Special Lectures

Quantitative Flow Visualization of Three-Dimensional Flows C.J. Chen, L.J. Chen and Y.G. Kim	3
Visualization of Combusting Flows J.H. Whitelaw	12
Advances in Computer-Aided Flow Visualization T. Kobayashi	25

1. Internal Flow

1.1 Flows in Chamber

Use of a Colored Water Surface Flow Visualization Technique in a Supersonic Wind Tunnel to Investigate Cavity Flow Fields F.J. Wilcox, Jr.	41
Visualization of Gravity Current Flow Using Laser-Induced Dye Fluorescence W.D. Peters, C.R. Dutcher and J.E.S. Venart	46
Flow Analysis Inside a Passenger Car Silencer by Laser Light-Sheet and Coded Particle Trace Techniques W. Hentschel and S. Hehn	51
Diagnostic System for Fluid Science Experimentation in Microgravity: VIS V.De Chiara, C. Mirra, P.G. Falciani, M. Tacconi and S. Musazzi	56
Visualization of Unsteady Flow in Rotating Drums W.J. Yang, G. Kawashima and H. Ohue	62
Flow Visualization of Liquid Crystalline Polymer Solutions in Rectangular Channels S. Guido, N. Grizzuti and G. Marrucci	67
The Viscoelastic Rayleigh-Benard Convection Investigated by Different Optical Methods B. Gampert and J. Domjahn	72

1.2 Flows in Pipe and Channel

Secondary Flow Phenomena in Curved Pipes and Rotating Channels (Keynote Paper) K.C. Cheng	79
An Application of Hydrogen Bubble Method to Flow Networks N. Zhang, W.J. Yang, Y. Xu and C.P. Lee	90

Numerical Simulation of Viscoelastic Fluid in Two Dimensional Channel Junctions

S. Goto and H. Kato 97

Vortex Formation in a T-Junction

B. Bartmann, R. Nelkes, T. Leweke, W. Limberg and E. Krause 102

Steady and Oscillatory Flows in a Furrowed Channel with Arc-Shaped Walls

T. Nishimura and Y. Kawamura 107

Visualization of the Flow in the Passage Between Two Coaxial Cones

K. Balatka, S. Mochizuki, A. Murata and Y. Yagi 112

1.3 Flows in Bio-System

Visualization of Velocity Profile in Blood-Related Flow by Laser Technique (Keynote Paper)

K. Ohba 119

In-Vitro Flow Visualization of Mitral Valve Regurgitation: Laser Flow Visualization, Color Doppler Flow Mapping and Coated Albunex Particles

E. Rambod, S.S. Khan, D.T. Allen, S. Einav, G. Maurer and J. Matloff 125

Holographic Diagnostics of Transfer Processes in Capillary Flows

O.G. Lysenko and N.A. Karbalevich 130

2. Jets and Turbulence

2.1 Jets

Subsonic Jet Visualization

T.M. Makarenko, T.U. Volnova, T.N. Bezmenova and V.I. Ribakov 137

Visualizing and Characterizing Free Jets Flow with Laser Velocimetries

A. Cenedese, G. Doglia, G.P. Romano and G. Tanzini 142

Visualization of Sub-Nozzle Jet of Air Jet Looms

R. Shintani and A. Okajima 148

Two-Dimensional Time-Resolving Concentration Measurement of Turbulent Mixing Layers

T. Hasegawa, S. Yamaguchi, T. Amano and H. Gotoh 153

Flow Visualization of Jet Flow in the High Speed Switching Spool Valve

T. Tsukiji and M. Soshino 158

Interaction Between Impulse Jet and Flat Plate

O.V. Bulat, V.V. Golub, V.N. Lyakhov and A.M. Shulmeister 163

A Flow Visualization Study of Chaotic Vortical Motion in the Near Field of a Planar Jet

