

Contents

Transformation of Attributed Trees Using Pattern Matching <i>Josef Grosch</i>	1
Generating LR(1) Parsers of Small Size <i>Jóse Fortes Gálvez</i>	16
Syntax Directed Translation with LR Parsing <i>Bořivoj Melichar</i>	30
Attribute-Directed Top-Down Parsing <i>Karel Müller</i>	37
Another Kind of Modular Attribute Grammars <i>Beate Baum</i>	44
Integrated Graphic Environment to Develop Applications Based on Attribute Grammars <i>Tibor Gyimóthy, Zoltán Alexin, Róbert Szűcs</i>	51
Implementing High-Level Identification Specifications <i>Arnd Poetzsch-Heffter</i>	59
Another Solution of Scoping Problems in Symbol Tables <i>Werner Aßmann</i>	66
Compiler Implementation of ADTs Using Profile Data <i>A. Dain Samples</i>	73
The LDL – Language Development Laboratory <i>Günter Riedewald</i>	88
ACTRESS: An Action Semantics Directed Compiler Generator <i>Deryck F. Brown, Hermano Moura, David A. Watt</i>	95
Creation of a Family of Compilers and Runtime Environments by Combining Reusable Components <i>Christian Weber</i>	110
The Interprocedural Coincidence Theorem <i>Jens Knoop, Bernhard Steffen</i>	125
Provably Correct Compiler Development and Implementation <i>Bettina Buth, K.-H. Buth, M. Fränzle, B. von Karger, Y. Lakhneche, K. Langmaack, M. Müller-Olm</i>	141
On Interprocedural Data Flow Analysis for Object-Oriented Languages <i>Mario Südholt, Christoph Steigner</i>	156

Testing Completeness of Code Selector Specifications <i>Helmut Emmelmann</i>	163
A Register Allocation Framework Based on Hierarchical Cyclic Interval Graphs <i>Laurie J. Hendren, Guang R. Gao, Erik R. Altman,</i> <i>Chandrika Mukerji</i>	176
Register Pipelining: An Integrated Approach to Register Allocation for Scalar and Subscripted Variables <i>Evelyn Duesterwald, Rajiv Gupta, Mary Lou Soffa</i>	192
Instruction Scheduling for Complex Pipelines <i>M. Anton Ertl, Andreas Krall</i>	207
Comparing Software Pipelining for an Operation-Triggered and a Transport-Triggered Architecture <i>Jan Hoogerbrugge, Henk Corporaal</i>	219
Scheduling Instructions by Direct Placement <i>Robert Griesemer</i>	229
Compile-Time Analysis of Object-Oriented Programs <i>Jan Vitek, R. Nigel Horspool, James S. Uhl</i>	236
Partial Evaluation of C and Automatic Compiler Generation <i>Lars Ole Andersen</i>	251
A Term Pattern-Match Compiler Inspired by Finite Automata Theory <i>Mikael Pettersson</i>	258
Improving the Performance of Parallel LISP by Compile Time Analysis <i>Jürgen Knopp</i>	271
FCG: A Code Generator for Lazy Functional Languages <i>Koen Langendoen, Pieter H. Hartel</i>	278
Compiling Flang <i>Andrei Mantsivoda, Vyacheslav Petukhin</i>	297
The Implementation of ObjectMath – A High-Level Programming Environment for Scientific Computing <i>Lars Viklund, Johan Herber, Peter Fritzson</i>	312
