

Contents

Part 1: UNITY	1
A Perspective on Parallel Program Design	2
<i>J. Misra</i>	
UNITY to UC: A Case Study in the Derivation of Parallel Programs	6
<i>I. Chakravarty , M. Kleyn , T. Y. C. Woo, R. Bagrodia and V. Austel</i>	
Reasoning About Synchronic Groups	21
<i>G.-C. Roman and H.C. Cunningham</i>	
An Industrial Experience in the Use of UNITY	39
<i>A. Pizzarello</i>	
On the UNITY Design Decisions	50
<i>B. Sanders</i>	
Flexible Program Structures for Concurrent Programming	64
<i>A. K. Singh and Y. Liu</i>	
Part 2: Linda	73
Current Research on Linda	74
<i>D. Gelernter</i>	
Expressing Fine-Grained Parallelism Using Concurrent Data Structures	77
<i>S. Jagannathan</i>	
Persistent Linda: Linda + Transactions + Query Processing	93
<i>B. G. Anderson and D. Shasha</i>	
Parallel Logic Programming Using the Linda Model of Computation	110
<i>P. Ciancarini</i>	
Lucinda - A Polymorphic Linda	126
<i>P. Butcher and H. Zedan</i>	
A Rationale for Programming with <i>Ease</i>	147
<i>S. Ericsson Zenith</i>	
Intermediate Uniformly Distributed Tuple Space on Transputer Meshes	157
<i>C. Faasen</i>	

Mixing Concurrency Abstractions and Classes	174
<i>J. Padget, P. Broadbery and D. Hutchinson</i>	
Coordination Applications of Linda	187
<i>S. Hupfer, D. Kaminsky, N. Carriero and D. Gelernter</i>	
Part 3: Gamma	195
The Chemical Reaction Model	196
<i>D. Le Métayer</i>	
Introduction to Gamma	197
<i>J.-P. Banâtre and D. Le Métayer</i>	
Parallel Programming with Bags	203
<i>L. Mussat</i>	
Implementation of Gamma on the Connection Machine	219
<i>C. Creveuil</i>	
Parallel Programming with Pure Functional Languages	231
<i>R. Harrison</i>	
Parallel Programming in Maude	253
<i>J. Meseguer and T. Winkler</i>	
Part 4: Parallel Program Design	295
Parallel Program Design	296
<i>J.-P. Banâtre</i>	
The Palindrome Systolic Array Revisited	298
<i>H. Le Verge and P. Quinton</i>	
The Synthesis of Systolic Programs	309
<i>M. Barnett and C. Lengauer</i>	
Synthesizing Delay Insensitive Circuits from Verified Programs	326
<i>H. Hulgaard, P. H. Christensen and J. Staunstrup</i>	
A Distributed Implementation of a Task Pool	338
<i>H. P. Hofstee, J. J. Lukkien and J. L. A. van de Snepscheut</i>	
Invariance and Contraction by Infinite Iterations of Relations	349
<i>M. Sintzoff</i>	
Constructing a Parallel Sort Program on Hypercube by Using Distributively Callable Procedures	374
<i>D. Herman and L. Trilling</i>
