1	INTRODUCTION	1
2	INTEGRAL EQUATION FORMULATIONS OF THE EXTERIOR HELMHOLTZ PROBLEM	3
2.1	Introduction	3
2.2	Basic Integral Equation Formulations	4
2.2.1	Indirect Integral Equation Formulations of the Exterior Helmholtz Problem	6
2.2.2	Direct Integral Equation Formulations of the Exterior Helmholtz Problem	7
2.3	Basic Integral Equation Theory	9
2.4	Improved Integral Equation Formulations	15
2.4.1	Indirect Formulations	16
2.4.2	The Method of Schenck and Related Direct Formulations	17
2.4.3	The Burton and Miller Formulation	18
2.4.4	Modified Green's Function Formulations	22
2.4.5	Comparison of Approaches	23
3	NUMERICAL SOLUTION OF THE EXTERIOR HELMHOLTZ PROBLEM	25
3.1	Numerical Methods for Solving Integral Equations	25
3.1.1	Nyström Method	25
3.1.2	Degenerate Kernel Method	26
3.1.3	Projection Methods	27
3.1.4	An Application of the Collocation Method	29
3.2	Surface Representation	32
3.3	Numerical Quadrature	35
3.3.1	Axisymmetric Elements	36
3.3.2	Three-Dimensional Elements	38
3.4	The Choice of the Coupling Parameter	40
3.5	Numerical Results	50
4	THE DYNAMIC FLUID-STRUCTURE INTERACTION PROBLEM	57
4.1	Introduction	57
4.2	Finite Element Analysis of the Structure	58
4.2.1	Finite Element Analysis of an Axisymmetric Structure	59
4.2.2	Finite Element Analysis of a Three-Dimensional Structure	62
4.3	The Coupled Equations of Motion	65
4.4	The Conditioning of the Coupled Equations	68
4.5	Numerical Results	71

5	THE DETERMINATION OF THE RESPONSE FROM SONAR TRANS-	
	DUCERS	84
5.1	An Introduction to Piezoelectric Sonar Transducers	84
5.2	Loading on the Structure	85
5.3	Experimental Determination of the Response	86
5.4	Results and Conclusions	87
