

Table of Contents

Preface	VII
E.W. Dijkstra:	
On the Nature of Computing Science	1
<u>I. Operational Models of Distributed Systems</u>	5
U. Montanari, P. Degano:	
Distributed Systems, Partial Orderings of Events, and Event Structures	7
A. Ershov:	
On Mixed Computation: Informal Account of the Strict and Polyvariant Computational Schemes	107
<u>II. Abstract Modelling of Distributed Systems</u>	121
C.A.R Hoare:	
Notes on Communicating Sequential Processes	123
R. Milner:	
Lectures on a Calculus for Communicating Systems	205
M. Broy:	
Extensional Behaviour of Concurrent, Nondeterministic, Communicating Systems	229

<u>III. Hardware as Distributed Systems</u>	277
C.P. Kruskal, L. Rudolf, R. Cytron: The Architecture of Parallel Computers	279
J.B. Dennis: Data Flow Computation	345
M. Rem: Concurrent Computations and VLSI Circuits	399
<u>IV. Design and Verification of Distributed Systems</u>	439
K. Apt: Proving Correctness of CSP Programs, a Tutorial	441
K. Apt, J. L. Richier: Real Time Clocks versus Virtual Clocks	475
E.W. Dijkstra: The Image Construction in Computerized Axial Tomography	503
E.W. Dijkstra, W.H.J. Feijen, A.J.M. van Gasteren: Derivation of a Termination Detection Algorithm for Distributed Computations	507
E.W. Dijkstra: The Distributed Snapshot of K.M. Chandy and L. Lamport	513
E.W. Dijkstra, A.J.M. van Gasteren: A Simple Fix Point Argument without the Restriction to Continuity	519
