

Contents

1	Introduction	1
1.1	Guideline Through the Thesis	2
1.2	Notation and Basics	4
1.3	Motivation for Copulas	5
1.4	Introduction to Copulas	6
1.5	Underlying Methodology of the GJRM Framework	8
2	A Penalisation Approach for Competitive Settings	13
2.1	Methodology	13
2.2	Simulations: Validating the Novel Penalisation	15
2.2.1	Preliminary	15
2.2.2	Results without Novel Penalisation	16
2.2.3	Results with Novel Penalisation	19
2.3	Application on Bundesliga Data in Real Time	20
2.3.1	Data	20
2.3.2	The Model	21
2.3.3	The Covid-19 Pandemic and Changes to the Model	22
2.3.4	Insertion: Betting	23
2.3.5	Results for Weekly Bundesliga Predictions	24
2.3.6	Reproducible Results	27
2.3.7	Final Models for Interpretation	28
3	An Approach to Variable Selection via LASSO-Type Penalisation	33
3.1	Methodology	33
3.1.1	Optimising the Penalty Parameter ν	35
3.1.2	Threshold $\varepsilon_{\text{lasso}}$ for Approximative LASSO	36
3.2	Simulations: Validating the LASSO-type Penalisation	37
4	An Application to FIFA World Cups	45
4.1	The Data Set	45
4.2	Measures of Predictive Performance	47
4.3	Results	49
4.3.1	Results without Penalisation	49
4.3.2	Results with Penalty for Competitive Settings	52
4.3.3	Results with LASSO-type Penalisation	53
4.3.4	Insertion: Combining the Penalties	56
4.3.5	Results with both Penalisation Approaches	58
4.4	Summary of Results for FIFA World Cups	60

5	Case Study: Football and Machine Learning	65
5.1	Introduction	65
5.2	Data	66
5.3	Models and Evaluation Measures	70
5.3.1	Modelling the Number of Goals	70
5.3.2	Modelling the Ordinal/Nominal Outcome	72
5.3.3	Prediction Approach	73
5.3.4	Goodness of Prediction Measures	73
5.4	Results	75
5.4.1	Differences Between Leagues	79
5.4.2	Conclusions	82
6	Conclusion and Perspective	85
