

CONTENTS

CHAPTER 1: GAS RADIATION

Invited Lecture — Gas Radiation Spectral Correlated Approaches for Industrial Applications

A. Soufiani-Lab. EM2C-CNRS-E.C.P 3

Spectral Gas Effects in Gas-Fired Furnaces

J.A. Wieringa, J.J.Ph. Elich, C.J. Hoogendoorn 36

Experimental and Theoretical Studies on the Radiative Properties of CO₂ at High Temperature: Application to Diagnostic

F. Grisch, A. Coppalle, P. Vervish 54

Experimental Studies of a Methane/Air Counterflow Flame Doped with NO

D. Schreiber, M. Lenner, O. Lindgren, J. Olsson 68

CHAPTER 2: HEAT TRANSFER IN FLAMES

Invited Lecture — The Calculation of Local Fluctuations in Non Premixed Turbulent Flames

R. Borghi, CNRS — Université de Rouen 83

Modelling of Thermally Radiating Diffusion Flames with Detailed Chemistry and Transport

Y. Liu, B. Rogg 114

Calculations of Velocity, Composition and Temperature Fields in a Model Swirl Combustor with a Reynolds-Stress Transport Turbulence Model

W.P. Jones, A. Pascau 128

Numerical Prediction of Flame Image

J.C.F. Pereira, P. Coelho, J.M.P. Rocha, M.G. Carvalho 146

The Role of Radiation in Microgravity Flame Structures and Behavior

J. Buckmaster, P.D. Ronney 161

CHAPTER 3: PARTICLE PHASE — GAS PHASE RADIATIVE AND CONVECTIVE INTERACTION

Invited Lecture — Simulation of Particle Multiple Scattering and
Applications to Particle Diagnosis

G. Gouesbet, B. Maheu, J.N. Le Toulouzan — INSA de Rouen 173

Sensitivity of Radiative Transfer to Refractive Index of Fly Ash in High
Temperature Environment

E. Lecossais, Z.G. Habib 186

Modelling Optical Properties of Air CO₂-H₂O-Soot Mixtures for
Engineering Calculations

S. Pasini, N. Pintus, L. Castellano, S. Lattanzi 205

The Radiative Properties of Soot Agglomerates

P.A. Bonczyk, R.J. Hall 215

Spectroscopic Determinations of Local Particles Gas Temperatures in
a Pulverised Coal Flame

J. Crabot 236

Radiation Tomography of Sooting Diffusion Flames

R.J. Hall, P.A. Bonczyk 254

CHAPTER 4: MEASUREMENTS OF RADIATIVE AND CONVECTIVE HEAT TRANSFER

Invited Lecture — Review of Non-Intrusive Measuring Procedures
Applied to Radiative Gases

Dr. H. Pfeifer — French German Research Institute, Saint-Louis. 273

A New Infrared Emission-Absorption Pyrometer for Dust - Air
Explosions Temperature Measurements

L. Teixeira de Lemos, R. Bourianne 287

Instantaneous Temperature Profile Measurements, in a Flame by Infrared
Line Thermometry Technique

B. Bedat, A. Giovannini, S. Pauzin 297

Simultaneous Measurement of Temperature and Density of Burnt Gases by an Infrared Radiation Computed Tomography <i>S. Shimizu, S. Sakai, K. Wakai</i>	309
Quick Measuring Technique for Flames (QMF) <i>P. Stuber, J. Gass, P. Suter</i>	332
Thermographic Detection of Bond Defects within Models of Solid Propellant Motors <i>H. Schneider</i>	344
 CHAPTER 5: HEAT TRANSFER IN COMBUSTION EQUIPMENT	
Invited Lecture — Heat Transfer in Industrial Furnaces <i>Ir. K. Van Ommen — Shell Laboratorium, Amsterdam</i>	353
Modelling Radiative Heat Transfer in Pulverised Coal-Fired Furnaces <i>F. Liu, J. Swithenbank</i>	358
Mathematical Modelling of Heat Transfer in an Industrial Glass Furnace <i>M.G. Carvalho, M. Nogueira</i>	374
Mathematical Modelling of Thermal NO _x Emissions in Combustion Chambers <i>K.A. Pericleous, I.W. Clark, N.C. Markatos</i>	393
Heat Transfer Predictions in Aircraft Engines Combustors and Reheats <i>M. Desauty, S. Meunier</i>	412
Influence of the Pressure-Ratio on Radiative Heat Transfer in Gas Turbine Combustors <i>R. Koch, S. Wittig, B. Noll</i>	425
Radiation Characteristics of Surface Combustion Burners <i>M. Golombok, L.C. Shirvill</i>	439
Simulation of Radiation Heat Exchangers <i>B. Stapper, D. Köneke, P.M. Weinspach</i>	457

Heat Transfer to Pipes Submerged in Turbulent Jet Diffusion Flames <i>J.E. Hustad, O.K. Sonju</i>	474
Radiation Heat Transfer in the MHD Generator <i>B. Zaporowski, J. Roszkiewicz</i>	491
An Improvement in Calculating the Thermal Fields in the Piston-Cylinder System <i>L. Bignardi, R. Cipollone</i>	508
CHAPTER 6: HEAT TRANSFER IN FIRES	
Invited Lecture — Heat Transfer in Building Fires <i>P.H. Thomas, Lund University — Sweden</i>	525
On the Field Modelling of Fire using Parallel Processors <i>G. Cox, P. Cumber, F.C. Lockwood, C. Papadopoulos, K. Taylor</i>	544
Radiative Transfer at the Surface of a Small Scale Pool Fire Under the Influence of External Radiation <i>X.L. Zhang, J.P. Vantelon</i>	555
Combined Convective and Conductive Effects within an Upstream Flow Along a Vertical Fuel Surface <i>B. Porterie, R. Saurel, J-C. Loraud, M. Larini</i>	570
A "Two-Fluid" Approach to the Modelling of Three-Dimensional Turbulent Flames <i>K.A. Pericleous, N.C. Markatos.</i>	583
Three-Dimensional Natural Convection-Radiation Interactions in a Differentially Heated Cube Filled with Gas/Soot Mixtures <i>T. Fusegi, B. Farouk, K. Kuwahara.</i>	602
