Preface	V
-------------------	---

Basic Physiology of EDRF

Introduction	
Just, H.	3
Cellular mechanisms controlling EDRF/NO formation in endothelial cells	
Busse, R., A. Lückhoff, A. Mülsch	7
EDRF: nitrosylated compound or authentic nitric oxide	
Bates, J.N., D.G. Harrison, P.R. Myers, R.L. Minor	17
Does EDRF/NO regulate its own release by increasing endothelial cyclic GMP?	
Kuhn, M., U. Förstermann	27
Molecular mechanisms of nitrovasodilator bioactivation	
Noack, E., M. Feelisch	37
Angiogenesis in the adult heart	
Schaper, W.	51

The endothelium in control of blood flow in vivo

Endothelium and blood flow mediated vasomotion in the conscious dog	
Bigaud, M., S.F. Vatner	59
Endothelium-mediated regulation of coronary tone	
Bassenge, E.	69
Role of EDRF and endothelium in coronary vasomotor control	
Stewart, D.J.	77
Blood flow and optimal vascular topography: role of the endothelium	
Griffith, T.M., D.H. Edwards, M.D. Randall	89
Impaired tissue perfusion after inhibition of endothelium-derived nitric oxide	
Pohl, U., D. Lamontagne	97

Endothelial function in pathological conditions

Endothelial dysfunction in myocardial ischemia and reperfusion: role of oxygen-derived free radicals

Lefer, A.M., D.J. Lefer 109

Interactions between nitric oxide and prostacyclin in myocardial ischemia and endothelial cell cultures

Schrör, K., I. Woditsch, H. Strobach, H. Schröder 117

Effects of native and oxidized low-density lipoproteins on endothelium-dependent and endothelium-independent vasomotion

Galle, J., E. Bassenge 127

Endothelium-dependent control of vascular tone: effects of age, hypertension and lipids

Lüscher, T.F., Y. Dohi, F.C. Tanner, C. Boulanger 143

Experimental induction of spasm, sudden progression of organic stenosis and intramural hemorrhage in the epicardial coronary arteries

Nakamura, M. 159

Endothelial dysfunction in hypercholesterolemia is corrected by L-arginine

Cooke, J.P., J. Dzau, A. Creager 173

Endothelial function in the clinical setting

Assessment of coronary vasomotor tone in humans

Wollschläger, H., A.M. Zeiher, H. Drexler, H. Just 185

Coronary vasomotion and coronary flow reserve during exercise

Hess, O.M., L. Felder, A. Gaglione, M. Buechi, F. Vassalli, Z. Jiang,
J. Grimm, H.P. Krayenbuehl 193

Coronary hemodynamic determinants of epicardial artery vasomotor responses during sympathetic stimulation in humans

Zeiher, A.M., H. Drexler 203

Coronary vasospasm in humans: the role of atherosclerosis and of impaired endothelial vasodilator function

Ganz, P., F.F. Weidinger, A.C. Yeung, V.I. Vekshtein, J.A. Vita,
T.J. Ryan Jr., J.M. McLenachan, A.P. Selwyn 215

Progression of coronary endothelial dysfunction in man and its potential clinical significance

Drexler, H., A.M. Zeiher 223

Response of coronary arteries to nitrates, the EDRF-donor SIN-1, and calcium antagonists

Schulz, W., G. Kober 233

Subject Index 243
