

Contents

1 Cytogenesis of the Central Nervous System	1
1.1 Neurogenesis and Gliogenesis	1
1.2 Gliogenesis in Adult Animals	7
1.3 Development of the Cerebellar Cortex	9
1.4 Radial Glia and Ependyma	10
2 Factors of the Transformation Process	14
2.1 Molecular Aspects	14
2.2 Familial Incidence of Tumors and Genetic Factors	19
2.3 Congenital Tumors	19
2.4 Risk Factors: Epidemiological Data	20
2.4.1 Family Characteristics	21
2.4.2 Individual Factors	22
2.4.3 Multiple Sclerosis	22
2.4.4 Virus	23
2.4.5 Head Injuries	23
2.4.6 Irradiation	24
2.4.7 Nonprofessional Exogenous Exposures	24
2.4.8 Professional Exogenous Exposures	25
2.4.9 Multiple Tumors	26
3 Experimental Tumors	28
3.1 Chemical Carcinogenesis	28
3.1.1 Topically Acting Carcinogens	28
3.1.2 Resorptive Carcinogens	28
3.1.2.1 Pathogenesis of Nitrosourea-Induced Tumors	34
3.1.2.2 Cellular Composition	36
3.1.2.3 Vascularization of ENU-induced Tumors	39
3.1.2.4 Utilization of MNU-ENU Models	39
3.2 Viral Carcinogenesis	40
3.3 Transplantable Animal Models	41
3.4 Gene Transfer Models of Neural Tumors	42
4 Antigens of Phenotypic Expression and Differentiation Markers	44
4.1 Brain Tumor-Associated Antigens	44
4.2 Antigens Employed in the Histological Diagnosis of Brain Tumors	45
4.2.1 Glial Markers	46
4.2.1.1 S-100 Protein	46
4.2.1.2 Glial Fibrillary Acidic Protein (GFAP)	46

4.2.1.3	Glutamine Synthetase	50
4.2.1.4	Carbonic Anhydrase	50
4.2.1.5	Myelin Basic Protein	51
4.2.1.6	Myelin-Associated Glycoprotein	51
4.2.2	Neuronal Markers	51
4.2.2.1	Neuronal-Specific Enolase	51
4.2.2.2	Neurofilaments	51
4.2.2.3	Synaptophysin and Chromogranin	52
4.2.3	Markers Nonspecific for the Nervous System	53
4.2.4	Vessel Markers	53
4.2.5	Other Intermediate Filaments	55
4.2.6	Epithelial Membrane Antigens	58
5	Pathology of the Host-Tumor Interaction	59
5.1	Peritumoral Changes	59
5.1.1	Glial Reaction	59
5.1.2	Included Neurons	63
5.1.3	Ventricular Walls	63
5.2	Regressive Events in the Tumor	64
5.3	Cerebral Edema	67
5.3.1	Definition and Pathogenesis	67
5.3.2	Morphological Changes and Sequelae	69
5.4	Calcifications	72
5.5	Immune Response	75
6	Classification and Nosography of Neuroepithelial Tumors	79
7	The Concept of Malignancy: Anaplasia, Cell Proliferation, Metastasis	89
7.1	General Considerations	89
7.2	Cell Kinetics	94
7.3	Metastasis	98
7.4	Expansion and Invasiveness	100
8	Descriptive Epidemiology of Primary Nervous System Tumors	106
8.1	General Data	106
8.1.1	Mortality	106
8.1.2	Incidence	106
8.2	Epidemiology of Intracranial Tumors	107
8.2.1	Histological Type	107
8.2.2	Age	108
8.2.3	Sex	109
8.2.4	Race	110
8.3	Epidemiology of Intraspinal Tumors	110

