

Contents

Introduction	1
Basis of generic classification.....	2
The shape of the fruit-body.....	2
Spores.....	3
Setae.....	3
Extrahymenial setae.....	4
The surface of the pileus and its crust.....	5
Hyphal systems.....	7
Coltricioid hyphae.....	16
Hymenium.....	17
<i>Aurificaria</i>	18
<i>Coltricia</i>	20
<i>Coltriciella</i>	22
<i>Cyclomyces</i>	22
<i>Inonotus</i>	25
<i>Phellinus</i>	25
<i>Phylloporia</i>	26
<i>Coltricia cumingii</i> — <i>Phellinus pectinatus</i>	26
<i>Hydnochaete</i>	27
Growth rates of fruit-bodies.....	28
The origin of xanthochroic polypores.....	29
Names, types.....	31
Growth rates and resistance to desiccation in <i>Trametes</i>	31
Keys to identification.....	34
<i>Coltriciella</i>	43
Remainder (<i>Coltricia</i> , <i>Inonotus</i> , <i>Phellinus</i> , <i>Phylloporia</i>).....	51
<i>Hydnochaete</i>	164
New taxa.....	169
References.....	170
Index.....	171
Plates 1 and 2.....	176