F.O. Thomas and J.W. Cutbirth 168

A Visual Study of a Round Jet in Cross-Flow

R.M. Kelso, T.T. Lim and A.E. Perry 173

Aerodynamic Study on Flow Characteristics of a Fluidics Y. Oshima, Y. Watanabe, Y. Ishii, H. Kondoh and T. Takamiya	178
Direct Shadow Method Application to Aero-Acoustic Interaction Investigation V.G. Pimschtein	183
2.2 Vortices	
Visualization of the Turbulent Vortex Ring Oscillations V.F. Koplev, M.Yu. Zaitsev, V.A. Yakovlev and L.P. Guriashkin	191
Structure of a Starting Vortex T. Leweke and T. Sawada	196
A Visualization Study on Necklace and Shedding Vortices Around a Three-Dimensional Protuberance H. Yamada and H. Osaka	201
In-Depth Analysis of Couette-Taylor Flows by Means of Rotating Laser Beams G. Semon, J.P. Prenel, R. Porcar and G. Cognet	206
Visualization of Curtain Coating Flows Y. Kashiwabara, S. Ogawa and K. Ozaki	211
2.3 Turbulent Flows	
Visual Representation of Single Point Measurements in Turbulent Spots (Keynote Paper) J.P. Gostelow	217
Measurement of the Spatial Stationary and Time Variable Velocity Distribution of Airflow Using Tracer Particles and Still Video Techniques L. Besse, G. Gottschalk, A. Moser and P. Suter	223
Study of a Turbulent Boundary Layer, Using High Speed Tomography M. C. Hoyez, J.C. Monnier and M. Stanislas	228
A Novel Soap-Film Tunnel for Studying Two-Dimensional Flows M. Gharib and M. Beizale	233
Detection of Coherent Structures in LDV Data Using Combined Visualization in Square Duct Flow G. Kawahara, K. Ayukawa, J. Ochi and T. Watanabe	238
Quantitative, Four-Dimensional, Laser Induced Fluorescence Imaging Studies of Scalar Mixing in Turbulent Flows W.J.A. Dahm and K.B. Southerland	243
Visualization of Mixing and Residence Time Characteristics of the Flow in Static Mixers and Structured Packings G. Gaiser	248

3. Flows Around Bodies

3.1 Flows Around Moving Bodies

Flow Visualization of the Leading Edge Vortices on Slender Wings Undergoing Large Amplitude Unsteady Motions R.C. Nelson and S.A. Thompson	255
Flow Visualization Study of Vortex Breakdown on a 65° Delta Wing in Dynamic Motion Regime G. Guglieri, M. Onorato and F. Quagliotti	260
In-Flight Flow Visualization Results from High Angle of Attack Tests on a Forward Swept Wing Aircraft with Comparisons to Water Tunnel Results J.H. Del Frate	265
On the Boundary-Layer Control Through Momentum Injection: Numerical, Flow Visualization, and Experimental Studies V.J. Modl and T. Yokomizo	270
The Effect of Car Configurations on the Flow Around Elevator Models H. Matsuda, Y. Fukuyama, Y. Yokono and K. Miyasako	275
Some New Applications of the Fluorescent Mini Tuft Technique Z. Wang	280
Flow Field Around a Rotating Wheel A. Cogotti	284
Visualization of Flow Phenomena in and around a Savonius Rotor N. Fujisawa	289
 3.2 Flows Around Columns	
Flow Around a Cylinder with Helical Surface Perturbations J.V. Nebres, H.H. Nigim and S.M. Batili	297
Generation of the Karman Vortex Street at Low Reynolds Number by Cooling a Circular Cylinder K. Noto and T. Nakajima	302
Flow Visualization of Separation Bubble on a Circular Cylinder Y. Tomonari and M.M. Zdravkovich	307
Visualization of Flow Control Around a Circular Cylinder by a New Method T. Igarashi	312
Visualization of Flow Past Inclined Bluff Cylinders S.C. Luo, T.S. Lee, Y.T. Chew and M.G. Yazdani	317
Vortex Wake Visualizations of Two Circular Cylinders in Parallel K. Ohmi and K. Imaichi	322
Flow Around a Circular Cylinder with and without Grooves M. Oki, M. Suehiro, H. Okanaga, K. Aoki, Y. Nakayama and T. Okumoto	327

