1	Introduction	1
2	Nomenclature	4
3	Material and Methods	5
4	Neopallial Wall	7
4.1	Perikarya and Nuclei	9
4.2	Inner and Outer Processes	15
4.3	Ventricular (Apical) Ends	19
4.4	Pial (Basal) Ends	19
4.5	Relations Between Columnar Cells	29
4.6	Mitotic Cells	29
4.7	Nerve Cells	31
4.8	Surrounding Tissues	31
5	Area Choroidea	32
5.1	Perikarya and Nuclei	34
5.2	Inner and Outer Processes	34
5.3	Apical Portions (Bulbous Protrusions)	38
5.4	Basal Portions	43
5.5	Relations Between Roof Cells	43
5.6	Cell Death	43
5.7	Comparison Between Columnar Cells in the Area Choroidea and the Telencephalic Wall	45
6	Discussion: Neopallial Wall	49
6.1	Nature of Columnar Cells	50
6.2	Columnar Cell Mitosis and Radial Growth	51
6.3	Cytogenesis of Columnar Cells	56
6.4	Organogenesis of the Telencephalic Wall	58
6.5	Functions of Columnar Cells	61
6.5.1	Mechanical Functions	61
6.5.2	Metabolic Functions	62
6.5.3	Germinal Functions	62

V

7	Discussion: Area Choroidea	63
7.1	Epithelial Polarity	63
7.2	Metabolic Functions	63
7.3	Transport of Fluid	64
7.4	Area Choroidea as a Gland	64
7.5	Absorptive Functions	65
8	Summary	67
	References	69
	Subject Index	74
