Preface	7
0 Introduction:	13
0.1 General context of the subject matter	13
0.2 Objectives and methods of our empirical investigation	15
0.3 Definition of terms	16
1 Household Behaviour in Economic Theory	23
1.1 Three modules: state, enterprises, households	24
1.2 Factors influencing non-market production by members of private households	27
1.3 Choice theory and resource allocation	30
2 Private Households in Public Statistics	33
2.1 Depiction of households in general administrative statistics: National and international accounts	33
2.2 Statistical instruments in the Federal Republic of Germany	36
3 Informal Economic Activity of Private Households in the Light of Empirical Research	41
3.1 Macro-economic investigations for evaluation purposes in administrative statistics	42
3.2 Behavioural research on household 'informal economic activity'	44
3.3 Unanswered questions and hypotheses	49

4 Design and Implementation of a Survey on Household Economic Behaviour and its 'Informal' Aspects	53
4.1 Theoretical concept	53
4.2 Selection of the survey sample, survey design and implementation	57
4.2.1 Selection of the survey sample	58
4.2.2 Survey design and implementation	59
4.3 Classification and evaluation of survey data	63
4.3.1 Categories of time-use	64
4.3.2 Evaluation of time-use	67
4.3.3 Classification of the income and allocation of nominal and real goods	70
4.3.4 Evaluation of the income and allocation of nominal and real goods	70
5 Survey Results	73
5.1 Utility value and allocation of household income in nominal and real goods from 'formal' and 'informal' sources	75
5.1.1 Utility value of household income in nominal and real goods	75
5.1.2 Household allocation of income in nominal and real goods	81
5.2 Time-allocation and the utility value of 'formal' and 'informal' inputs of human capital into household subsistence	83
5.2.1 Description of time-allocation by members of the survey households	84
5.2.1.1 Time-input into 'formal' gainful activity	86
5.2.1.2 Time-input into 'housework'	89
5.2.1.3 Time-input into miscellaneous side-activities	90
5.2.1.4 Time-input into non-domestic 'informal activities'	91
5.2.1.5 Total productive use of time	92
5.2.2 Utility value of 'time-use' by members of the survey households	93
5.3 Utility value of owner-occupied residences for household subsistence	94
5.4 The 'real consumption' of the survey households and a review of the contribution of 'informal' resources	94
5.5 Economic behaviour - as described by the 'subsistence technology' of private households	100