Synchronous Visualization of Flow Patterns and Correlative Physical Parameters	
Q. Wei, W. Wang, C.L. Li and X. Du	333
Application of Flow Visualization to the Study of Very Long Cylinders in Near-Axial Flow	
M.K. Bull and W.A. Dekkers	338
Experimental and Numerical Visualization of the 3D Flow Around a Short Circular Cylinder Fitted with Endplates	
G. Pineau, A. Texier, M. Coutanceau and T.P. Loc	343
A Visual Study of the Flow Around an Oscillating Cylinder in a Stratified Fluid at Rest	
M. Tatsuno	348
Application of an Electrolysis Method for Flows Around Ellipsoids	
N. Nishikawa, Y. Niimura and S. Kida	353
Flow Visualization of Karman Vortex in Shear and Turbulent Flow	
S. Saito, M. Hashimoto and Y. Higuchi	358
Study of Holography Applied to the Piles Structure for Wave Damping in Sea Shore	
K. Dan and M. Yano	363
Direct Measurement of the Density Field Using High Speed Differential Interferometry	
J.M. Desse and J.C. Pegneaux	368
Visualization of Flow Around Rectangular Cylinders with Phase-Averaging Technique	
A. Okajima, H. Ueno and T. Nakamura	373
Visualization of the Flow Around Surface-Mounted Prismatic Obstacles	
R. Martinuzzi and A. Melling	378
An Interferometric Study on Vortex Shedding from Trapezoidal Prisms in Transonic Flow	
T. Nakagawa	383
Flow Visualization Study of Flow Past an Oscillating Square Cylinder	
S.C. Luo	388

4. Multiphase Flows

Visualization of Particulate Two-Phase Flow (Keynote Paper)	
M.C. Roco	393
Rising Bubble Behavior in Air-Particle Injection by Means of Image Processing	
S. Torii and W.J. Yang	399
Application of Real-Time Neutron Radiography to Visualization and Measurement of Thermal Hydraulic Phenomena	
N. Takenaka, T. Fujii, A. Ono, K. Sonoda, S. Tazawa and T. Nakanii	404

Application of Digital Image Processing in Two-Phase Flow B. Donevski, T. Saga, T. Kobayashi and M. Shoukri	409
A Transmission-Mode Ultrasound Computerised Tomographic System for Gas/Liquid Two-Phase Flow Visualization L. Xu and Z. Chen	414
High-Speed Photography, High-Speed Cinematography and High-Speed Holography as Tools to Investigate Fast Flows (Keynote Paper) F. Eilsfeld	419
Laser Light-Sheet Visualization of the Spatial Evolution and Mixing of Coherent Droplet Structures J.M. Grace and P.F. Dunn	426
Automatic Assessment of Aerosol Holograms for Granulometry and Velocimetry C. Geller, M. Stanislas, H. Royer and T. Fournel	431

5. Thermal Problems

5.1 Liquid Crystal

Liquid Crystal Thermography and Image Processing in Heat and Fluid Flow Experiments (Keynote Paper) J. Stasiek and M.W. Collins	439
Opto-Thermal Properties of Water Suspensions of Thermo-Sensitive Liquid-Crystal Particles N. Akino, S. Sagiya and M. Nakanishi	451
Visualization of Temperature and Flow Fields Using Liquid Crystals in the Fluid Region During Various Solidification Processes T. Nishimura, M. Fujiwara and H. Miyashita	456

