
Contents

- 509 Introduction to Deep Earth Electrical Conductivity, *W. H. Campbell*
- 511 Electromagnetic induction in the earth due to stationary and moving sources, *D. H. Boteler*
- 527 The new approach to global deep sounding, *E. B. Fainberg, A. V. Kuvshinov, L. P. Mishina and B. Sh. Singer*
- 533 The effect of the oceans and sedimentary cover on global magnetovariational field distribution, *A. V. Kuvshinov, O. V. Pankratov and B. Sh. Singer*
- 541 The magnetospheric disturbance ring current as a source for probing the deep earth electrical conductivity, *W. H. Campbell*
- 559 The conductosphere depth at equatorial latitudes as determined from geomagnetic daily variations, *S. Duhau and A. Favetto*
- 575 A deep geophysical study in the Baikal region, *A. M. Popov*
- 589 A new telluric KCl probe using Filloux's AgAgCl electrode, *A. Junge*
