

Contents

Introductory:

<i>R. Steiner</i>	
Angiogenesis – Historical perspective	1
<i>J. Folkman</i>	
Angiogenesis – Retrospect and outlook	4
<i>P. B. Weisz</i>	
Angiogenesis – The interdisciplinary challenge	14
<i>L. Sachs</i>	
Angiogenesis – Cytokines as part of a network	20
<i>R. Langer</i>	
Angiogenesis – Biomedical technology	23
<i>K. Hellmann</i>	
Angiogenesis – Time to review progress	26
<i>G. K. Uhlschmid</i>	
Angiogenesis – A new fascinating enigma for surgeons?!	29

Morphology

<i>P. H. Burri</i>	
Intussusceptive microvascular growth, a new mechanism of capillary network formation	32
<i>M. A. Konerding, C. van Ackern, F. Steinberg and C. Streffer</i>	
Combined morphological approaches in the study of network formation in tumor angiogenesis	40
<i>T. Ishibashi and S. J. Ryan</i>	
Maturation of newly-formed subretinal vessels	59
<i>H. C. Bauer, M. Steiner and H. Bauer</i>	
Embryonic development of the CNS microvasculature in the mouse: new insights into the structural mechanisms of early angiogenesis	64

<i>D. Virgintino, D. Ribatti, B. Nico, M. Bertossi and L. Roncali</i> Vascular supply in embryonic neural transplants	69
<i>J. R. Less, T. C. Skalak, E. M. Sevick and R. K. Jain</i> Microvascular network architecture in a mammary carcinoma ..	74
<i>I. Freitas, G. F. Baronzio, S. Barni, V. Bertone, O. Griffini, P. Accossato and P. Pontiggia</i> Tumor angiogenesis: evidence of new blood vessel channels from plasma infiltrations	81

Molecular Biology

<i>J. G. Beitz, I.-S. Kim, P. Calabresi and A. R. Frackelton</i> Receptors for platelet-derived growth factor on microvascular endothelial cells	85
<i>J. Korhonen, J. Partanen, E. Eerola, S. Vainikka, R. Alitalo, T. P. Mäkelä, M. Sandberg, H. Hirvonen and K. Alitalo</i> Five FGF receptors with distinct expression patterns	91
<i>A. Isacchi, L. Bergonzoni, M. Statuto, R. Chiesa, M. Rusnati, M. Presta, G. Ragnotti and P. Sarmientos</i> Activation of the tyrosine kinase receptor is not sufficient for the full biological activity of bFGF	101

Chemical Engineering

<i>P. B. Weisz, H. C. Hermann, M. M. Joullié, K. Kumor, E. M. Levine, E. J. Macarak and D. B. Weiner</i> Angiogenesis and heparin mimics	107
<i>C. L. Stokes</i> Endothelial cell migration and chemotaxis in angiogenesis	118

Cell Biology and Dynamics

<i>P. M. Gullino</i> Microenvironment and angiogenic response	125
<i>R. Montesano, M. S. Pepper, J.-D. Vassalli and L. Orci</i> Modulation of angiogenesis in vitro	129
<i>M. S. Pepper, J.-D. Vassalli, L. Orci and R. Montesano</i> Proteolytic balance and capillary morphogenesis in vitro	137
<i>M. A. Moses and R. Langer</i> Metalloproteinase inhibition as a mechanism for the inhibition of angiogenesis	146

<i>M. P. Piechocki, S. Kantak and J. M. Onoda</i> TPA-induced differentiation of rat aortic endothelial cells is substrate-specific and receptor mediated	152
<i>A. E. Canfield, A. B. Sutton, S. L. Schor, M. E. Grant and A. M. Schor</i> Aortic endothelial cells in culture: factors which modulate their morphological and biosynthetic phenotypes	158
<i>A. M. Schor, A. E. Canfield, A. B. Sutton, T. D. Allen, P. Sloan and S. L. Schor</i> The behaviour of pericytes in vitro: relevance to angiogenesis and differentiation	167
<i>N. Sato, N. Tsuruoka, M. Yamamoto, T. Nishihara, T. Goto</i> Identification of non heparin-binding endothelial cell growth factor from rat myofibroblasts	179
<i>S. M. Albelda</i> Differential expression of integrin cell-substratum adhesion receptors on endothelium	188
<i>P. Defilippi, C. Bozzo, M. Geuna, P. Rossino, L. Silengo and G. Tarone</i> Modulation of extracellular matrix receptors (integrins) on human endothelial cells by cytokines	193
<i>C. Jackson, K. Jenkins and L. Schrieber</i> Possible mechanisms of type I collagen-induced vascular tube formation	198
<i>M. Presta, M. Rusnati, C. Urbinati, E. Tanghetti, M. Statuto, A. Pozzi, A. Gualandris and G. Ragnotti</i> Basic fibroblast growth factor bound to cell substrate promotes cell adhesion, proliferation, and protease production in cultured endothelial cells	205
<i>G. Taraboletti, D. Belotti and R. Giavazzi</i> Thrombospondin modulates basic fibroblast growth factor activities on endothelial cells	210
<i>W. F. Herblin and J. L. Gross</i> Binding sites for basic fibroblast growth factor on solid tumors are associated with the vasculature	214
<i>M. Guthridge, J. Schmitt, J. Bertolini, J. Cowling, A. Runting, S. Katsahambas, A. E. Drummond and M. T. W. Hearn</i> Studies on basic fibroblast growth factor (FGF- β) gene expression in the rat and pig ovary using in situ hybridisation and quantitative reverse transcriptase- polymerase chain reaction techniques	219