5.2 Heat Transfer

Numerical Analysis and Visualization of Air Ventilation Systems (Keynote Paper) M. Akiyama, H. Sugiyama, N. Ninomiya and A. Leoni-Schmid	463
Three-Dimensional Concentration Measurement in a Ventilated Room Model Through Digital Image Processing A.Kaga, Y. Inoue and K. Yamaguchi	469
Visualization of 3-D Natural Convection W.J. Hiller, St. Koch, T.A. Kowalewski, P. Mitgau and K. Range	474
Flow Visualization of Natural Convection in a Vertical Fluid Layer with Internal Heating Z. Kawara, I. Kishiguchi, N. Aoki and I. Michiyoshi	479
Numerical Analysis on Two-Dimensional Flow and Heat Transfer in Compact Heat Exchangers of Louvered Fins C.S. Kang, J.L. Sohn, T.M. Choi and J.H. Lee	484

Automatic Analysis of Thermocolor Paints for Heat Flow Measurements in Wind Tunnel Facilities X. Briottet and M. Dinguirard	489
Transport Phenomena in Fluid Flow of Finned Tube Heat Exchangers P. Geiser and V. Kottke	494
Visualization of Flow Phenomena Behind Rows of Vortex Generators in Internal Flow E. Hochdorfer and V. Kottke	499
Visualization of Flow Mixing Mechanisms in Pin-Fin Arrays K. Minakami, S. Mochizuki, A. Murata, Y. Yagi and H. Iwasaki	504
Thermal Design Approach for a Copy Machine by Use of Flow Visualization and a Personal Computer M. Ishizuka and T. Sasaki	509
Flow Visualization and Heat Transfer Measurements by Infrared Thermography (Keynote Paper) G.M. Carlomagno	514
Three-Dimensional Heat Flow Visualization with a Laser Holographic Interferometry S. Kato and N. Maruyama	520
Temperature Measurement of Transonic Nozzle Flow by Laser-Induced Fluorescence Method M. Inoue, M. Masuda, T. Muraishi and Y. Hyakutake	525
Heat Transfer Visualization of Light Emitting Diode by Means of Infrared Radiometer N. Tsuyuzaki, S. Sekiya, F. Kaminaga and Y. Okamoto	530
A New Technique for Visualization and Determination of Local Mass Transfer at Solid Walls in Liquid Flow V. Kottke, W. Kuhnelt and S. Becker	535
Taylor-Goertler Instability in Sinusoidal Wavy Channels V. Kottke, G. Gaiser and P. Gschwind	540
Determination of Temperature Fields Above Plates with Different Geometry Heated by Moist Air S. Urgela and O. Luptac	545
Photochromic Flow Visualization in Non-Isothermal Liquid-Liquid Two-Phase Flow C. Mansson, J. Maddren and E. Marschall	550
Droplet Dispersion in Turbulent Flow P. Hebrard, Y. Biscos, P. Berthoumieu and P. Trichet	555

5.3 Combustion

Test Facility for the Flow Structure Study in the Supersonic Combustion Chamber S.I. Baranovsky, D.M. Davidenko and V.M. Levin	565
--	-----

