

Contents

Part I **Basic Theory**

Irreversibility and Space-Time Structure By I. Prigogine (With 7 Figures)	2
Stochastic Systems: Qualitative Theory and Lyapunov Exponents By L. Arnold	11
First Passage Times for Processes Governed by Master Equations By B.J. Matkowsky, Z. Schuss, C. Knessl, C. Tier, and M. Mangel	19

Part II **Pattern Formation and Selection**

Three Caveats for Linear Stability Theory: Rayleigh-Bénard Convection By H.S. Greenside (With 4 Figures)	38
Pattern Selection and Phase Fluctuations in Chemical Systems By D. Walgraef, P. Borckmans, and G. Dewel (With 2 Figures)	50
Experiments on Patterns and Noise in Hydrodynamic Systems By J.P. Gollub	58

Part III **Bistable Systems**

Optical Bistability: Steady-State and Transient Behavior. By A.T. Rosenberger, L.A. Orozco, and H.J. Kimble (With 7 Figures)	62
Experimental Studies of the Transitions Between Stationary States in a Bistable Chemical System. By J.C. Roux, H. Saadaoui, P. de Kepper, and J. Boissonade (With 9 Figures)	70
Noise-Induced Transitions in Multi-Stable Systems. By E. Ben-Jacob, D.J. Bergman, B.J. Matkowsky, and Z. Schuss (With 10 Figures)	79
Bistable Flows Driven by Colored Noise. By P. Hanggi (With 2 Figures)	95

Part IV Response to Stochastic and Periodic Forcing

Noise-Induced Transitions. By W. Horsthemke	106
Dynamical Aspects of External Nonwhite Noise. By J.M. Sancho and M. San Miguel	114
Dynamic Systems with Fast Parametric Oscillations By S.M. Meerkov (With 6 Figures)	124
Experimental Studies of Noise-Induced Transitions By F. Moss and P.V.E. McClintock (With 12 Figures)	134
Sensitivity of a Hopf Bifurcation to External Multiplicative Noise By R. Lefever and J.W. Turner (With 1 Figure)	143

Part V Noise and Deterministic Chaos

Noise and Chaos in Selected Quantum Optical Systems By N.B. Abraham (With 1 Figure)	152
Distinguishing Low-Dimensional Chaos from Random Noise in a Hydrodynamic Experiment. By A. Brandstater and H.L. Swinney (With 5 Figures)	166
Sensitive Dependence to Parameters, Fat Fractals, and Universal Strange Attractors. By J.D. Farmer (With 2 Figures)	172
Noise-Induced Transitions in Discrete-Time Systems By R. Kapral, E. Celarier, and S. Fraser (With 8 Figures)	179
Scaling for External Excitations of a Period-Doubling System By A. Arnéodo (With 6 Figures)	187

Part VI Sensitivity in Nonequilibrium Systems

General Sensitivity Analysis of Differential Equation Systems By H. Rabitz	196
Nonequilibrium Sensitivity. By D.K. Kondepudi (With 4 Figures)	204
Patterns of Nonequilibrium Sensitivity in Biological Systems By O. Decroly and A. Goldbeter (With 7 Figures)	214
Chemical Reaction Network Sensitivity Analysis. By R. Larter and B.L. Clarke (With 1 Figure)	223

Part VII Contributed Papers and Posters

Chaos in the Conservative Duffing System — Renormalization Group Prediction. By L.E. Reichl and W.M. Zheng (With 4 Figures)	228
Solvable Double-Well Potential Models. By W.M. Zheng	230

Nonlinear Fluctuation-Dissipation Relations. By B.J. West and K. Lindenberg	233
Numerical Studies of Fluctuations and Hysteresis in the Homogeneous Schlögl Model. By J. Kottalam and K.L.C. Hunt (With 2 Figures)	242
Could Weak Neutral Currents Have Determined Biological Chirality? By G.W. Nelson	245
Nonequilibrium Chemical Instabilities in Continuous Flow Stirred Tank Reactors: The Effect of Stirring. By L. Hannon (With 2 Figures)	249
The Effect of Random and Periodic Fluctuations on Nonlinear Systems By C.R. Doering (With 2 Figures)	253
The Period-Doubling Power Spectrum of Conservative Systems By B. Hu and J.-M. Mao	257
A New Computable Criterion for the Non-Existence of Invariant Circles By W. Chou (With 2 Figures)	260
Periodic and Nonperiodic Dynamical Behavior Near Homoclinic Systems By P. Gaspard (With 1 Figure)	265
Precursors of Period Doubling Instabilities By K. Wiesenfeld (With 1 Figure)	268
Flow Patterns in a Circular Couette System By C.D. Andereck and H.L. Swinney	271