<i>R. L. Smither and T.-P. D. Fan</i> Effects of platelet-activating factor on endothelial cells and fibroblasts in vitro	230
<i>J. Badet, F. Soncin and D. Barritault</i> Angiogenin and endothelial cells	235
<i>N. Mirsky and E. S. Lindenbaum</i> Cultured endothelial cell mobilization induced by partially purified human uterine angiogenic factor	239
<i>A. Amberger, U. Tontsch, O. Lemykin, G. Gabbiani and H. C. Bauer</i> Two cloned cerebral endothelial cell phenotypes: an in vitro model for angiogenesis?	244
<i>M. L. Brandi</i> Bone endothelial cells: A tool for analyzing cell to cell interactions in the skeletal tissue	250
<i>H. S. Sharma, M. Wünsch, M. Schmidt, R. J. Schott, R. Kandolf and W. Schaper</i> Expression of angiogenic growth factors in the collateralized swine myocardium	255
<i>H. C. Lichtenbeld and G. H. Blijham</i> Tumor cell spheroids induce a mitogenic response in endothelial cells	261
<i>J. M. Wang, R. D. Hunter and S. Kumar</i> A Monoclonal antibody (E-9) binds preferentially to the vasculatures of human tumours, embryonic and regenerating tissues	266
<i>D. Rusciano, P. Lorenzoni and M. M. Burger</i> Liver or lung colonization by F9 teratocarcinoma cells follows specific interactions with the target organ	272
<i>St. Riedl, P. Möller, A. Faissner and P. Schlag</i> Induction and altered distribution of tenascin in the basal lamina of colorectal adenomas and carcinomas	277

Assays and Models

<i>K. Norrby</i> On the quantitative rat mesenteric-window angiogenesis assay	282
---	-----

<i>D. A. Cox, S. Kunz, N. Cerletti, G. K. McMaster and R. R. Burk</i> Wound healing in aged animals – effects of locally applied transforming growth factor beta in different model systems ...	287
<i>G. Weckbecker, R. Liu and L. Tolcsvai</i> Intradermal angiogenesis in nude mice induced by human tumor cells or b-FGF	296
<i>L. B. G. B. Vieira, J. A. A. Rodrigues, V. H. R. Leite and S. P. Andrade</i> Angiogenic activity of PAF and inhibition of blood flow by <i>Bothrops Jararaca</i> venom in a mouse sponge model	302
<i>T-P. D. Fan, D-E. Hu, R. L. Smither and G. A. Gresham</i> Further studies on angiogenesis in a rat sponge model	308
<i>T-P. D. Fan, E. E. Frost and A. D. Wren</i> A multichannel wounding device for the study of vascular repair in vitro	315
<i>R. Adatia, L. Poggi, E. W. Thompson, R. C. Gallo, G. F. Fassina, and A. Albini</i> Assessment of angiogenic potential – the use of AIDS-KS cell supernatants as an in vitro model	321

Biomedical Technology

<i>R. Langer</i> Delivery systems for angiogenesis stimulators and inhibitors	327
<i>E. Wintermantel, L. Cima, B. Schloo and R. Langer</i> Angiopolarity of cell carriers: directional angiogenesis in resorbable liver cell transplantation devices	331
<i>A. I. Skene, R. J. L. Williams, R. D. Goldin and R. D. Rosin</i> Angiogenic vessels as a potential for targeted therapy in human liver metastases	335
<i>D. J. Kerr, J. A. Goldberg, J.R. Anderson, N. Wilmott, A. T. Whateley, C. S. McArdle and J. McKillop</i> The effect of angiotensin II on tumor blood flow and the delivery of microparticulate cytotoxic drugs	339
<i>T. M. Lam, N. E. Whereat, S. C. Henderson, W. H. Burgess, A. Shaheen and H. P. Greisler</i> Effects of hypercholesterolemia on monokine induced smooth muscle cell proliferation	346
<i>I. A. Burney, R. J. Maxwell, J. R. Griffiths and S. B. Field</i> Deuterium nuclear magnetic resonance imaging of the developmental pattern of tumour blood flow	357

