. Suzuki (With 1 Figure)	260
1/f Resistance Fluctuations. By M. Nelkin	266
