

# Table of Contents

## Keynotes

|   |    |
|---|----|
| Processors and Their Collection . . . . .   | 1  |
| <i>Bertrand Meyer, Alexander Kogtenkov, and Anton Akhi</i>  |    |
| Tackling the Testing and Verification of Multicore and Concurrent<br>Software as a Search Problem . . . . . | 16 |
| <i>Lionel C. Briand</i>   |    |

## Papers

|  |    |
|--|----|
| Oversubscription of Computational Resources on Multicore Desktop<br>Systems . . . . .  | 18 |
| <i>Constantin Christmann, Erik Hebisch, and Anette Weisbecker</i>  |    |
| Capturing Transactional Memory Application's Behavior – The<br>Prerequisite for Performance Analysis . . . . .                         | 30 |
| <i>Martin Schindewolf and Wolfgang Karl</i>  |    |
| A Comparison of the Influence of Different Multi-core Processors on<br>the Runtime Overhead for Application-Level Monitoring . . . . . | 42 |
| <i>Jan Waller and Wilhelm Hasselbring</i>  |    |
| Analysis of Event Processing Design Patterns and Their Performance<br>Dependency on I/O Notification Mechanisms . . . . .              | 54 |
| <i>Ronald Strebelow and Christian Prehofer</i>   |    |
| Non-intrusive Coscheduling for General Purpose Operating Systems . . . .   | 66 |
| <i>Jan H. Schönherr, Bianca Lutz, and Jan Richling</i>   |    |
| Automatic Parallelization Using AutoFutures . . . . .  | 78 |
| <i>Korbinian Molitorisz, Jochen Schimmel, and Frank Otto</i>   |    |
| Invasive Computing: An Application Assisted Resource Management<br>Approach . . . . .  | 82 |
| <i>Andreas Hollmann and Michael Gerndt</i>   |    |

|  |           |
|--|-----------|
| Parallel Graph Transformations on Multicore Systems . . . . .                                      | 86        |
| <i>Gábor Imre and Gergely Mezei</i>  |           |
| Reduction of Electronic Control Units in Electric Vehicles Using<br>Multicore Technology . . . . . | 90        |
| <i>Georg Gut, Christian Allmann, Markus Schurius, and<br/>Karsten Schmidt</i>                      |           |
| <b>Author Index . . . . .</b>  | <b>95</b> |
