

Contents

1. Introduction

By <i>E. Hulpke</i>	1
References	4

2. Experimental Limitations and Opportunities in Single-Phonon Inelastic Helium Scattering

By <i>R.B. Doak</i> (With 11 Figures)	5
2.1 Experimental Limitations	6
2.2 Beam Resolution	8
2.3 Kinematic Smearing	9
2.4 Time-of-flight Resolution	13
2.5 Intensity Limitations	16
2.6 Frequency and Momentum "Cut-Off"	17
2.7 Improving Signal Intensity: Bound State Resonances	18
2.8 Improving Signal Intensity: Beam Focussing	21
2.9 Improving Signal Intensity: Pseudorandom Chopping	23
2.10 Summary	23
References	24

3. Interaction Potentials

By <i>V. Celli</i>	25
3.1 Hard Wall Models	26
3.2 The Static Atom-Surface Potential	28
3.2.1 The Static Repulsive Potential	29
3.2.2 The Static Attractive Potential	31
3.2.3 The Total Static Potential	34
3.3 The Dynamical Interaction	35
3.3.1 The Dynamic Repulsion and the Cutoff Factor	36
3.3.2 Dynamical Effects of the Attractive Potential	37
References	38

VII

7.4.1	Phonon-Mediated Selective Adsorption and Desorption: PMSA and PMSD	152
7.4.2	Rotation-Mediated Selective Adsorption: RMSA, or Rotational Feshbach Resonances	161
7.5	Conclusions	168
	References	169
 8. Theoretical Aspects of Atom-Surface Scattering		
	By <i>J.R. Manson</i>	173
8.1	The Wavefunction and Transition Matrix	174
8.2	Exact Solutions for Rigid Periodic Potentials	179
8.2.1	Close Coupling Formalism	179
8.2.2	Inversion of the Transition Matrix Equation	181
8.2.3	Summation of the Perturbation Series	182
8.2.4	Wave Packet Methods	183
8.2.5	Resonances in Elastic Scattering	184
8.3	Approximate Methods	187
8.3.1	The Hard Corrugated Wall Model	187
8.3.2	Rayleigh Ansatz	189
8.3.3	The Eikonal Approximation	190
8.3.4	The Sudden Approximation	191
8.3.5	Other Approximate Methods	193
8.4	Inelastic Scattering	195
8.4.1	The Debye-Waller Factor	196
8.4.2	Single Phonon Exchange	199
8.5	Scattering from Disordered Surfaces	201

10. Physisorbed Rare Gas Adlayers Studied with Helium Scattering	
By <i>G. Comsa, K. Kern and B. Poelsema</i> (With 11 Figures)	243
10.1 Background	243
10.2 Experimental Aspects of Helium Scattering at Surfaces	246
10.3 Rare Gas Monolayer Phases on Pt(111)	253
10.3.1 Isolated Adatoms and the 2D Gas \rightarrow 2D Gas + 2D Solid Phase Transition	253
10.3.2 Commensurate, High Order Commensurate and Incommensurate Adlayers	255
10.3.3 Influence of Extrinsic Defects	260
References	263
11. Phonon Inelastic Scattering	
By <i>D. Neuhaus</i> (With 14 Figures)	265
11.1 The Noble Metals and Platinum	268
11.2 Platinum with Chemisorbed Adsorbates	273
11.3 Silver and Platinum with Physisorbed Adsorbates	281
11.4 Summary and Conclusions	284
References	285
12. Quasielastic Helium Scattering Studies of Adatom Diffusion on Surfaces	
By <i>J.W.M. Frenken and B.J. Hinch</i> (With 7 Figures)	287
12.1 Theory of Quasielastic Atom Scattering	288
12.1.1 Scattering Formalism	288
12.1.3 High Adatom Concentrations	297
12.2 Experimental Procedure	298
12.3 Experimental Results	300
12.3.1 Heterodiffusion: S on Cu(111)	300
12.3.2 Self-Diffusion: Surface Melting of Pb(110)	303
12.4 Conclusion	310
References	311
