

List of Contents

M. A. Epstein and B. G. Achong

<i>1 Introduction: Discovery and General Biology of the Virus</i>	1
A. Introduction	2
B. Discovery of EBV	3
C. General Biology	4

M. A. Epstein and B. G. Achong

<i>2 Morphology of the Virus and of Virus-Induced Cytopathologic Changes</i>	23
A. Introduction	24
B. Virus Morphology	24
C. Virus-Induced Cytopathologic Changes	29
D. Comment	33

I. Ernberg and G. Klein

<i>3 EB Virus-Induced Antigens</i>	39
A. Introduction	40
B. Antigen Detection Methods	41
C. Membrane Antigen	43
D. The Early Antigen Complex	45
E. The Viral Capsid Antigen	47
F. The EBV Nuclear Antigen	48
G. Lymphocyte-Detected Membrane Antigen	51
H. Antigen Expression in EBV-Carrying Cell Lines	51
I. Expression of EBV Antigens During the Viral Cycle	52

W. Henle and G. Henle

<i>4 Seroepidemiology of the Virus</i>	61
A. Identification of EBV as a New Human Herpes Group Virus	62
B. Serologic Association of EBV with Burkitt's Lymphoma and Other Diseases	63
C. The Seroepidemiology of Burkitt's Lymphoma	66
D. The Seroepidemiology of Nasopharyngeal Carcinoma	69
E. The Seroepidemiology of Infectious Mononucleosis	71
F. Seroepidemiologic Observations in Other Diseases	72
G. Concluding Remarks	73

Y. Becker

5	<i>Biochemistry of the Virus and Its Effects on the Metabolism of Infected Cells</i>	79
A.	Introduction: B Lymphocytes, the Natural Host of EBV.	82
B.	Molecular Composition of EB Virions.	83
C.	Biochemical Consideration of the Resident EBV DNA in Lymphoblastoid Cells	88
D.	Biochemical Events Leading to the Release of EBV DNA from Control of Host-Cell Mechanisms	90
E.	Biochemical Aspects of EBV DNA Replication and Transcription	96
F.	Biochemical Properties of EBV Nuclear Antigen (EBNA)	99
G.	Biochemical Aspects of Infection of Lymphoblastoid Cells and Leukocytes with EBV.	100
H.	Transformation of Cells with DNA	102
I.	Discussion	102

J. S. Pagano and J. E. Shaw

6	<i>Molecular Probes and Genome Homology</i>	109
A.	General Introduction	110
B.	Technology	111
C.	What We Have Learned	132
D.	Prospects	138
E.	Unifying Concept	141

H. zur Hausen

7	<i>Biochemical Detection of the Virus Genome</i>	147
---	--	-----

A. Adams

8	<i>The State of the Virus Genome in Transformed Cells and Its Relationship to Host Cell DNA</i>	155
A.	Introduction	156
B.	Types of EBV-Transformed Cells	156
C.	Models for the Maintenance of Latent EBV Genomes in Transformed Cells	157
D.	First Experimental Evidence for Free, Nonintegrated EBV Genomes in Raji Cells	160
E.	Possible Forms of Free, Nonintegrated EBV Genomes	161
F.	Detailed Analysis of the Free, Nonintegrated EBV Genomes in Raji Cells	163

G. Detection of EBV DNA Covalently Bound to Host DNA in Raji Cells	166
H. State of the EBV Genomes in Other Cells	169
I. Replication of the Latent EBV DNA in Transformed Cells	174
J. Association of EBV DNA with Chromosomes	177
K. The EBV Genome and the Evolution of Burkitt's Lymphoma	178
J. L. Strominger and D. Thorley-Lawson	
9 <i>Early Events in Transformation of Human Lymphocytes by the Virus</i>	185
A. Recognition and Adsorption	186
B. Penetration of Virus	188
C. Expression of Viral Information	190
D. Integration of EBV Genomes	197
E. Expression of Information from Integrated Genomes	200
J. H. Pope	
10 <i>Transformation by the Virus In Vitro</i>	205
A. Introduction	206
B. General Description of Transformation	206
C. Viral Characteristics	208
D. Target Cells and Their Properties	209
E. Infectivity Assays	211
F. Virus-Cell Relationships	212
G. Cellular Interactions	215
H. Inhibition of Transformation	215
I. Role of In Vitro Transformation by EBV in the Establishment of Lymphoblastoid Cell Lines in Primary Culture of Human Tissues	217
J. Effects of EBV Transformation on Karyotype	218
K. Conclusion	218
K. Nilsson	
11 <i>The Nature of Lymphoid Cell Lines and Their Relationship to the Virus</i>	225
A. Introduction	227
B. Provisional Classifications of Hematopoietic Cell Lines	229
C. "Spontaneous" Establishment of Permanent EBV-Carrying Lymphoid Cell Lines	233

