

Table of Contents

Session We.1: Intrabody Communications and Transmission of Patient Data

A Distributed-Parameter Approach to Model Galvanic and Capacitive Coupling for Intra-body Communications	1
<i>M. Amparo Callejón, Javier Reina-Tosina, Laura M. Roa, and David Naranjo</i>	
An Ultra-Low Power MAC Protocol for In-body Medical Implant Networks	9
<i>Ashutosh Ghildiyal, Balwant Godara, and Amara Amara</i>	
On the Effectiveness of Relaxation Theory for Controlling High Traffic Volumes in Body Sensor Networks	16
<i>Naimah Yaakob, Ibrahim Khalil, and Jiankun Hu</i>	
Design and Validation of a Secure Communication Platform for Mobile Health	24
<i>Beatriz Martín de Juan, Miguel Ángel Valero Duboy, Diana Soler, José Manuel Azorín, and Rafael Conde</i>	

Session We.2: ICT Technologies and Tools for Chronic Disease Management (Special Session)

Activity Recognition Using Smartphones and Wearable Wireless Body Sensor Networks	32
<i>Ioannis Kouris and Dimitris Koutsouris</i>	
Decision Support for the Remote Management of Chronic Patients	38
<i>Sara Colantonio, Giuseppe De Pietro, Massimo Esposito, Alberto Machi, Massimo Martinelli, and Ovidio Salvetti</i>	
Risk Assessment Models for Diabetes Complications: A Survey of Available Online Tools	46
<i>Lefteris Koumakis, Franco Chiarugi, Vincenzo Lagani, Angelina Kouroubali, and Ioannis Tsamardinou</i>	
Clinical Effectiveness of the “Healthwear” Wearable System in the Reduction of COPD Patients’ Hospitalization	54
<i>Alexis Milsis, Theodoros Katsaras, Nicolaos Saoulis, Evita Varoutaki, and Aggelos Vontetsianos</i>	
Towards an Accessible Personal Health Record	61
<i>Ioannis Basdekis, Vangelis Sakkalis, and Constantine Stephanidis</i>	

Developing 'Advanced Technology Services for Diabetes Management: User Preferences in Europe	69
<i>Angelina Kouroubali and Franco Chiarugi</i>	

Session We.3: Advances in Wireless Implantable Devices (Special Session)

Wireless Microrobotic Oxygen Sensing for Retinal Hypoxia Monitoring	75
<i>Olgaç Ergeneman, George Chatzipirpiridis, Salvador Pané, Georgios A. Sotiriou, Christos Bergeles, and Bradley J. Nelson</i>	
Meandered versus Spiral Novel Miniature PIFAs Implanted in the Human Head: Tuning and Performance	80
<i>Asimina Kiourti and Konstantina S. Nikita</i>	
A Radio Channel Model for In-body Wireless Communications	88
<i>Kamya Yekeh Yazdandoost</i>	
Parametric Study and Design of Implantable PIFAs for Wireless Biotelemetry	96
<i>Asimina Kiourti, Michalis Tsakalakis, and Konstantina S. Nikita</i>	
In Vitro and In Vivo Operation of a Wireless Body Sensor Node	103
<i>Francesco Merli, Léandre Bolomey, François Gorostidi, Yann Barrandon, Eric Meurville, and Anja K. Skrivervik</i>	
Recent Results in Computer Security for Medical Devices	111
<i>Shane S. Clark and Kevin Fu</i>	

Session We.4: Mobile Devices for Patient Monitoring

Wearable System for EKG Monitoring - Evaluation of Night-Time Performance	119
<i>Antti Vehkaoja, Jarmo Verho, Alper Cömert, Markku Honkala, and Jukka Lekkala</i>	
A Smartphone-Based Healthcare Monitoring System—PHY Challenges and Behavioral Aspects	127
<i>Nabil Alrajeh, Ezio Biglieri, Bouchaïb Bounabat, and Angel Lozano</i>	
Phone Based Fall Risk Prediction	135
<i>Vânia Guimarães, Pedro M. Teixeira, Miguel P. Monteiro, and Dirk Elias</i>	

Infusing Image Processing Capabilities into an RFID-Based Personal Mobile Medical Assistant	143
<i>Konstantinos Sidiropoulos, Pantelis Georgiadis, Nikolaos Pagonis, Nikolaos Dimitropoulos, Pantelis Asvestas, George Matsopoulos, and Dionisis Cavouras</i>	
Securing Medical Sensor Network with HIP	150
<i>Dmitriy Kuptsov, Boris Nechaev, and Andrei Gurtov</i>	

