General Information	v
Preface	vii

## SESSION I: CREEP AND VISCOELASTICITY

Creep and Rupture in Relation to Field Experiments A.R.S. Ponter and A.C.F. Cocks	3
The Use of Tertiary Creep Rates in Ice at High Strains in Compression and Shear T.H. Jacka and W.F. Budd	21
Creep and Settlement of Ice Structures - A Case History D.M. Masterson and T. Smith	37
Creep Constitutive Equations for Polycrystalline Ice and Effect of Microcracking P. Duval, P. Kalifa and J. Meyssonier	55
Kinetics of Microcracking and Dilatation in Polycrystalline Ice N.K. Sinha	69
<b>Chairman's Remarks</b>	89

## SESSION II: FRACTURE

Fracture Mechanics Models of Ice-Structure Interaction A.C. Palmer	93
The Fracture Toughness of Ice J.P. Dempsey	109
The Study of Fracture Toughness of Bohai Sea Ice W. Shen, S.Z. Lin, P. Gu, X.A. Zhou	147

The Tensile and Compressive Fracture of Ice E.M. Schulson	165
--------------------------------------------------------------	-----

### **SESSION III: DAMAGE AND COMPRESSIVE FRACTURE**

Models for the Deformation Behavior of Viscoelastic Media with Distributed Damage and Their Applicability to Ice R.A. Schapery	191
Microfracture and The Compressive Failure of Polycrystalline Ice D.M. Cole	231
Some Questions on Ice and Ice Cover Fracture in Compression R.V. Goldstein and N.M. Osipenko	251
Seasonal Compressive Strength of Beaufort Sea Ice Sheets G.W. Timco and R.M.W. Frederking	267
Processes of Deformation and Fracture of Ice in Compression I.J. Jordaan and R.F. McKenna	283
A Plasticity Model for the Crushing of Ice J.F. Dorris	311
Strength and Failure Modes of Pure Ice and Multi-Year Sea Ice Under Triaxial Loading S.A.F. Murrell, P.R. Sammonds and M.A. Rist	339
Sea Ice Under Complex Stress States: Constitutive Modelling and Testing F.U. Häusler, H.G. Matthies and C.S. Moore	363

### **SESSION IV: FRICTION AND BROKEN ICE MASSES**

Mechanisms of Ice Friction J. Mølgaard	385
Crushing Friction Experiments on Freshwater Ice R.E. Gagnon and J. Mølgaard	405
Do Cracks Reduce Thermal Ice Stresses? L.Å. Fransson	423

## SESSION V: DESIGN METHODOLOGIES

Statistical Analysis of Ice Forces T.J.O. Sanderson	439
Probabilistic Determination of Iceberg Collision Design Loads for Floating Production Vessels M.K. Fuglem, D. Duthinh, J.H. Lever and I.J. Jordaan	459
The Selection of Design Ice Loads and Design Ice Features For Fixed Offshore Structures in the Beaufort Sea M. Nessim and I.J. Jordaan	483
Structural Risk Model of Arctic Shipping C.G. Daley, C. Ferregut and R. Brown	507
Probabilistic Ice Forces on Offshore Structures D.E. Nevel	541
<b>Chairman's Remarks</b>	559

## SESSION VI: ICE-STRUCTURE INTERACTION

Ice Interaction with Structures M. P. Määttänen	563
Adjusting Local Stiffness for Improving Dynamic Ice-Structure Interaction of Bohai Jackets X. Jizu and W. Lingyu	581
Theoretical Modelling of Ice-Structure Interaction K. Riska	595
Ice-Structure Interaction During Indentation Tests D.S. Sodhi	619
Structure Geometry and Ice Interaction K.R. Croasdale and M. Metge	641
Dynamics of Continuous Icebreaking by an Icebreaker Hull R. Ettema and F. Stern	669
Impact Ice Pressure: More Questions than Answers A.L. Tunik	693

A Method of Scaling for Ship-Ice Model Tests D.B. Colbourne and J.H. Lever	715
<b>Chairman's Remarks</b>	731
<b>Contribution to General Discussions</b>	735