9 Astrocytic Tumors	111
9.1 Nosological Problems	111
9.2 Astrocytic Tumors of the Cerebral Hemispheres	112
9.2.1 Astrocytomas	112
9.2.1.1 Fibrillary Variant	112
9.2.1.2 Protoplasmic Variant	113
9.2.1.3 Gemistocytic Variant	114
9.2.1.4 Pilocytic Variant	115
9.2.1.5 Anaplastic Variant	119
9.2.1.6 Prognosis and Treatment of Hemispheric Astrocytomas	122
9.2.2 Glioblastoma Multiforme	127
9.2.2.1 General Considerations	127
9.2.2.2 Frequency, Age, Site	128
9.2.2.3 Macroscopic Appearance	129
9.2.2.4 Microscopic Appearance	129
9.2.2.5 Tumor Spreading	139
9.2.2.6 Differential Diagnosis	139
9.2.2.7 Giant Cell Variant	141
9.2.2.8 Gliosarcoma	142
9.2.2.8.1 General considerations	142
9.2.2.8.2 Frequency, Age, Site	143
9.2.2.8.3 Macro- and Microscopic Appearance	143
9.2.2.8.4 Prognosis	148
9.2.2.9 Blood Vessel Architecture and Angiogenesis in Gliomas	148
9.2.2.10 Cellular Kinetics	152
9.2.2.11 Metabolism	154
9.2.2.12 Prognosis and Treatment	155
9.2.3 Gliomatosis Cerebri	157
9.2.4 Xanthoastrocytoma	158
9.2.4.1 Macroscopic Appearance	158
9.2.4.2 Microscopic Appearance	159
9.2.4.3 Prognosis	161
9.2.5 Subependymal Giant Cell Astrocytoma (Tuberous Sclerosis)	161
9.2.6 Astroblastoma	162
9.3 Astrocytic Tumors of the Midline	165
9.3.1 Astrocytoma of the Optic Nerve	165
9.3.2 Astrocytoma of the Chiasm	167
9.3.3 Brain Stem Astrocytomas	168
9.3.4 Other Midline Astrocytomas	170
9.3.5 Cerebellar Astrocytoma	170
9.3.5.1 Nosographic Considerations	170
9.3.5.2 Frequency, Age	171
9.3.5.3 Macroscopic Appearance	171
9.3.5.4 Microscopic Appearance	171
9.3.5.5 Rosenthal's Fibers	175
9.3.5.6 Malignant Transformation, Prognosis	177

9.4 Astrocytic Tumors of the Spinal Cord	179
9.4.1 Frequency, Age	179
9.4.2 Macroscopic and Microscopic Appearance	179
10 Oligodendroglial Tumors	181
10.1 Oligodendroglioma	181
10.1.1 Frequency, Age, Site	181
10.1.2 Macroscopic Appearance	181
10.1.3 Microscopic Appearance	181
10.2 On the Presence of Astrocytes and the Problem of Mixed Gliomas	187
10.3 Anaplastic Oligodendroglioma and Prognosis	189
11 Ependymal Tumors	193
11.1 Ependymoma	193
11.1.1 Classification Problems	193
11.1.2 Frequency, Age, Sex, Site	195
11.1.3 Macroscopic Appearance	196
11.1.4 Microscopic Appearance	196
11.1.5 Regressive Events	201
11.1.6 Immunohistochemistry	203
11.1.7 Electron Microscopy	206
11.1.8 Anaplastic Ependymoma	209
11.1.9 Spread Via the Cerebrospinal Fluid	211
11.1.10 Treatment and Prognosis	211
11.2 Subependymoma	212
11.3 Ependymoblastoma.	215
12 Choroid Plexus Tumors	217
12.1 Plexus-Papilloma	217
12.1.1 Frequency, Age, Site	217
12.1.2 Macroscopic Appearance	218
12.1.3 Microscopic Appearance	218
12.2 Malignant Variant (Plexus Carcinoma)	220
13 Tumors Composed of Neural Cells	222
13.1 Ganglioglioma (Gangliocytoma)	222
13.1.1 Frequency, Age, Site	222
13.1.2 Macroscopic Appearance	224
13.1.3 Microscopic Appearance	224
13.1.4 Malignant Transformation (Malignant Ganglioglioma)	224
13.1.5 Prognosis	227
13.2 Dysplastic Gangliocytoma of the Cerebellum	227
13.3 Infantile Desmoplastic Ganglioglioma	227
13.4 Central Neurocytoma	228
13.5 Dysembryoplastic Neuroepithelial Tumors	229

14 Pineal Gland Tumors	231
14.1 The Pineal Gland	231
14.2 Pineocytoma	232
14.2.1 Macroscopic Appearance	232
14.2.2 Microscopic Appearance	232
14.2.3 Prognosis	235
14.3 Pinealoblastoma	235
14.3.1 Macroscopic Appearance	235
14.3.2 Microscopic Appearance	237
14.3.3 Prognosis	240
14.3.4 Trilateral Retinoblastoma	240
15 Embryonal Tumors	241
15.1 Medulloepithelioma	241
15.2 Medulloblastoma	241
15.2.1 Frequency, Age	243
15.2.2 Macroscopic Appearance	243
15.2.3 Microscopic Appearance	243
15.2.3.1 Desmoplastic Variant	247
15.2.3.2 Melanotic Medulloblastoma	247
15.2.3.3 Medulloblastoma	247
15.2.4 DNA Content and Pathology	251
15.2.5 The Problem of Differentiation	251
15.2.6 Prognosis, Recurrence, Metastasis	256
15.3 Neuroblastoma	257
15.3.1 Macroscopic Appearance	257
15.3.2 Microscopic Appearance	258
15.3.3 Prognosis	258
15.4 Polar Spongioblastoma	261
15.5 Appendix: Tumors of the Retina	263
15.5.1 Retinoblastoma	263
16 Glomus Tumors, Paraganglioma	268
16.1 Site, Age	268
16.2 Microscopic Appearance	268
16.3 Prognosis	270
17 Tumors of the Cranial and Spinal Nerves	271
17.1 Neurinoma (Schwannoma)	271
17.1.1 Frequency, Age, Sex	271
17.1.2 Site	271
17.1.3 Macroscopic Appearance	274
17.1.4 Microscopic Appearance	275
17.1.5 In Vitro Culture	281
17.1.6 Prognosis, Malignancy	281
17.2 Neurofibroma	282
17.2.1 Plexiform Neurofibroma	282
17.2.2 Malignant Variant	284

