Melanoma and Other Melanocytic Skin Lesions

D. WEEDON

Introduction	2
1. Lesions with Basal Hyperpigmentation	2
2. Lesions with Basal Melanocyte Proliferation	2
2.1 Lentigo Simplex	2
2.2 Solar Lentigo	3
2.3 Becker's Melanosis	3
2.4 Café au Lait Spots	4
2.5 Lentiginous Naevus	4
2.6 Speckled Lentiginous Naevus	4
2.7 PUVA Lentigo	5
3. Melanocytic Naevi	5
3.1 Junctional Naevi	5
3.2 Compound Naevi	6
3.3 Intradermal Naevi	6
3.4 Balloon Cell Naevus	8
3.5 Halo Naevus	8
3.6 Spitz Naevus	9
3.7 Congenital Naevus	12
4. Dermal Melanocytic Lesions	14
4.1 Mongolian Spot	14
4.2 Naevus of Ota and Ito	14
4.3 Blue Naevus	15
4.4 Dermal Melanocyte Hamartoma	16
5. Dysplastic Naevus Syndrome	16
5.1 Clinical Features	16
5.2 Histological Features	17
5.3 Other Features	19
6. Malignant Melanoma	20
6.1 Lentigo Maligna Melanoma	21
6.2 Superficial Spreading Melanoma	22
6.3 Nodular Melanoma	22
6.4 Acral Lentiginous Melanoma	22
6.5 Desmoplastic Melanoma	25
6.6 Minimal Deviation Melanoma	27
6.7 Other Variants	27
6.8 Prognostic Factors in Malignant Melanoma	28
6.9 Special Techniques in Diagnosis	40
References	42

Cutaneous Vasculitis

T.J. RYAN and S.M. BURGE

1.	Identification of Vessels	58
1.1	Functions of Endothelium . Disrupted by Injury	63
1.2	Local Factors Which Alter Endothelial Cell Function	64
2.	Consequences of Injury	65
2.1	Ischaemia	65
2.2	Lymphoedema	68
3.	Diagnosis of Vasculitis	68
3.1	The Endothelial Cell as a Marker for Vasculitis	68
3.2	Leucocytoelasia	70
3.2.1	Lymphocytic Angiitis	70
3.2.2	Immunofluorescent Studies	71
3.2.3	Fibrinoid Necrosis	71
3.2.4	Age of the Lesion	74
3.2.5	Site and Depth	74
3.2.6	The Diagnosis of Histopathologic Pattern	75
3.2.7	Arteritis	76
3.2.8	Fitting the Pathology to the Clinical Picture	80
3.2.9	Erythema Nodosum, Nodular Vasculitis and Panniculitis	80
3.2.10	The Granulomatous Diseases	84
3.3	Cranial (Giant Cell) Arteritis	86
3.4	Leucocytoclastic Angiitis	86
4.	Mixed Vasculitis	90
4.1	Septic Vasculitis	91
4.2	Cryoglobulinaemia	93
	References	98

Genetic and Developmental Aspects of Pathological Pigmentation Patterns

R.B. GOUDIE, A.S. JACK, and B.M. GOUDIE*

1.	Introduction	103
2.	Overview of Melanin Pigmentation of Skin and Hair	104
3.	Pattern Formation in Embryogenesis	105
4.	Clonal Origin of Pigment Patterns in Mice	106
5.	Skin Pigmentation in Human Chimaeras	110
6.	Skin Pigmentation in Presumed Human Mosaics	114
7.	Syndromes Associated with Lentigines	115
7.1	Moynahan's Syndrome	116
7.2	Peutz-Jeghers Syndrome	116
7.3	Partial Unilateral Lentiginosis	117
7.4	Multiple Lentigines with a Harlequin Pattern	118
8.	Piebaldism	121
9.	Partial Albinism with Deafness	123
10.	Vitiligo	124
10.1	Inheritance	125
10.2	Pattern of Lesions in Vitiligo	127
10.2.1	Symmetry	127
10.2.2	Texture	127
10.2.3	Site	128
10.3	Role of Local Tissue Injury (Köbner Phenomenon)	128
10.4	Anatomical Basis of Vitiligo Patterns	129
10.5	Inheritance of Vitiligo Patterns	131
10.6	Vitiligo Simulating Internal Autoimmune Disease	133
10.7	Halo Naevi	133
10.8	Segmental Vitiligo	134
11.	Conclusions	135
