

# Inhaltsverzeichnis / Contents

## Eingeladene Beiträge / Invited Talks

### *Knowledge-based Generation of Illustrated Documents*

- Wolfgang Wahlster, Elisabeth André, Som Bandyopadhyay, Winfried Graf,  
Thomas Rist (Universität des Saarlandes, Deutschland) ..... 1

### *On the Complexity of Clause Condensing*

- Georg Gottlob (Christian Doppler Labor für Expertensysteme und  
Technische Universität Wien, Austria) ..... 16

## AI und Hypertext / AI and Hypertext

### *HESDE – A Hypertext based Expert-System debugging Tool*

- Craig Boyle, John Schuette (Texas A&M University, USA) ..... 30

## Natürliche Sprache / Natural Language

### *A Model of Task-oriented Communication Based on Principles of Rational Action and Interaction*

- Helmut Horacek (Universität Bielefeld, Deutschland) ..... 37

### *VIE-DU – Dialogue by Unification*

- Ernst Buchberger, Elizabeth Garner, Wolfgang Heinz, Johannes Matiassek,  
Bernhard Pfahringer (Österreichisches Forschungsinstitut für Artificial  
Intelligence, Austria) ..... 42

### *Eine deklarative Beschreibung von Linkstilungslücken in koordinierten Strukturen des Deutschen*

- Rudolf Hunze (Siemens AG, Deutschland) ..... 52

## Wissensbasierte Systeme / Knowledge-Based Systems

### *Applying Artificial Intelligence in Designing for Quality*

- Brian Lees (Paisley College, UK) ..... 63

### *Automatische Verfeinerung der Wissensbasis durch maschinelles Lernen in einem medizinischen Expertensystem*

- Bernhard Nagele, Gerhard Widmer, Werner Horn (Universität Wien und  
Österreichisches Forschungsinstitut für Artificial Intelligence, Austria) ..... 68

*Learning Diagnostic Rules for Power Distribution Systems*

|                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------|----|
| Andrea Leufke, Angelika Hecht, Regine Meunier, Ruxandra Scheiterer<br>(Siemens AG, Deutschland) ..... | 78 |
|-------------------------------------------------------------------------------------------------------|----|

**Neuronale Netze / Neural Networks***Modelling Feature Maps by Attributed Parallel Array Grammars*

|                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------|----|
| Rudolf Freund, Martina Kirchmeyer, Friedrich Taßill<br>(Technische Universität Wien, Austria) ..... | 83 |
|-----------------------------------------------------------------------------------------------------|----|

*Design of the SNNS Neural Network Simulator*

|                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------|----|
| Andreas Zell, Niels Mache, Tilman Sommer, Thomas Korb<br>(Universität Stuttgart, Deutschland) ..... | 93 |
|-----------------------------------------------------------------------------------------------------|----|

**Logik und Schließen / Logic and Automated Reasoning***Deductive Generalization and Meta-Reasoning or How to Formalize Genesis*

|                                                            |     |
|------------------------------------------------------------|-----|
| Gernot Salzer (Technische Universität Wien, Austria) ..... | 103 |
|------------------------------------------------------------|-----|

*A Generalized Factorization Rule Based on the Introduction of Skolem Terms*

|                                            |     |
|--------------------------------------------|-----|
| Uwe Egly (TH Darmstadt, Deutschland) ..... | 116 |
|--------------------------------------------|-----|

*On Exploiting the Structure of Martin-Löf's Theory of Types*

|                                                    |     |
|----------------------------------------------------|-----|
| Andrew Ireland (University of Edinburgh, UK) ..... | 126 |
|----------------------------------------------------|-----|

*Being Aware of Assumptions*

|                                                                              |     |
|------------------------------------------------------------------------------|-----|
| Maria R. Cravo, João P. Martins (Instituto Superior Técnico, Portugal) ..... | 137 |
|------------------------------------------------------------------------------|-----|

*A Mathematical Formulation of Dempster-Shafer's Belief Functions*

|                                                     |     |
|-----------------------------------------------------|-----|
| Chung-Hung Tzeng (Ball State University, USA) ..... | 147 |
|-----------------------------------------------------|-----|

*Qualitative Spatial Reasoning with Cardinal Directions*

|                                                                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Andrew U. Frank (National Center for Geographic Information and Analysis,<br>University of Maine, USA, and Technische Universität Wien, Austria) ..... | 157 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----|

*Model-Based Diagnosis with Constraint Logic Programs*

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Igor Mozetič, Christian Holzbaur (Österreichisches Forschungsinstitut für<br>Artificial Intelligence und Universität Wien, Austria) ..... | 168 |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
