

Table of Contents

0	<i>Introduction</i>	1
1	<i>Desirable Temporal Aspects to Model and Query</i>	3
2	<i>Design Decision for a Temporal Relational Model</i>	7
3	<i>Time as a Data type</i>	9
4	<i>Previous Work on Extending the Relational Database Model</i>	12
5	<i>Requirements for Full Temporal Querying Support</i>	18
6	<i>A Temporal Relational Data Model</i>	20
7	<i>The Temporal Relational Query Language T-DATALOG</i>	31
8	<i>A Formal Declarative Semantics</i>	44
	8.1 <i>General Principles of a Declarative Semantics</i>	44
	8.2 <i>Stratified T-DATALOG and Stratified Semantics for T-DATALOG</i>	54
	8.3 <i>Perfect Model Semantics for T-DATALOG</i>	65
9	<i>Towards an Operational Semantics of T-DATALOG</i>	70
	9.1 <i>Basic Operations for the Operational Semantics</i>	75
	9.2 <i>Basic Aspects of an Operational Stratified Semantics for T-DATALOG</i>	91
	9.3 <i>The Rule / Goal Graph: A Pragmatic Approach for an Operational Semantics of Stratified T-DATALOG</i>	99
10	<i>Extensions of T-DATALOG</i>	136
11	<i>Conclusions and Further Work</i>	140
12	<i>References</i>	142
