

Contents

<i>N. Kleitman</i>	
Introductory Note	1
Introduction	2
 Section 1	
<i>Ultradian Rhythms in Physiology and Endocrinology</i> . . .	7
 <i>M. P. Gerkema and S. Daan</i>	
Ultradian Rhythms in Behavior:	
The Case of the Common Vole (<i>Microtus Arvalis</i>) . . .	11
 <i>E. Knobil and J. Hotchkiss</i>	
The Circhoral Gonadotropin Releasing Hormone (GnRH) Pulse Generator of the Hypothalamus and Its Physiological Significance	32
 <i>E. Van Cauter and E. Honinckx</i>	
Pulsatility of Pituitary Hormones	41
 <i>F. Kimura, C. Praputpittaya, N. Mitsugi, R. Hashimoto, and R. Suzuki</i>	
Relationship Between Ultradian Rhythms of the Sleep- Wakefulness Cycle and Growth Hormone and Corticosterone Secretion in Rats	61
 <i>K. Honma and S. Honma</i>	
Ultradian Rhythms in Locomotor Activity, Deep Body Temperature and Plasma Corticosterone Levels in Rats: Two Different Origins?	77
 <i>S. Honma and K. Honma</i>	
Interaction Between Circadian and Ultradian Rhythms of Spontaneous Locomotor Activity in Rats During the Early Developmental Period	95
 <i>C. R. Gordon and P. Lavie</i>	
Urinary Ultradian Rhythms in Dogs	110

<i>R. Lydic, R. W. McCarley and J. A. Hobson</i> Timing Function of the Dorsal Raphe Nucleus and the Temporal Organization of the Ultradian Sleep Cycle . . .	125
---	-----

Section 2

<i>Sleep and Waking Rhythms</i>	145
--	-----

<i>P. Lavie</i> Ultradian Rhythms: Gates of Sleep and Wakefulness . . .	148
--	-----

<i>H. Schulz</i> Ultradian Rhythms in the Nychthemeron of Narcoleptic Patients and Normal Subjects	165
--	-----

<i>M. B. Stermann</i> The Basic Rest-Activity Cycle Revisited: Some New Perspectives	186
--	-----

<i>D. F. Kripke, D. J. Mullaney and P. A. Fleck</i> Ultradian Rhythms During Sustained Performance . . .	201
---	-----

<i>R. J. Broughton</i> Three Central Issues Concerning Ultradian Rhythms . . .	217
---	-----

<i>S. S. Campbell and J. Zulley</i> Ultradian Components of Human Sleep/Wake Patterns During Disentrainment	234
---	-----

Section 3

<i>Methods and Models</i>	257
--	-----

<i>T. Kobayashi, Y. Tsuji, and S. Endo</i> Sleep Cycles as a Basic Unit of Sleep	260
---	-----

<i>P. Naitoh</i> In Search of REM Cycle in Short Sleep Record: Iterative Nonorthogonal r^2 Method	270
---	-----

<i>R. W. McCarley and S. Massaquoi</i> The REM Sleep Ultradian Rhythm: A Limit Cycle Mathematical Model	288
---	-----

<i>R. A. Wever</i> Modes of Interaction Between Ultradian and Circadian Rhythms: Toward a Mathematical Model of Sleep . . .	309
---	-----

Epilogue	319
---------------------------	-----

<i>J. Aschoff and M. P. Gerkema</i> On Diversity and Uniformity of Ultradian Rhythms . . .	321
---	-----

Subject Index	335
-------------------------	-----