The Structure of Conical Methane-Air Flames A.A. Konnov, I.V. Dyakov and G.I. Ksandopulo	570
Analysis of Swirl Formation in the Combustion Chamber of a Direct- Injection Diesel Engine W. Hentschel and K.-P. Schindler	575
Visualization of Counterflow Flames E. Mastorakos and A.M.K.P. Taylor	580
Oscillation of Impingement Flow in a Combustor with Dual Side-Inlets T.M. Liou, Y.Y. Wu and S.M. Wu	585
Flow Visualization and Quantitative Evaluation of the Effect of Bore/Stroke Ratio on Swirl in a Piston Engine A. Mikulec and J.C. Kent	590
Roll-up Vortex on the Reciprocating Piston in a Cylinder T. Obokata and A. Okajima	594
 6. Shock Waves	
Visualization of Shock Wave Propagation Through Curved Channels (Keynote Paper) N.P. Mende	601
Flow Visualization of Secondary Separation and Oscillating Shock Waves in Three-Dimensional Shock Waves-Turbulent Boundary Layer Interaction Regions S. Aso, K. Karashima, K. Sato, S. Okuyama and S. Maekawa	607
Measurement of Oscillating Shock Wave in Supersonic Nozzles K. Matsuo and H.D. Kim	612
Pressure Visualization on Aerodynamic Surface by the Method of Luminescent Coating G.M. Zharkova, A.I. Maksimov, A. Pavlov and V.M. Khachatryan	617
Visualization of a Pseudo-Shock Wave in a Rectangular Duct H. Sugiyama, T. Arai, N. Uno, T. Matsumoto and M. Homareda	623
An Overview of Planar Laser Scattering for the Visualization of High-Speed Airflows (Keynote Paper) G.S. Settles	628
Infrared Imaging in Cryogenic Wind Tunnels E. Gartenberg	634
Gas Flows Imaging by Nanosecond Gas Discharge A.A. Alyapin, I.V. Filouguine, S.V. Kostiouchenko and N.N. Koudriavtsev ..	639
The First Electric Discharge Method for Visualizing Three Dimensional Shock Shapes Around Hypersonic Vehicles M. Nishio and M. Kotake	644

Schlieren Device and Holographic Interferometer for Hypersonic Flow Visualization J. Surget, M. Philbert and D. Blze	649
A Semiconductor Laser with Unusual Characteristics for Flow Visualization A.N. Golchenko, M.V. Gushchin, I.M. Olikhov, I.M. Dementjev and N.P. Mende	654
The Measurement of Gas Density Around a Blunt Cone Using a Differential Interferometer S. Qiming, L. Jialing and L. Chao	659
7. Optical Methods	
Holographic Color Schlieren Method of Flow Visualization N.M. Spornik	667
A Modern Focusing Schlieren for Flow Visualization L.M. Weinstein	672
Simultaneous Measurements of Two Dimensional Velocity and Temperature Field Using Correlation Technique and LIF J. Sakakibara, K. Hishida and M. Maeda	677
The Refracted Image Moire Topography for Measuring Liquid Film Profiles T. Nosoko, T. Nagata, T. Shinzato and M. Fang	682
8. Image Processing and Numerical Analysis	
8.1 Image Processing	
Geometric Modeling and Computer Graphics for Flow Visualization (Keynote Paper) J. Dol	689
Charge-Coupled Devices in Flow Visualization W.J. Hiller, T.A. Kowalewski, V.L. Forner, B. Stuckrad and M. Behnia	695
A Digital Image Analysis System for High-Speed Filmed Injection Jets J. Wagner	700
CT Image Reconstruction by Matrix Method T. Yoshida, M. Kitada and I. Yamaguchi	705
Measurement of Unsteady Separated Flows on a Blunt Plate by a Fourier Transform Method S. Murata and H. Shimada	710
New Technique for Visualizing Three-Dimensional Flow in the Atmospheric Boundary Layer M.P. Bleiweiss, R.A. Howerton, K.C. Payne and T.A. King	715
On the Quantification of Cavity Extent on an Orifice in a Pipe by Use of an Image-Processing Technique K. Ogura	720

Higher Order Approximation for Spatio-Temporal Derivative Method S. Nishio, T. Okuno and S. Morikawa	725
Photon Counting for the Measurement of Velocity and Temperature in Liquid Flow M. Yano	730
Investigation of a Digital Fourier Filtering Technique for Two-Dimensional Velocity Measurement R.F. Larijani, G.W. Rankin and K. Sridhar	735
Image Analysis with Spatial Filtering Method for Fluidizing Particle Velocity in a Circulating Fluidized Bed Y. Katoh, M. Miyamoto, S. Kaneko, H. Milke and K. Koga	740
8.2 Numerical Analysis	
An Algorithm for Searching Points on Generalized Curvilinear Coordinate System and Its Application to Flow Visualization S. Chiba, S. Shirayama and K. Kuwahara	747
Visual Study for Topological Transitions of Vector Fields S. Shirayama	752
Numerical Flow Visualization of Separated Flows Around Oscillating Airfoil by Solving Incompressible Navier-Stokes Equations S. Aso, A. Sakamoto and M. Hayashi	757
Visualization Technique in Computational Fluid Dynamics for Rational Comparison with Experiment K. Fujii and Y. Tamura	762
Visualization of Molecular Motions by MD Method Y. Matsumoto, J. Matsui and H. Ohashi	767
Numerical Visualization of Molecular Motion in Rarefied Gas Flows by Direct Simulation of Monte Carlo Method M. Ota	772
Three-Dimensional Computation of a Fluid Flow with the Method of the Lattice Boltzmann Equation G. Alfonsi	777

