

Contents

Chapter 1	Nutrients	1
	Proximate Feed Analysis	1
	Chemical Classification of Nutrients	2
1.1	Water	3
1.1.1	Drinking Water	3
1.1.2	Moisture Content of Feed and Diet	5
1.1.2.1	Effect of Moisture Content of Feed or Diet on Animal Performance	5
1.1.2.2	Effect of Moisture Content on Feed and Storage Qualities	7
1.1.2.3	Effect of Moisture Content When Purchasing Large Quantities of Feed	7
1.2	Protein	8
1.2.1	Digestible Protein	8
1.2.2	Choice of Protein Supplements	9
1.2.3	Nonprotein Nitrogen Sources	9
1.3	Fats	10
1.4	Carbohydrates	10
1.5	Nonprotein Nitrogen (NPN)	11
1.6	Efficient Use of Urea	11
1.6.1	Urea Supplements for Various Feeding Conditions and Weights of Cattle	12
1.6.1.1	For Weanling Calves	13
1.6.1.2	For Wintering Calves Over 500 lbs, for Replacement Heifers, and Young Bulls	13
1.6.1.3	For Pregnant or Dry Cows on Pasture and in Drylot	14
1.6.1.4	For Feedlot Cattle on High Energy Rations	14
1.6.2	Ammonia Toxicity	15
	References and Supplemental Literature	16
Chapter 2	Classification of Feeds	19
2.1	Forages	19
2.1.1	Dry Forages	19
2.1.1.1	Legumes	19
2.1.1.2	Other Legumes	21
2.1.1.3	Nonlegumes	22
2.1.2	Green or Succulent Forages	23
2.1.2.1	Silages	23

2.1.2.2	Corn and Sorghum Silages	24
2.1.2.3	Silage Preservatives	26
2.1.2.4	Haylage	27
2.1.2.5	Soilage (Green Chop).	27
2.2	Concentrates	28
2.2.1	Low Protein Concentrates (Less than 15% Protein)	28
2.2.1.1	Cereal Grains	28
2.2.1.2	Molasses	34
2.2.1.3	Beet Pulp	35
2.2.1.4	Mill Byproducts	36
2.2.2	Medium Protein Concentrates (15–25 % Protein)	36
2.2.3	High Protein Concentrates (Over 25 % Protein)	38
	References and Supplemental Literature	41
Chapter 3 Procedures in Ration Formulation		43
3.1	Balancing Rations	44
3.1.1	Information or Materials Needed	44
3.2	Procedure for Formulating Rations	44
3.2.1	Formulating a Simple Ration Involving Two or Three Feeds	44
3.2.2	Formulating a Ration with Specific Concentrate Level	48
	References and Supplemental Literature	80
Chapter 4 Processing Feeds for Beef Cattle		81
4.1	Methods of Processing	81
4.1.1	Grinding, Cracking, or Dry Rolling	83
4.1.2	Extruding	83
4.1.3	Pelleting	84
4.1.4	Roasting	84
4.1.5	Popping	85
4.1.6	Micronizing	85
4.1.7	Steam Rolling	86
4.1.8	Steam Flaking; Pressure Flaking	86
4.2	High-Moisture Grains; Reconstituting	88
4.2.1	Soaking	89
4.2.2	Sprouting	89
4.2.3	Exploding	90
	References and Supplemental Literature	90
Chapter 5 Systems of Feeding		93
5.1	Pasture Feeding	93
5.2	Growing Cattle	95

5.2.1	Feeding Replacement Heifers	96
5.2.1.1	Protein	96
5.2.1.2	Minerals (Calcium, Phosphorus, and Salt)	97
5.2.1.3	Vitamin A	98
5.2.2	Feeding Replacement Feeder Cattle (Backgrounding)	98
5.3	Finishing Cattle	100
5.3.1	Concentrate-to-Forage Ratio	101
5.3.2	Substitution of Feeds	103
5.3.2.1	Grains	103
5.3.2.2	Forages	103
5.3.3	Protein Levels and Sources	104
5.3.3.1	For Finishing Lightweight Feeders	104
5.3.3.2	For Finishing Yearling Cattle	104
5.3.4	Mineral Supplementation	105
5.3.4.1	Salt (NaCl)	105
5.3.5	Calcium and Phosphorus	105
5.3.6	Potassium and Other Elements	106
5.3.7	Vitamin A Supplementation	106
	References and Supplemental Literature	107
Chapter 6 Feed Additives		108
6.1	Antibiotics	108
6.1.1	For Young Calves	116
6.1.2	For Feedlot Cattle	116
6.1.3	For Range Cows and Bulls	117
6.2	Anthelmintics	117
6.3	Bloat Prevention	117
6.4	Coccidiostat	118
6.5	Foot Rot	118
6.6	Grubicide	119
6.7	Melengestrol Acetate	119
6.8	Rumensin	119
6.9	Stilbestrol	120
	References and Supplemental Literature	121
Chapter 7 Growth Stimulants		122
7.1	Stilbestrol Implants	122
7.1.1	For Range Cattle	122
7.1.2	For Feedlot Cattle	122
7.2	Synovex Implants	124
7.3	Ralgro Implants	124
	References and Supplemental Literature	125