18 Tumors of the Meninges	285
18.1 Meningiomas	285
18.1.1 General Considerations and Nomenclature	285
18.1.2 Frequency	286
18.1.3 Age	287
18.1.4 Sex	287
18.1.5 Familial Tendency	288
18.1.6 Association with Other Tumors	288
18.1.7 Site	288
18.1.8 Multiple Meningiomas	292
18.1.9 Macroscopic Appearance	292
18.1.10 Microscopic Appearance	294
18.1.10.1 Angiomatous Meningioma	298
18.1.10.2 Malignant Meningioma	300
18.1.11 Metaplasia in Meningiomas	303
18.1.12 Regressive Changes	306
18.1.13 Calcifications	308
18.1.14 Electron Microscopy Study	313
18.1.15 Receptors for Steroid Hormones	315
18.1.16 In Vitro Culture	316
18.1.17 Growth Modality	317
18.1.18 Metastasis	319
18.1.19 Imaging of Meningiomas	319
18.1.20 Prognosis, Treatment	320
18.2 Other Mesenchymal Tumors in the Meninges	321
18.2.1 Hemangiopericytoma	321
18.2.2 Fibrosarcoma	322
18.2.3 Primitive Melanoblastosis of the Leptomeninges	324
18.2.4 Malignant Fibrous Histiocytoma	327
18.2.5 Meningiomatosis or Meningoangiomatosis	327
18.2.6 Primary Meningeal Sarcomatosis	329
18.2.7 Miscellaneous	329
19 Mesenchymal Tumors	330
19.1 Chordoma	330
19.1.1 General Considerations	330
19.1.2 Macroscopic Appearance	331
19.1.3 Microscopic Appearance	331
19.1.4 Electron Microscopy	332
19.1.5 Differential Diagnosis	334
19.1.6 Prognosis	334
19.2 Chondroma	334
19.3 Chondrosarcoma	335
19.4 Osteoma	337
19.5 Osteosarcoma	338

20 Vascular Tumors	339
20.1 Capillary Hemangioblastoma	339
20.1.1 Biological Data	339
20.1.2 Macroscopic Appearance	340
20.1.3 Microscopic Appearance	341
20.1.4 Regressive Events	346
20.1.5 Electron Microscopy Study	346
20.1.6 Metastasis, Recurrences, Prognosis	347
20.1.7 Associated Polycythemia	347
20.1.8 Differential Diagnosis	348
21 Tumors and Dysontogenetic Lesions	349
21.1 Germ Cell Tumors	349
21.1.1 Frequency, Age, Sites	350
21.1.2 Pathogenesis	350
21.1.3 Germinoma	351
21.1.3.1 Macroscopic Appearance	351
21.1.3.2 Microscopic Appearance	351
21.1.3.3 Prognosis, Treatment	353
21.1.4 Embryonal Carcinoma	353
21.1.5 Choriocarcinoma	355
21.1.6 Endodermal Sinus Tumor	355
21.1.7 Teratocarcinoma	355
21.1.8 Immunohistochemical and Chemical Characterization	356
21.2 Teratoma	356
21.2.1 Frequency, Age, Site	356
21.2.2 Macroscopic Appearance	356
21.2.3 Microscopic Appearance	357
21.2.4 Prognosis, Recurrence	359
21.3 Tumors with Muscle Cells	359
21.3.1 Medullomyoblastoma	359
21.3.2 Primitive CNS Rhabdomyosarcoma	361
21.3.3 Other Tumors	364
21.3.4 Rhabdoid Tumors	365
21.4 Dermoepidermoid Cysts	365
21.4.1 Nosography, Pathogenesis	365
21.4.2 Frequency, Age, Site	366
21.4.3 Macroscopic Appearance	367
21.4.4 Microscopic Appearance	368
21.4.5 Prognosis, Sequelae	369
21.5 Craniopharyngioma and Epithelial Cysts	370
21.5.1 Embryogenetic Aspects	370
21.5.2 Incidence	372
21.5.3 Site	372
21.5.3.1 Intraventricular Tumors	373
21.5.4 Clinical Aspects	374