9. Velocimetry by Image Processing

9.1 Particle Tracking Method

3D Particle Tracking Velocimetry - Its Possibilities and Limitations (Keynote Paper) T. Dracos and N.A. Malik	785
Improvement Toward High Measurement Resolution in Three-Dimensional Particle Tracking Velocimetry Y. Sata and N. Kasagi	792

Application of a 3-D PTV to the Measurement of Turbulent Air Flows H. Kato, K. Nishino and K. Torii	797
Fractional Analysis of the Motion of Solid Particles in a Turbulent Air Flow B. Sirok, I. Nancovska and F. Trdic	802
Spectrum-Correlation Method and Filters Technique Application for the Velocity Field Estimation T. Kobayashi and M. Hino	807
2D PTV Based on Binary Correlation Method and Its Application to Fluctuating Flows F. Yamamoto, T. Uemura, M. Koukawa, M. Iguchi, J. Ohta and Y. Sakai	812
New 3D-PTV Algorithms Based on Correlation Between Binary Images T. Uemura, F. Yamamoto and M. Iguchi	817
Holographic Particle Image Velocimetry (HPIV) - An Extension of PIV to a 3-D Measuring Method F. Dreesen, H. Hinrichs, K. Hinsch and A. Roshop	822
Three-Dimensional Particle Image Velocimetry Using Velocity Vector Histogram K. Okamoto	827
Recent Developments in Three-Dimensional Particle Tracking Velocimetry (Keynote Paper) N. Kasagi and Y. Sata	832
The Particle Tracking Method Using the Kalman Filter K. Yagoh, K. Ogawara and S. Iida	838
Model-Based Velocity Estimation Using the Kalman Filter K. Ohba, T. Ishihara and H. Inooka	843
Development of Digital Vector Velocimetry Method and Its Application to Lid-Driven Rotating Flow Y.G. Kim and C.J. Chen	848
Application of a Fast Algorithm for Pattern Tracking on Airflow Measurements A. Kaga, Y. Inoue and K. Yamaguchi	853
On the Accuracy of the Correlation Method I. Fujita and S. Komura	858
PIV for Lagrangian Scale Evaluation in a Convective Boundary Layer A. Cenedese and G. Querzoli	863
A High-Speed Data Acquisition Technique with Particle Image Velocimetry to Study Steam Bubble Collapse Y.A. Hassan, W.D. Schmidl and T.K. Blanchat	868
Computer Aided Discrimination of Slow and Fast Tracer Paths H.-H. Bartels, W.J. Hiller and T.A. Kowalewski	873

Tracer Particles of Which Specific Gravity is Unity T. Etoh and K. Takehara	878
9.2 Particle Imaging and Speckle Methods	
Speckle Method and High Image Density PIV (Keynote Paper) M. Kawahashi and M. Fumizawa	885
Introduction of a Conditional Sampling to Particle-Imaging Velocimetry D.H. Doh, T. Kobayashi, T. Saga and H. Kanamori	890
A High Accuracy and Fast Automatic Processing Method of Young's Fringes in PIV G. Ma and G. Shen	895
Processing PIV Patterns by Holographic Correlation Technique N. Nakatani and T. Oshio	900
Subject Index	905
