Invited Lectures

E. Allender, V. Gore On Strong Separations from AC^0	1
J. Buchmann Number Theoretic Algorithms and Cryptology	16
J.-y. Cai Computations Over Infinite Groups	22
S. Heinrich Efficiency of Monte Carlo Algorithms in Numerical Analysis	33
M. Karpinski Approximation Algorithms for Counting Problems in Finite Fields ...	45
A. A. Razborov Lower Bounds for Deterministic and Nondeterministic Branching Programs	47
R. Reischuk Graph Theoretical Methods for the Design of Parallel Algorithms	61
C. P. Schnorr, M. Euchner Lattice Basis Reduction: Improved Practical Algorithms and Solving Subset Sum Problems	68
J. F. Traub Information-Based Complexity: Recent Results and Open Problems .	86
G. Turán A Survey of Some Aspects of Computational Learning Theory	89
A. C.-C. Yao Recent Progress in Circuit and Communication Complexity (Abstract)	104

Communications

C. Baier, M. E. Majster–Cederbaum The Consistency of a Noninterleaving and an Interleaving Model for Full TCSP	105
B. Bank, T. Krick, R. Mandel, P. Solernó A Geometrical Bound for Integer Programming with Polynomial Constraints	121
E. Barucci, R. Pinzani, E. Rodella, R. Sprugnoli A Characterization of Binary Search Networks	126
D. Beauquier, M. Nivat, D. Niwiński About the Effect of the Number of Successful Paths in an Infinite Tree on the Recognizability by a Finite Automaton with Büchi Conditions	136
L. Breveglieri, C. Citrini, S. Crespi–Raghizzi Deterministic Dequeue Automata and LL(1) Parsing of Breadth-Depth Grammars	146
D. Bruschi, G. Pighizzini The Complexity of Computing Maximal Word Functions	157
G. Buntrock, B. Jenner, K.–J. Lange, P. Rossmanith Unambiguity and Fewness for Logarithmic Space	168
M. Chardin Differential Resultants and Subresultants	180
B. S. Chlebus, I. Vrto Unifying Binary–Search Trees and Permutations	190
J. Dassow, K.–J. Lange Computational Complexity and Hardest Languages of Automata with Abstract Storages	200
E. Fachini, A. Monti, M. Napoli, D. Parente Systolic Y–Tree Automata: Closure Properties and Decision Problems	210

H. D. Gröger	
A New Partition Lemma for Planar Graphs and its Application to Circuit Complexity.....	220
T. Hofmeister, W. Hohberg, S. Köhling	
Some Notes on Threshold Circuits, and Multiplication in Depth 4....	230
J. Hromkovič	
Nonlinear Lower Bounds on the Number of Processors of Circuits with Sublinear Separators	240
O. H. Ibarra, N. Q. Trân	
On Space-Bounded Synchronized Alternating Turing Machines	248
A. Joux, J. Stern	
Improving the Critical Density of the Lagarias-Odlyzko Attack Against Subset Sum Problems	258
S. Jukna	
Optimal versus Stable in Boolean Formulae.....	265
M. Kaib	
The Gauß Lattice Basis Reduction Algorithm Succeeds With Any Given Norm	275
J. Kaneps	
Regularity of One-Letter Languages Acceptable by 2-Way Finite Probabilistic Automata	287
P. Knijnenburg, J. N. Kok	
On the Semantics of Atomized Statements: The Parallel-Choice Option	297
E. Kounalis, M. Rusinowitch	
Automatic Proof Methods for Algebraic Specifications	307
D. Kratsch, L. A. Hemachandra	
On the Complexity of Graph Reconstruction	318
C. Levkopoulos, O. Petersson	
An Optimal Adaptive In-Place Sorting Algorithm	329
G. Louchard, C. Kenyon, R. Schott	
Data Structures Maxima	339

C. Martínez	
Average-Case Analysis of Equality of Binary Trees Under the BST Probability Model.....	350
J. Neraud	
On the Subsets of Rank Two in a Free Monoid: A Fast Decision Algorithm	360
W. Plandowski, W. Rytter, T. Szymacha	
Exact Analysis of Three Tree Contraction Algorithms	370
K. Salomaa, S. Yu	
Degrees of Nondeterminism for Pushdown Automata	380
H. Schröder, O. Sýkora, I. Vrřo	
Optimal Embedding of a Toroidal Array in a Linear Array.....	390
D. Uhlig	
Boolean Functions with a Large Number of Subfunctions and Small Complexity and Depth	395
R. S. Valiveti, B. J. Oommen, J. R. Zgierski	
Adaptive Linear List Reorganisation for a System Processing Set Queries	405
E. Wanke	
On the Decidability of Integer Subgraph Problems on Context-Free Graph Languages	415