Session Th.1: Healthcare Telemetry and Telemedicine

Development of an mHealth Open Source Platform for Diabetic Foot Ulcers Tele-consultations	158
<i>George E. Dafoulas, Stylianos Koutsias, Joachim Behar, Juan Osorio, Brian Malley, Alexander Gruentzig, Leo Anthony Celi, Pantelis Angelidis, Kyriaki Theodorou, and Athanasios Giannoukas</i>	
Towards Continuous Wheeze Detection Body Sensor Node as a Core of Asthma Monitoring System	165
<i>Dinko Oletic, Bruno Arsenali, and Vedran Bilas</i>	
Reduced Power Consumption for 3GPP-Compliant Continua Health Devices by Deployment of Femtocells in the Home Environment	173
<i>Edward Mutafungwa, Zhong Zheng, and Jyri Hämläinen</i>	
A New Platform for Delivery Interoperable Telemedicine Services	181
<i>Foteini Andriopoulou and Dimitrios Lymberopoulos</i>	
Social Media in Healthcare - User Research Findings and Site Benchmarking	189
<i>Timo O. Korhonen, Maija Pekkola, and Christos Karaiskos</i>	

Session Th.2: ICT Platforms and Technologies for the Daily Management of Chronic Diseases and the Support of the Ageing Population (Special Session)

Diabetes Management: Devices, ICT Technologies and Future Perspectives	197
<i>Emmanouil G. Spanakis and Franco Chiarugi</i>	
Exploring New Care Models in Diabetes Management and Therapy with a Wireless Mobile eHealth Platform	203
<i>Jesper Thestrup, Tamas Gergely, and Peter Beck</i>	

A Mobile Android-Based Application for In-hospital Glucose Management in Compliance with the Medical Device Directive for Software	211
<i>Stephan Spat, Bernhard Höll, Peter Beck, Franco Chiarurgi, Vasilis Kontogiannis, Manolis Spanakis, Dimitris Manousos, and Thomas R. Pieber</i>	
Ontology-Driven Monitoring of Patient's Vital Signs Enabling Personalized Medical Detection and Alert	217
<i>Anna Hristoskova, Vangelis Sakkalis, Giorgos Zacharioudakis, Manolis Tsiknakis, and Filip De Turck</i>	
A Mobile Reasoning System for Supporting the Monitoring of Chronic Diseases	225
<i>Aniello Minutolo, Massimo Esposito, and Giuseppe De Pietro</i>	
Using SOA for a Combined Telecare and Telehealth Platform for Monitoring of Elderly People	233
<i>Georgios Lamprinakos, Stefan Asanin, Peter Rosengren, Dimitra I. Kaklamani, and Iakovos S. Venieris</i>	
Session Th.3: Patient Monitoring and Management	
Adaptive Assistance: Smart Home Nursing	240
<i>Nikola Serbedzija</i>	
Ubiquitous Healthcare Profile Management Applying Smart Card Technology	248
<i>Maria-Anna Fengou, Georgios Mantas, Dimitrios Lymberopoulos, and Nikos Komninos</i>	
Identifying Chronic Disease Complications Utilizing State of the Art Data Fusion Methodologies and Signal Processing Algorithms	256
<i>John Gialelis, Petros Chondros, Dimitrios Karadimas, Sofia Dima, and Dimitrios Serpanos</i>	
A Support Vector Machine Approach for Categorization of Patients Suffering from Chronic Diseases	264
<i>Christos Bellos, Athanasios Papadopoulos, Roberto Rosso, and Dimitrios I. Fotiadis</i>	
Combined Health Monitoring and Emergency Management through Android Based Mobile Device for Elderly People	268
<i>Miklos Kozlouszky, János Sicz-Mesziár, János Ferenczi, Judit Márton, Gergely Windisch, Viktor Kozlouszky, Péter Kotcauer, Anikó Boruzs, Pál Bogdanov, Zsolt Meixner, Krisztián Karóczkai, and Sándor Ács</i>	

Session Th.4: Mobile and Wireless Technologies for Healthcare Delivery and Emergency