<i>C. Thomas, C. Counsell, J. Sansom, P. Wood, I. Stratford and G. Adams</i>	
The perfluorocarbon emulsion PFOB: potential indicator of change in blood volume using fluorine 19 NMR spectroscopy	362
<i>M. Molls, H. J. Feldman and K. Sievers</i>	
Clinical investigations on blood perfusion in human malignancies of the pelvis and abdomen: significance for tumor therapy ...	368
<i>E. G. Salerud and S. Hellem</i>	
A bone tissue integrated single fibre laser Doppler flowmeter probe	373

Pharmacology and Medicine

<i>J. I. Stagner and E. Samols</i>	
Induction of angiogenesis by growth factors: relevance to pancreatic islet transplantation	381
<i>V. Lindner and M. A. Reidy</i>	
Role of basic fibroblast growth factor in proliferation of endothelium and smooth muscle after denuding injury in vivo	386
<i>M. D. Brown and O. Hudlicka</i>	
Capillary growth in the heart	389
<i>G. Imre and É. Csonka</i>	
Angiogenic role of lactic acid in the mechanism of neovascularization	395
<i>D. G. S. Thilo-Körner, U. Marre, N. Savion, F. W. Hehrlein, and R. H. Bodecker</i>	
Hyperoxia (145 mmHg pO ₂) and tissue normoxia (20–40 mmHg pO ₂) modulate human vascular cell functions ..	400
<i>M. Kamler, H.-A. Lehr, J. H. Barker, R. K. Saetzler, E. Uhl and K. Messmer</i>	
Impact of basic fibroblast growth factor (bFGF) on wound healing in chronically ischemic tissue	405
<i>C. Mothersill, C. B. Semour, D. Mulvin and T. P. Hennessy</i>	
Endothelial cell proliferation is induced by radiation in cultured explants of human urothelium and oesophageal mucosa	407
<i>L. Ghali and M. Dyson</i>	
The direct effect of light therapy on endothelial cell proliferation in vitro	411

<i>D. Ribatti, A. Vacca, W. Palma, M. Lospalluti and F. Dammacco</i> Angiogenesis during tumor progression in human malignant melanoma	415
<i>J. L. Gross, W. F. Herblin, K. Eidsvoog, R. Horlick and S. S. Brem</i> Tumor growth regulation by modulation of basic fibroblast growth factor	421
<i>I. J. Polakowski, K. Lewis and R. Auerbach</i> A protein RNase inhibitor (RNasin) expresses anti-angiogenic properties in mice	428
<i>Y. Persidsky and A. Frolov</i> Reactions of microvascular endothelial cells to tumor necrosis factor in vivo	432
<i>J. L. Ambrus, C. M. Ambrus, P. Forgach, S. Stadler, J. Halpern, S. Sayyid, P. Niswander and C. Toubis</i> Studies on tumor induced angiogenesis	436
<i>I. Harada, T. Kikuchi, Y. Shimomura, M. Yamamoto, H. Ohno and N. Sato</i> The mode of action of anti-angiogenic steroid and heparin	445
<i>R. Steiner</i> Angiostatic activity of anticancer agents in the chick embryo chorioallantoic membrane [CHE-CAM] assay.....	449
<i>M. Mariani, A. Paio, M. Ciomei, W. Pastori, C. Franzetti, G. Melegaro, M. Grandi and N. Mongelli</i> In vitro activity of novel sulphonic derivatives of distamycin A	455
<i>F. Sola, G. Biasoli, E. Pesenti, M. Farao, P. Della Torre, N. Mongelli and M. Grandi</i> In vivo activity of novel sulphonic derivatives of distamycin A	459
<i>S. Kumar, K. Saitoh and P. Kumar</i> Antiangiogenesis strategies in cancer therapy with special reference to Krestin	463

Notes

<i>M. S. Chapekar and K. C. Gunter</i> FDA regulations for growth factors and related products	471
---	-----

<i>F. Grossenbacher, R. Steiner, A. Schlosser, A. Escher, G. K. Uhlschmid</i> Angiogenesis in MEDLINE and beyond	479