D. Markers for Clonality	236
E. Phenotypic Characteristics of EBV-Carrying Lymphoid Cell Lines	238
F. Chromosome Studies on EBV-Carrying Lymphoid Cell Lines	259
G. Phenotypic Stability During Long-Term Cultivation .	262
H. EBV Genome-Negative Hematopoietic Cell Lines . .	263
I. Concluding Remarks	266
B. Hampar	
12 <i>Activation of the Viral Genome In Vitro</i>	283
A. Introduction	284
B. Properties of Human Lymphoblastoid Cell Lines . .	284
C. State of the Virus Genome in Lymphoblastoid Cells .	285
D. Spontaneous Activation	286
E. Activation Induced by Chemicals	287
F. Virus Expression in Hybrid Cells	290
G. Concluding Remarks	292
G. Henle and W. Henle	
13 <i>The Virus as the Etiologic Agent of Infectious Mononucleo- sis</i>	297
A. Evidence for the Etiologic Role of EBV in Infectious Mononucleosis	298
B. Implications of the Serologic and Virologic Observations in Infectious Mononucleosis	303
C. Facts and Speculations Regarding Pathogenesis. . .	307
M. A. Epstein and B. G. Achong	
14 <i>The Relationship of the Virus to Burkitt's Lymphoma</i> . .	321
A. Introduction	322
B. Burkitt's Lymphoma	322
C. The Virus and African Burkitt's Lymphoma	324
D. Sporadic Burkitt's Lymphoma	328
E. Oncornaviruses and Burkitt's Lymphoma	329
F. Discussion	329

G. Klein

<i>15 The Relationship of the Virus to Nasopharyngeal Carcinoma</i>	339
A. Introduction	340
B. Histopathology	340
C. EBV-Related Serology in Nasopharyngeal Carcinoma	341
D. EBV Genomes in Nasopharyngeal Carcinoma	342
E. Biologic Activity of Nasopharyngeal Carcinoma – Associated EBV	344
F. Disease-Related Serologic Studies	345
G. Concluding Remarks	346

G. Miller

<i>16 Experimental Carcinogenicity by the Virus in Vivo</i>	351
A. Introduction	352
B. Virus Factors in Tumorigenesis	353
C. Host Factors in Experimental Carcinogenicity	355
D. Pathology of the Experimental Disease	357
E. EBV Genome in the Experimental Tumors	361
F. EBV-Specific and Heterophil Antibody Responses of Experimentally Infected Animals	364
G. Special Features of Transformed Marmoset Cells . .	365
H. Significance of Experimental Carcinogenicity by EBV	368
I. Future Work with EBV in Primates	369

F. Deinhardt and J. Deinhardt

<i>17 Comparative Aspects: Oncogenic Animal Herpesviruses</i> . .	373
A. Introduction	374
B. Herpesviruses of Cold-Blooded Animals	377
C. Herpesviruses of Warm-Blooded Animals	379
D. Conclusions	400

G. de-Thé

<i>18 Demographic Studies Implicating the Virus in the Causation of Burkitt's Lymphoma; Prospects for Nasopharyngeal Carcinoma</i>	417
A. Introduction	418
B. Epidemiologic Characteristics of EBV Infection and of the Associated Tumors	418

C. The IARC Prospective Study of Burkitt's Lymphoma in Uganda and the Causative Role of the Virus . . .	423
D. Prospects for the Epidemiologic Approach in Nasopharyngeal Carcinoma	431
E. Intervention as the Final Step in Proving Causality .	433
F. Conclusions	435
M. A. Epstein	
<i>19 Vaccine Control of EB Virus-Associated Tumors</i>	<i>439</i>
A. Introduction	440
B. EBV as the Cause of a Human Cancer	440
C. A Vaccine to Prevent EBV Infection	441
D. The Vaccine Prevention of EBV-Related Tumors . .	444
E. Discussion	445
