

Contents

1	Towards a circular economy — 1
1.1	History of plastics — 1
1.2	Introduction to the plastics economy — 2
1.3	The new plastics economy — 5
1.3.1	Challenges with regard to plastic pollution — 5
1.3.2	Transition to a circular economy — 7
1.4	The story continues — 10
2	Introduction to polymer science — 11
2.1	Classification — 11
2.1.1	Origin — 11
2.1.2	Chemistry — 12
2.1.3	Properties — 13
2.1.4	Polymerization — 13
2.1.5	Application — 13
2.1.6	Nomenclature — 14
2.2	Structure of macromolecules — 16
2.2.1	Chain composition — 16
2.2.2	Chain architecture — 17
2.2.3	Chain regularity — 19
2.2.4	Chain length — 20
2.2.5	Characterization of macromolecules — 23
2.3	Synthesis of polymers — 26
2.3.1	Step-growth polymerization — 26
2.3.2	Chain-growth polymerization — 35
2.3.3	Copolymerization — 46
2.3.4	Polymerization techniques — 51
2.3.5	Post-polymerization reactions — 54
2.4	Polymer materials — 57
2.4.1	Polymer morphology — 57
2.4.2	Thermal transitions — 58
2.4.3	Characterization of T_g and T_m — 61
2.4.4	Viscoelasticity — 62
2.4.5	Crystallization of polymers — 63
2.4.6	Mechanical behavior of polymer solids — 66
2.4.7	Rheological behavior of polymer melts — 68
2.4.8	Electrical properties — 69
2.4.9	Liquid crystalline morphologies — 69
2.4.10	Block copolymer morphologies — 69
2.4.11	Vitrimers — 70

2.5	From polymer to product —	72
2.5.1	Polymer additives —	72
2.5.2	Processing of plastics —	72
2.5.3	Processing of fibers: Spinning —	76
2.5.4	Processing of foams —	78
2.5.5	Processing of fiber-reinforced plastics —	78
2.6	Exercises —	80
2.6.1	Classification —	80
2.6.2	Structure of macromolecules —	81
2.6.3	Synthesis of polymers —	81
2.6.4	Polymer materials —	82
2.6.5	From polymer to product —	83

3 Bioplastics — 84

3.1	Biorefinery technologies —	84
3.1.1	Platforms —	85
3.1.2	Products —	91
3.1.3	Feedstocks —	91
3.1.4	Processes —	92
3.1.5	Process flow diagrams —	94
3.2	Biochemicals —	95
3.3	Chemistry of bioplastics —	97
3.3.1	Polyethylene (PE) —	98
3.3.2	Polypropylene (PP) —	106
3.3.3	Polyvinyl chloride (PVC) —	113
3.3.4	Polystyrene (PS) —	115
3.3.5	Polyvinyl acetate (PVAc) —	121
3.3.6	Polyacrylic acid (PAA) —	123
3.3.7	Polymethyl methacrylate (PMMA) —	127
3.3.8	Polyacrylonitrile (PAN) —	130
3.3.9	Polyethylene terephthalate (PET) —	133
3.3.10	Polyethylene furanoate (PEF) —	143
3.3.11	Polytrimethylene terephthalate (PTT) —	144
3.3.12	Polybutylene terephthalate (PBT) —	146
3.3.13	Thermoplastic polyetherester (TPEE) —	150
3.3.14	Isosorbide-based polymers —	152
3.3.15	Polyamide 6 (PA6) —	155
3.3.16	Polyamide 6,6 (PA6,6) —	159
3.3.17	Polyphthalamides (PPA) —	168
3.3.18	Polyether block amides (PEBA) —	168
3.3.19	Aramid (aromatic polyamides) —	169
3.3.20	Elastane —	170

- 3.3.21 Polybutylene succinate (PBS) — **171**
- 3.3.22 Poly(butylene-co-succinate-co-adipate) (PBSA) — **172**
- 3.3.23 Polyhydroxyalkanoates (PHAs) — **173**
- 3.3.24 Polylactic acid (PLA) — **179**
- 3.3.25 Polyglycolic acid (PGA) — **183**
- 3.3.26 Poly(butylene-co-adipate-co-terephthalate) (PBAT) — **186**
- 3.3.27 Poly(butylene-co-succinate-co-terephthalate) (PBST) — **187**
- 3.3.28 Polycaprolactone (PCL) — **188**
- 3.4 Bioplastics — **189**
- 3.4.1 Bio-based plastics — **191**
- 3.4.2 Biodegradable plastics — **196**
- 3.4.3 Global production of bioplastics — **204**
- 3.5 Exercises — **207**
- 3.5.1 Biorefining technologies — **207**
- 3.5.2 Biochemicals — **207**
- 3.5.3 Chemistry of bioplastics — **207**
- 3.5.4 Bioplastics — **208**

- 4 Recycling of plastics — 209**
- 4.1 Circular plastics — **209**
- 4.2 Plastic packaging — **211**
- 4.2.1 Polymers used in packaging — **211**
- 4.2.2 Multilayer packaging — **215**
- 4.2.3 Decoration of packaging — **218**
- 4.3 Mechanical recycling — **219**
- 4.3.1 First sorting — **220**
- 4.3.2 Second sorting — **228**
- 4.3.3 Spectroscopic methods — **233**
- 4.3.4 Marker systems — **241**
- 4.3.5 Post-processing — **243**
- 4.3.6 Applications of recyclates — **250**
- 4.3.7 Challenges in mechanical recycling — **252**
- 4.4 Chemical recycling — **259**
- 4.4.1 Chemical recycling techniques — **260**
- 4.4.2 Solvent-based purification — **261**
- 4.4.3 Feedstock recycling — **262**
- 4.4.4 Depolymerization — **266**
- 4.5 Sustainable plastic product development — **271**
- 4.5.1 Application of recyclates in products — **272**
- 4.5.2 Design for recycling — **276**
- 4.5.3 Recyclability incorporating in design — **277**
- 4.5.4 Life-cycle assessment — **281**

VIII — Contents

- 4.6 Exercises — **284**
- 4.6.1 Circular plastics — **284**
- 4.6.2 Plastic packaging — **285**
- 4.6.3 Mechanical recycling — **285**
- 4.6.4 Chemical recycling — **286**
- 4.6.5 Sustainable plastic-product development — **286**