An ISO-Based Quality Model for Evaluating Mobile Medical Speech Translators	275
<i>Nikos Tsourakis and Paula Estrella</i>	
An Interdisciplinary Approach to Emergency Responder Mobile Technology Design	284
<i>Patricia Collins and Sean Lanthier</i>	
TOPS - System for Planning and Providing the Health and Social Services at the Home Environment of Clients	292
<i>Tomáš Váša, David Žák, and Jiří Lebduska</i>	
A Data Synchronization Framework for Personal Health Systems	300
<i>Davide Capozzi and Giordano Lanzola</i>	
Service-Oriented Middleware Architecture for Mobile Personal Health Monitoring	305
<i>Matts Ahlsén, Stefan Asanin, Peeter Kool, Peter Rosengren, and Jesper Thestrup</i>	
Inactivity Monitoring for People with Alzheimer's Disease Using Smartphone Technology	313
<i>Nicola Armstrong, Chris Nugent, George Moore, Dewar Finlay, and William Burns</i>	

Session Fr.1: Measurement and Monitoring Technologies

Performance of a Near-Field Radio-Frequency Pressure Sensing Method in Compression Garment Application	322
<i>Timo Juhani Salpavaara, Jarmo Verho, and Pekka Kumpulainen</i>	
Hybrid Vital Sensor of Health Monitoring System for the Elderly	329
<i>Dong Ik Shin, Ji Hoon Song, Se Kyeong Joo, and Soo Jin Huh</i>	
Low-Cost Blood Pressure Monitor Device for Developing Countries	335
<i>Carlos Arteta, João S. Domingos, Marco A.F. Pimentel, Mauro D. Santos, Corentin Chiffot, David Springer, Arvind Raghu, and Gari D. Clifford</i>	
Telemedical System for Diagnosis and Therapy of Stress Related Disorders	343
<i>Stefan Hey</i>	

An Integrated Approach towards Functional Brain Imaging Using Simultaneous Focused Microwave Radiometry, Near-Infrared Spectroscopy and Electroencephalography Measurements	351
<i>Panagiotis Farantatos, Irene Karanasiou, and Nikolaos Uzunoglu</i>	

Session Fr.2: Ambient Assistive Technologies for Pervasive Healthcare Services (Special Session)

A New Home-Based Training System for Cardiac Rehabilitation	358
<i>Christian Menard and Raimund Antonitsch</i>	
Context-Aware System for Neurology Hospital Wards	366
<i>Ingrid Flinsenberg, Roel Cuppen, Evert van Loenen, Elke Daemen, and Roos Rajae-Joordens</i>	
Towards Utilizing Tcpcrypt in Mobile Healthcare Applications	374
<i>Stefanos A. Nikolidakis, Vasileios Giotsas, Emmanouil Georgakakis, Dimitrios D. Vergados, and Christos Douligeris</i>	
An Access Control Framework for Pervasive Mobile Healthcare Systems Utilizing Cloud Services	380
<i>Mikaela Poulymenopoulou, Flora Malamateniou, and George Vassilacopoulos</i>	
Distributed Management of Pervasive Healthcare Data through Cloud Computing	386
<i>Charalampos Doukas, Thomas Pliakas, Panayiotis Tsanakas, and Ilias Maglogiannis</i>	
Efficient Exploitation of Parallel Computing on the Server-Side of Health Organizations' Intranet for Distributing Medical Images to Smart Devices	394
<i>Athanasios Kakarountas and Ilias Mavridis</i>	

Workshop We.1: Electromagnetic Issues in Advanced Mobile Healthcare Applications

Body Absorbed Radiation and Design Issues for Wearable Antennas and Sensors	399
<i>Stavros Koulouridis</i>	
Development of a FDTD Simulator for the Calculation of Temperature Rise in Human Heads from Mobile Phones Operation	403
<i>Adamos G. Kyriakou, Elias Aitides, and Michael T. Chryssomallis</i>	
Numerical Assessment of EEG Electrode Artifacts during EMF Exposure in Human Provocation Studies	408
<i>Maria Christopoulou, Orestis Kazasidis, and Konstantina S. Nikita</i>	

Workshop Fr.1: Mobile Systems and Technologies for Patient Safety, Guidance and Empowerment

On Location-Based Services for Patient Empowerment, Guidance and Safety	416
<i>Andreas K. Triantafyllidis, Vassilis G. Koutkias,</i>	
<i>Ioannis Moulos, and Nicos Maglaveras</i>	
Author Index	423
