Preface	v
Acknowledgments	ix
List of Participants	xv
 <b>Galaxy Clustering</b>	 <b>1</b>
<b>1</b> Surveys of Galaxy Redshifts, Martha P. Haynes	<b>3</b>
<b>2</b> Some Statistical Problems in Cosmology, John D. Barrow	<b>21</b>
Discussion by Suketu P. Bhavsar	45
Discussion by Fred L. Bookstein	49
<b>3</b> Analysis of Patterns in Galaxy Clustering, Peter Coles	<b>57</b>
Discussion by Fred L. Bookstein	73
Discussion by N.K. Bose	79
<b>4</b> Statistical Issues Concerning Quasar	
Absorption Line Systems, David Tytler	83
Discussion by B.D. Ripley	102
Discussion by Kathryn Roeder	106
<b>5</b> Assessment of Subclustering in Clusters of Galaxies,	
Timothy C. Beers	111
Discussion by J.A. Hartigan	128
Discussion by Pranab K. Sen	132
<b>6</b> Limitations to the Method of Power Spectrum Analysis:	
Nonstationarity, Biased Estimators, and Weak Convergence to	
Normality, William I. Newman, Martha P. Haynes, and	
Yervant Terzian	137
Discussion by Timothy C. Beers	154
Discussion by Pranab K. Sen	158
Response by William I. Newman et al.	161
<b>7</b> General Discussion: Galaxy Clustering, John D. Barrow	
(Moderator)	163

<b>Truncation and Censoring</b>	<b>171</b>
<b>8</b> Luminosity Function of Flux-Limited Samples.	
Vahé Petrosian	173
Discussion by Michael G. Akritas	194
Discussion by Michael Woodroffe	196
<b>9</b> Eddington-Malmquist Bias, Streaming Motions, and the	
Distribution of Galaxies. D. Lynden-Bell	201
Discussion by Michael Woodroffe	217
<b>10</b> Censoring in Astronomical Data Due to Nondetections.	
Eric D. Feigelson	221
Discussion by P.J. Bickel and Y. Ritov	238
Discussion by Walter Liggett	242
<b>11</b> Detecting and Measuring Sources at the	
Noise Limit. Herman L. Marshall	247
Discussion by Leon Jay Gleser	263
Discussion by Terry Speed	268
Response by Herman L. Marshall	270
<b>Bayesian and Image Analysis</b>	<b>273</b>
<b>12</b> Promise of Bayesian Inference for Astrophysics.	
Thomas J. Loredo	275
Discussion by Gutti Jogesh Babu	298
Discussion by Mike West	299
Response by Thomas J. Loredo	306
<b>13</b> Source Existence and Parameter Fitting When Few Counts	
Are Available. John A. Nousek	307
Discussion by P.J. Bickel	320
Discussion by Mike West	323
<b>14</b> Bayesian Methods of Deconvolution and	
Shape Classification. B.D. Ripley	329
Discussion by Fionn Murtagh	340
Discussion by Nicholas Weir	343
<b>Time Series Analysis</b>	<b>347</b>
<b>15</b> Aperiodic Time Series in Astronomy. Julian H. Krolik	349
<b>16</b> Quasiperiodic Phenomena in Accreting Binary Stars.	
Paul Hertz and Jay P. Norris	367
Discussion by Walter Liggett	378
<b>17</b> Search for Periodicities in High-Energy Gamma-Ray	
Astronomical Data. Rosolino Buccheri	381
Discussion by Keith Ord	394
Discussion by T. Subba Rao	398

<b>18</b>	<b>Chaotic Processes in Astronomical Data. Jeffrey D. Scargle</b>	<b>411</b>
	Discussion by Gary S. Shea	429
	Discussion by Terry Speed	434
	Response by Jeffrey D. Scargle	436
<b>19</b>	<b>General Discussion: Time Series.</b>	
	France Córdova (Moderator)	437
	 <b>Multivariate Analysis and Other Topics</b>	 <b>447</b>
<b>20</b>	<b>Multivariate Analysis and Classification of Large</b>	
	<b>Astronomical Databases, Fionn Murtagh</b>	<b>449</b>
	Discussion by R. Gnanadesikan	467
	Discussion by J.A. Hartigan	471
	Response by Fionn Murtagh	473
<b>21</b>	<b>Physical Statistics. L.G. Taff</b>	<b>475</b>
	Discussion by Leon Jay Gleser	484
	Discussion by Terry Speed	490
<b>22</b>	<b>General Discussion: Working on the Interface Between</b>	
	<b>Statistics and Astronomy. Terry Speed (Moderator)</b>	<b>493</b>
	 List of Contributed Papers	 507
	Glossary	513
	Index	523
