

Contents

Part I	One-Dimensional Integrable Models	
<hr/>		
Some Remarks on the Hirota Bilinear Identity By R. Carroll	2	
Hirota Equations of Level >1 By R.K. Dodd	6	
Integrable $N \leq 0$ Component Nonlinear Schrödinger Model, Phase Transitions and Supersymmetry By O.K. Pashaev	8	
A Tri-Hamiltonian Extension of the Boussinesq Equation and Its Modification By Qing Ping Liu	12	
A Direct Algebraic Method for Solving Nonlinear Integrable Models By J. Hronek and V.G. Makhankov	16	
Multivalued Solitons for a Hybrid Type of the Modified WKI Equation and Related Problems By K. Konno	22	
Miura Maps at the Turn of a Handle By I. Marshall	24	
On the Integration of the Infinite Toda Lattice By M.I. Gekhtman	29	
<hr/>		
Part II	Multi-Dimensional (Nonlinear) Models	
<hr/>		
Recent Developments in Multidimensional Inverse Scattering By A.S. Fokas, L.-Y. Sung, and V.E. Zakharov	34	
Asymptotic Bifurcation of Multidimensional Solitons By M. Boiti, J. Leon, L. Martina, F. Pempinelli, and D. Perrone	47	
Localized Waves in $N+1$ Dimensions By A. Degasperis	61	
		XI

Recent Development for Integrable Integro-Differential Equations By A. Degasperis, D. Lebedev, M. Olshanetsky, S. Pakuliak, A. Perelomov, and P. Santini	68
Exactly Solvable Nonlinear Evolution Equations Expressed by Trilinear Form By J. Matsukidaira and J. Satsuma	76
A Derivation of Conserved Quantities and Symmetries for the Multi-Dimensional Soliton Equations By K. Kajiwara and J. Satsuma	79
Dromion Solutions for Generic NLS- and KdV-Type Equations By J. Hietarinta	83
"Nonstandard" Classes of Integrable Equations in 1+1 and 2+1 Dimensions By W. Oevel and B.G. Konopelchenko	86
From Polynomial Solutions to a "General" Solution of the BKP Equation By J.J.C. Nimmo	89
Solutions of the Davey-Stewartson Equation with Non-Zero Boundary Condition By J. van der Linden	92
Lump Solutions to the BKP Equation By C.R. Gilson and J.J.C. Nimmo	94

Part III Geometric and Algebraic Methods

Geometry of Ermakov Systems By C. Athorne	100
Multisoliton Adiabatic Perturbation Theory. Algebraic Approach By M. Błaszak	103
The Algebraic Structure Associated with Systems Possessing Non-Hereditary Recursion Operators By Li Yi-Shen	107
Homogeneous Manifolds, Factorisation Problems and Modified KdV Equations By M. Mañas	110
Bäcklund Transformations and Spectral Problems: the Korteweg-de Vries Interacting Soliton Equation and the Action-Angle Transformation By S. Carillo	117

Integrability of Polynomial-Nonlinear Evolution Equations and Computer Algebra By V.P. Gerdt	121
Genetic Codes of Lie Algebras and Nonlinear Evolution Equations By V.P. Gerdt, V.E. Kovtun, and V.N. Robuk	124
On Some Problems Concerning Local Symplectic Operators By I. Dorfman	127
Infinitesimal Objects of Hypercomplex Systems Generated by Double Adjacent Classes and Nonlinear Differential Equations By G.B. Podkolzin	130
Local Analysis of Nonlinear Equations By S. Shekhovtsov	133

Part IV **Quantum Field Theory**

The q -Deformed Creation and Annihilation Operators as a Realization of the Quantum Superalgebra $B_q(0 1)$ By E. Celeghini, T.D. Palev, and M. Tarlini	138
The Heisenberg Quantum Group $H(1)_q$: R -Matrix and Non-Commutative Spaces By E. Celeghini, R. Giachetti, E. Sorace, and M. Tarlini	140
Phase Transitions in Kuryshkin's Algebras By C.V. Usenko	143
Semiclassical Quantization of Kowalewski's Top on $O(4)$ and $O(3,1)$ Lie Algebras By I.V. Komarov and V.B. Kuznetsov	150
A Model of Electrodynamics in the Momentum Space of Constant Curvature By R.M. Mir-Kasimov	154

Part V **Applications: Nonlinear Optics, Condensed Matter**

Cellular Automaton to Optical Communication: Diversity of Solitons By J. Satsuma, N. Sasa, and D. Takahashi	162
Integrable Unstable Model for Interaction of Langmuir Waves with Acoustic Waves in Plasmas By A. Latifi and J. Leon	168
Self-Localized Excitation in a Polar Medium with Movable Ions By I.V. Amirkhanov, V.K. Fedjanin, V.D. Lakhno, I.V. Puzynin, T.A. Strizh, and O.V. Vasil'ev	175

Nonlinear Waves Dynamics in Nematics Under the Action of Magnetic Fields By F.Kh. Abdullaev, A.A. Abdumalikov, and E.N. Tsoi	181
The Action of Effects of Dissipation, Dispersion and Nonstationary Kerr Nonlinearity on the Propagation of Solitons in Resonant Media By F.Kh. Abdullaev and S.Sh. Tadjimuratov	183
Two-Dimensional Classical Attractors in the Spin Phase Space of the $S = 1$ Easy-Axis Heisenberg Ferromagnet By V.G. Makhankov, A.V. Makhankov, A.T. Maksudov, and Kh.Kh. Muminov	185
Universal Attractors for Some Dissipative Nonlinear Evolution Equations By Guo Boling	194
Evolution of Nonlinear Guided Optical Fields in Planar Layered Structures By D. Mihalache, R.G. Nazmitdinov, and V.K. Fedyanin	197
Numerical Application of the KP Equation to a Particular Oceanographical Problem By S. Pierini	202
On a Dimensional Antiferromagnetic Ising Model with Long Range Interaction By A. Kerimov	204
Coherent State Theory and the Field Lattice Model By M.A. Agüero Granados	207
Self-Consistent System of Equations for Probability Amplitudes and Displacements in the X-Y Model By S.S. Lapushkin	212
Periodic and Soliton Solutions of the Heat Equation with a Nonlinear Source of Heat By L.A. Uvarova and V.K. Fedyanin	215
Stability Properties of Exact Soliton Solutions of the Parametrically Driven, Damped Nonlinear Schrödinger Equation By I.V. Barashenkov, M.M. Bogdan, and V.I. Korobov	218
Equations for the Frustrated Josephson Junction Array By J. Zagrozdziński	223
Subject Index	231
List of Participants	235
Index of Contributors	239
