

# Contents

1. Introduction	1
2. Frequency-Dependent Evolution in a Single Haploid Species	
1. Pure and Mixed Strategies	4
2. Monomorphic ESS's and Stability	5
3. The Hawk-Dove Game	7
4. The Static Characterization of an ESS	9
(A) Biological Considerations	9
(B) Mathematical Considerations	11
5. Stability for the Continuous Dynamic	14
6. The Strong Stability Concept and the Dynamic Characterization of an ESS	16
7. Stability for the Discrete Dynamic	18
8. Alternative Proof of Theorem 2.5.2	20
(A) The Centre Manifold for the Pure-Strategy Dynamic	23
(B) The Centre Manifold for the Mixed-Strategy Dynamic	24
9. Nonlinear Fitness Functions	25
(A) The Sex-Ratio Game	26
(B) ESS's and Stability	27
10. Appendix on Centre Manifold Theory	29
3. Frequency-Dependent Evolution in a Two-Species Haploid System	
1. Frequency-Dependent Fitness	31
2. Monomorphic ESS's and Stability	32
3. Examples: Battle-of-the-Sexes and Edgeworth Market Games	37
(A) Battle-of-the-Sexes	37
(B) Edgeworth Market Games	41
4. The Static Characterization of a Two-Species ESS	45
5. Strong Stability for the Continuous Dynamic	48
6. Multi-Species Frequency-Dependent Evolution	51
4. Frequency-Dependent Evolution in a Randomly-Mating Diploid Species	
1. Natural Selection as an Evolutionary Game	57
(A) The Frequency-Dependent Haploid Perspective	57
(B) The Frequency-Independent Diploid Perspective	61

2.	Single-Locus Models	64
3.	Two-Phenotype, Frequency-Dependent Evolution at a Single Locus	66
4.	Multi-Phenotype, Frequency-Dependent Evolution at a Single Locus	69
	(A) Examples	70
	(B) Linearization	72
5.	A Two-Locus, Two-Allele, Two-Phenotype Example	74
5.	Frequency- and Density-Dependent Evolution in a Haploid Species	
1.	Frequency- and Density-Dependent Fitness (and the Haploid Dynamic)	77
2.	Monomorphic DDESS's and Stability	78
3.	The Density-Dependent Hawk-Dove Game	82
	(A) Non-Aggressive Behavior Enhanced at High Density	83
	(B) Aggressive Behavior Enhanced at High Density	85
4.	The DDESS Conditions and Strong Stability	86
5.	Density-Dependent Natural Selection as a Haploid Evolutionary Game	89
6.	Evolutionary Stability in Multi-Species Population-Dynamic Models	92
	An Intermission	94
6.	Evolutionarily Stable Sets and Contestant Information	
1.	A Mixed-Strategy Hawk-Dove Game	95
2.	The Static Characterization of an ES Set	97
3.	The Dynamic Characterization of an ES Set	100
4.	The Hawk-Dove Game with Varying Resource	102
5.	ES Sets for Games in Extensive Form	104
6.	The Owner-Intruder Game	107
	(A) A Single-Species Extensive-Game Perspective	107
	(B) The Two-Species Perspective	110
7.	Multi-Stage Games	112
	(A) A Two-Trial Game	112
	(B) The Iterated Prisoner's Dilemma Game	118
7.	References	123
8.	Index	127