21.5.5	Macroscopic Appearance	374
21.5.6	Microscopic Appearance	375
21.5.6.1	Electron Microscopy and Immunohistochemistry . . .	381
21.5.6.2	Calcification	383
21.5.6.3	Cystic Component	384
21.5.7	Adjacent Tissue	387
21.5.8	Relationships of Craniopharyngioma with Rathke's Fissure Cyst	387
21.5.9	Prognosis, Treatment	390
21.6	Neuroepithelial and Nonneuroepithelial Cysts	391
21.6.1	Colloid Cyst of the Third Ventricle	391
21.6.1.1	Frequency, Age, Site	392
21.6.1.2	Macroscopic Appearance	392
21.6.1.3	Microscopic Appearance	392
21.6.2	Spinal Enterogenous Cysts	393
21.6.3	Arachnoid Cysts	393
21.7	Lipoma	393
21.7.1	Frequency, Age, Site	395
21.7.2	Macroscopic Appearance	396
21.7.3	Microscopic Appearance	396
21.7.4	Prognosis, Treatment	396
21.8	Hamartomas, Ectopias and Ectopic Tumors	397
21.8.1	Hamartoma of the Hypothalamus	397
21.8.2	Granule Cell Tumors	397
21.8.3	Meningeal Gliomas	399
21.8.4	Ectopic Gliomas and Neural Hamartomas	399
21.9	Vascular Malformations	400
21.9.1	Capillary Telangiectasia	401
21.9.2	Cavernous Angioma	401
21.9.3	Arteriovenous Malformation	402
21.9.4	Venous Malformations	404
22	Phacomatosis and Dysgenetic Syndromes	405
22.1	Tuberous Sclerosis (Bourneville's Disease)	405
22.2	Neurofibromatosis or Von Recklinghausen's Disease	407
22.2.1	Associated Lesions of a Dysplastic Nature	408
22.3	Von Hippel – Lindau Disease	409
22.4	Sturge – Weber Syndrome	410
22.5	Other Dysgenetic Syndromes	410
23	Lymphomas	411
23.1	Frequency, Age, Site	412
23.2	Macroscopic Appearance	413
23.3	Microscopic Appearance	413
23.4	Epidural Lymphomas	421
23.5	Lymphomas in AIDS	421
23.6	Prognosis, Treatment	422

24 Metastases	423
24.1 Frequency	423
24.2 Sex	424
24.3 Age	424
24.4 Metastatic Pathways	424
24.5 Macroscopic Appearance	425
24.6 Microscopic Appearance	425
24.7 Differential Diagnosis	426
24.8 Prognosis and Therapy	427
24.9 Carcinomatous Meningitis	427
24.10 Spinal Metastases	429
25 Biological Basis of Therapies	430
25.1 Radiotherapy	430
25.1.1 Cellular Responses to Ionizing Radiations	430
25.1.2 Therapeutic Studies with low LET Radiations on Experimental Brain Tumors	432
25.1.3 Methods of Improving the Therapeutic Ratio in the Radiotherapy of Brain Tumors	432
25.1.3.1 Altered Fractionation	432
25.1.3.2 Brachytherapy	433
25.1.3.3 Association with Chemotherapy Agents	433
25.1.3.4 Radiosensitizers	433
25.1.3.5 Hyperthermia	434
25.1.3.6 Photoradiation Therapy	435
25.1.3.7 High LET Radiation	435
25.1.3.8 Radioprotectors	435
25.2 Chemotherapy	436
25.2.1 General Concepts	436
25.2.2 Chemosensitivity and Chemoresistance in Brain Tumors	436
25.2.3 Drug Delivery to Brain Tumors	438
25.2.3.1 Intra-CSF and Interstitial Chemotherapy	439
25.2.3.2 Transient and Reversible Blood-Brain Barrier Modification	440
25.2.3.3 Carrier Systems and Liposomes	440
25.3 Immunotherapy	441
26 Effects of Treatment on Brain Tumors and Normal Nervous Tissue	443
26.1 Effects of Radiotherapy and/or Chemotherapy on Human Brain Tumors	443
26.2 Effects of External Radiotherapy on Human Brain	444
26.3 Effects of Brachytherapy on Human Brain	450
26.4 Effects of External Radiotherapy on Human Spinal Cord and/or Nerve Roots	452
26.5 Pathogenesis of Adverse Effects on Radiotherapy on the Normal Nervous Tissue	453

26.6 Effects of Chemotherapy on Human Brain and Spinal Cord 454

26.7 Effects of Treatments on Normal Nervous Tissue in the Acute
Lymphocytic Leukemia of Childhood 455

26.8 Second Malignancies 455
