

Contents

P. G. Hugenholtz	
Introduction	9
H. J. C. Swan	
The overriding issue of nitrate tolerance	11
E. Noack	
New pharmacological concepts in the active mechanism of organic nitro-compounds	21
M. O'Rourke, A. Avolio, R. Kelly	
Nitroglycerin offsets age-related increase of left ventricular afterload in man — a hidden mechanism exposed	37
W.-D. Bussmann	
Nitroglycerin in the therapy of acute myocardial infarction	51
H. P. Nast	
Clinical findings in the treatment of hypertensive crisis with nitroglycerin	57
M. Kriegmair, A. Hofstetter	
The treatment of renal colics with glycerol trinitate	65
M. Staritz	
Glycerol trinitrate (sublingualspray) as a spasmolytic in biliary colics — first clinical experiences	73
R. Hetzer, M. Loebe, H. Warnecke, S. Schüler	
Cardiac transplantation in Germany	79
B. I. Jugdutt	
Multicentre trials in acute myocardial infarction in Canada and the US: myocardial salvage and remodelling	85

E. I. Chazov	
Treatment of patients with myocardial infarction in the USSR	93
Case discussion	99
Awarding of the Nitrolingual Prize 1990	105
