

Table of Contents

Invited Lecture: Standard ML of New Jersey	
<i>A.W. Appel and D.B. MacQueen</i>	1
Session: Functional and Logic Programming	
Adding Equations to NU-Prolog	
<i>L. Naish</i>	15
Extraction of Functional from Logic Program	
<i>S. Yamasaki</i>	27
Session: Integration of Programming Concepts I	
The Mas Specification Component	
<i>H. Kredel</i>	39
Domesticating Imperative Constructs so that They Can Live in a Functional World	
<i>T.C.N. Graham and G. Kock</i>	51
Session: Compiler Construction I	
Logic-Based Specification of Visibility Rules	
<i>A. Poetzsch-Heffter</i>	63
Optimal Instruction Scheduling Using Constraint Logic Programming	
<i>M.A. Ertl and A. Krall</i>	75
Session: Parallel Implementations	
An Architectural Model for OR-Parallellism on Distributed Memory Systems	
<i>F. Baiardi and D.M. Di Bella</i>	87
FRATS: A Parallel Reduction Strategy for Shared Memory	
<i>K.G. Langendoen and W.G. Vree</i>	99
Session: Narrowing	
Narrowing as an Incremental Constraint Satisfaction Algorithm	
<i>M. Alpuente and M. Falaschi</i>	111
The Implementation of Lazy Narrowing	
<i>M.M.T. Chakravarty and H.C.R. Lock</i>	123
Session: Semantics	
Semantics-Directed Generation of a Prolog Compiler	
<i>C. Consel and Siau Cheng Khoo</i>	135
A Framework to Specify Database Update Views for Prolog	
<i>E. Boerger and B. Demoen</i>	147

Session: Modular Logic Programming

Concepts for a Modular and Distributed Prolog Language

S. Ferenczi 159

From Parlog to Polka in Two Easy Steps

A. Davison 171**Session: Compiler Construction II**

Precedences in Specifications and Implementations of Programming Languages

A. Aasa 183

A Randomized Heuristic Approach to Register Allocation

C.W. Kessler, W.J. Paul and T. Rauber 195

Generating Efficient Code from Data-Flow Programs

N. Halbwachs, P. Raymond and C. Ratel 207**Session: Grammars**

On the Borderline Between Grammars and Programs

C.H.A. Koster and J.G. Beney 219

Efficient Incremental Evaluation of Higher Order Attribute Grammars

H. Vogt, D. Swierstra and M. Kuiper 231

PROFIT: A System Integrating Logic Programming and Attribute Grammars

J. Paakki 243**Invited Lecture: Towards a Meaning of LIFE***H. Ait-Kaci and A. Podelski* 255**Session: Extension of Logic Programming**

U-Log, an Ordered Sorted Logic with Typed Attributes

P.Y. Gloess 275

Compilation of Predicate Abstractions in Higher-Order Logic Programming

W. Chen and D.S. Warren 287**Session: Abstract Interpretation**

Abstract Interpretation: A Kind of Magic

U. Nilsson 299

Abstract Interpretation for Type Checking

G. Filè and P. Sottero 311

A Technique for Recursive Invariance Detection and Selective Program

Specialization

F. Giannotti and M. Hermenegildo 323

Session: Optimization Techniques**Dynamic Detection of Determinism in Functional Logic Languages***R. Loogen and S. Winkler*335**Unfolding-Definition-Folding, in this Order, for Avoiding
Unnecessary Variables in Logic Programs***M. Proietti and A. Pettorossi* 347**Session: Integration of Programming Concepts II****Efficient Integration of Simplification into Prolog***P.H. Cheong and L. Fribourg*359**Lazy Evaluation in Logic***S. Antoy*371**S-SLD-Resolution - An Operational Semantics for Logic Programs
with External Procedures***J. Boye*383**Session: Constraint Logic Programming****Operational Semantics of Constraint Logic Programming over Finite Domains***P. Van Hentenryck and Y. Deville* 395**Constraints for Synchronizing Coarse-grained Sequential Logic Processes***A. Brogi and M. Gabbrielli* 407**System Demonstrations:****Extending Execution Trees for Debugging and Animation in Logic Programming***D. Loyola*419**A Narrowing-Based Theorem Prover***U. Fraus and H. Hußmann* 421**The ALF System***M. Hanus*423**Experiences with Gentle: Efficient Compiler Construction Based on
Logic Programming***J. Vollmer* 425**The System FLR (Fast Laboratory for Recomposition)***B. Baum and P. Forbrig* 427**Multilanguage Interoperability***G. Attardi and M. Gaspari* 429**Short Overview of the CLPS System***B. Legnard and E. Legros*431
