

Contents

1	Interaction between the Electromagnetic Field and Wood. Main Features of Dielectric Properties of Wood	1
1.1	Polarization of Wood	1
1.2	Dielectric Parameters of Wood.	9
1.3	Some Principal Formulas Reflecting Interactions Between an Electromagnetic Field and a Material.	17
2	Wood Composition and Dielectric Properties of Its Components.	20
2.1	Physical Model of Wood as a Multicomponent Dielectric.	20
2.2	Dielectric Parameters of the Cell Wall Substance and Its Elements	22
2.3	Dielectric Characteristics of Air, Free and Bound Water, and Ice	32
3	Measurement of the Dielectric Properties of Wood	41
3.1	Measurement of the Dielectric Constant and Loss Tangent at Low Frequencies	42
3.2	Measurements of the Dielectric Constant and Loss Tangent at High Frequencies.	44
3.3	Measurement of the Dielectric Constant and Loss Tangent at Super High Frequencies	48
3.4	Preparation of Samples	57
4	Dielectric Properties of Oven-Dry Wood	61
4.1	Influence of Anisotropy, Density, and Frequency on the Dielectric Constant, Loss Tangent, and Loss Factor.	61
4.2	Influence of Temperature on Dielectric Properties	72
5	Dielectric Properties of Moist Wood.	77
5.1	The Dielectric Constant of Moist Wood	77
5.2	The Dielectric Loss Tangent of Moist Wood	96
5.3	The Dielectric Loss Factor of Moist Wood	107

5.4	Mechanism of the Influence of Moisture Content on the Dielectric Properties of Wood	110
6	Effect of Different Kinds of Treatment on the Dielectric Properties of Wood	116
6.1	Dielectric Properties of Compressed Wood	116
6.2	Dielectric Characteristics of Modified Wood	121
6.2.1	Wood Treated with Ammonia	121
6.2.2	Dielectric Properties of Wood Impregnated with Various Substances	123
6.3	Influence of Gamma-Radiation on the Dielectric Properties of Wood	127
7	Dielectric Properties of Bark	131
8	Dielectric Properties of Wood-Based Materials.	135
8.1	Cellulose, Paper and Board	135
8.1.1	Influence of Density Value, Moisture Content, and Temperature on the Dielectric Properties of the Material	136
8.1.2	Influence of the Structure of Paper and Board on Their Dielectric Properties	144
8.1.3	Influence of Organic and Mineral Inclusions on the Dielectric Properties of Cellulose-Based Materials	145
8.2	Fiberboards	149
8.3	Particleboards	153
8.4	Materials Containing Wood, Cellulose, Paper (as a Filler), and Cellulose Derivatives	157
9	Recommendations for the Determination of the Dielectric Parameters of Wood and Wood-Based Materials and for Their Use in Calculations.	160
9.1	Dielectric Parameters and Density of Oven-Dry Wood	160
9.2	Averaging the Dielectric Parameters Values	161
9.3	Choice of Frequency on Microwave Treatment of Wood	164
	Appendices	169
	References	191
