

CONTENTS

Preface

Chapter 1. PRELIMINARIES	1
1. Topological groups	1
2. Vector spaces	16
3. Geometry of numbers	25
Chapter 2. EXOTIC GROUPS	45
4. Representations of abelian topological groups	45
5. Quotients of normed spaces	52
6. Quotients of non-nuclear spaces	60
Chapter 3. NUCLEAR GROUPS	72
7. Nuclear groups	72
8. Characters of nuclear groups	80
9. Nuclear vector groups	86
10. The Lévy-Steinitz theorem	93
Chapter 4. THE BOCHNER THEOREM	110
11. Preliminaries	110
12. The Bochner theorem	113
13. The SNAG theorem	114
Chapter 5. PONTRYAGIN DUALITY	132
14. Preliminaries	132
15. Locally convex vector groups	138
16. Nuclearity of dual groups	144
17. Strong reflexivity	151
18. Groups with boundedness	162
Bibliography	168
Index of symbols	174
Subject index	177
