|-----------------------------------------------------------------------------|-----|
| I. Anatomy of the Breast . . . . .                                          | 1   |
| II. Method for Systematic Viewing of Mammograms . . . . .                   | 5   |
| III. Approach to Mammographic Film Interpretation . . . . .                 | 15  |
| IV. Circumscribed Lesions . . . . .                                         | 17  |
| Signs of Primary Importance in Diagnosing Circumscribed Tumors . . . . .    | 18  |
| Signs of Secondary Importance in Diagnosing Circumscribed Lesions . . . . . | 19  |
| Practice in Analyzing Circumscribed Tumors (Cases 1–56) . . . . .           | 21  |
| V. Stellate Lesions . . . . .                                               | 87  |
| Key Case . . . . .                                                          | 91  |
| Practice in Analyzing Stellate Lesions (Cases 58–85) . . . . .              | 92  |
| VI. Calcifications . . . . .                                                | 137 |
| Ductal-type Calcifications . . . . .                                        | 138 |
| Practice in Calcification Analysis (Cases 86–109) . . . . .                 | 140 |
| Lobular Type Calcifications . . . . .                                       | 170 |
| Miscellaneous Calcifications . . . . .                                      | 172 |
| Practice in Calcification Analysis (Cases 112–152) . . . . .                | 174 |
| VII. Thickened Skin Syndrome of the Breast . . . . .                        | 211 |
| VIII. Overall Strategy . . . . .                                            | 217 |
| References . . . . .                                                        | 219 |
| Index . . . . .                                                             | 221 |
