Outline of an object-oriented calculus of higher type (invited talk)	1
<i>H. Aït-Kaci (Digital Labs, Paris)</i>	
High-level-replacement systems for equational algebraic specifications	3
<i>H. Ehrig (Technische Universität Berlin), F. Parisi-Presicce (Università de L'Aquila)</i>	
Termination of rewrite systems by elementary interpretations	21
<i>P. Lescanne (CRIN and INRIA-Lorraine, Nancy)</i>	
Termination of order-sorted rewriting	37
<i>I. Gnaedig (CRIN and INRIA-Lorraine, Nancy)</i>	
Generalized sufficient conditions for modular termination of rewriting	53
<i>B. Gramlich (Universität Kaiserslautern)</i>	
A theory of first-order built-in's of Prolog	69
<i>K.R. Apt (CWI and University of Amsterdam), E. Marchiori (CWI and Università di Padova), C. Palamidessi (Università di Pisa)</i>	
Fixpoint semantics for partial computed answer substitutions and call patterns	84
<i>M. Gabbrielli, M.C. Meo (Università di Pisa)</i>	
Oracle semantics for Prolog	100
<i>R. Barbuti (Università di Pisa), M. Codish (Katholieke Universiteit Leuven), R. Giacobazzi (Università di Pisa), M. Maher (IBM T.J. Watson Research Center, Yorktown Heights)</i>	
On the relation between primitive recursion, schematization and divergence	115
<i>M. Hermann (CRIN and INRIA-Lorraine, Nancy)</i>	
Term rewriting with sharing and memoization	128
<i>B. Hoffmann (Universität Bremen)</i>	
Definitional trees	143
<i>S. Antoy (Portland State University, Portland)</i>	

Multiparadigm logic programming (invited talk)	158
<i>J. Meseguer (SRI International, Menlo Park)</i>	
Non-linear real constraints in constraint logic programming	201
<i>Hoon Hong (Johannes Kepler University, Linz)</i>	
A general scheme for constraint functional logic programming	213
<i>F.-J. Lopez-Fruas (Universidad Complutense de Madrid)</i>	
Incremental rewriting in narrowing derivations	228
<i>M. Hanus (Max-Planck-Institut für Informatik, Saarbrücken)</i>	
Counterexamples to completeness results for basic narrowing (Extended Abstract)	244
<i>A. Middeldorp (CWI, Amsterdam)</i>	
<i>E. Hamoen (Vrije Universiteit, Amsterdam)</i>	
Uniform narrowing strategies	259
<i>R. Echahed (IMAG-LGI, Grenoble)</i>	
Proof by consistency in constructive systems with final algebra semantics	276
<i>O. Lysne (University of Oslo)</i>	
A fast algorithm for ground normal form analysis	291
<i>R. Bündgen, H. Eckhardt (Universität Tübingen)</i>	
Eta-conversion for the languages of explicit substitutions	306
<i>T. Hardin (INRIA-Roquencourt, Le Chesnay)</i>	
Serialisation analysis of concurrent logic programs	322
<i>A. King, P. Soper (University of Southampton)</i>	
Implementation of a toolset for prototyping algebraic specifications of concurrent systems	335
<i>A. Giovini, F. Morando, A. Capani (Università di Genova)</i>	
Axiomatizing permutation equivalence in the λ -calculus	350
<i>C. Laneve, U. Montanari (Università di Pisa)</i>	
A CLP View of Logic Programming (invited talk)	364
<i>M. Maher (IBM T.J. Watson Research Center, Yorktown Heights)</i>	
Partial deduction of logic programs w.r.t. well-founded semantics	384
<i>C. Aravindan, Phan Minh Dung (Asian Institute of Technology, Bangkok)</i>	

The finiteness of logic programming derivations	403
<i>P. Balbiani (IRIT, Toulouse)</i>	
Theorem proving for hierarchic first-order theories	420
<i>L. Bachmair (SUNY at Stony Brook), H. Ganzinger, U. Waldmann</i> <i>(Max-Planck-Institut für Informatik, Saarbrücken)</i>	
A goal oriented strategy based on completion	435
<i>R. Socher-Ambrosius (Max-Planck-Institut für Informatik, Saarbrücken)</i>	
On n-syntactic equational theories	446
<i>A. Boudet, E. Contejean (LRI, Université Paris-Sud, Orsay)</i>
